Watch my [problem] disappear in [timeframe]
Watch my [problem] disappear in 60 seconds
We/I just did something we've never done before…
What I ordered vs what I received
What I ordered vs what I received
What if [desired outcome] was as easy as [product method]?
Who takes [Product] in their bathroom?

Why [target audience] can’t stop talking about [product]
Why I will never [activity] again without [product]
Why I will NEVER go back to [alternative solution] again
Why I’d never use _____ again (and what I’d use instead)
Why is everyone ignoring…
Why is everyone talking about [product/brand]?
Why is nobody talking about _____
Why is nobody talking about…
Why millennials are switching to [Product]
Why you should always [topic related to using product]
Why you should never/always [activity related to product] when [activity]
You all had one question about [Product]
You guys might disagree with me on this but
You haven’t felt [desired outcome] until you’ve tried [product]
You won’t believe these 3 [Product] myths
You won’t believe this, but
You’ll never [desired end result] without doing _____
Your favourite [product] is back

Apple Magsafe battery packTEXT · 774B · May 26

Apple discontinued the original MagSafe Battery Pack because its Lightning port conflicted with the shift to USB-C across the iPhone 15 lineup. Rather than redesigning the old model, Apple retired it.

Anker
+2
The original accessory was heavily criticized for three main reasons:

EcoFlow GLOBAL

Slow charging speeds: It only delivered 5W of power, which was significantly slower than third-party alternatives.
Limited capacity: It could only deliver a partial charge (typically 40% to 60%) depending on the iPhone model.
High price: It launched at

, which many users felt was too expensive for the limited power provided.

EcoFlow GLOBAL
Because of these limitations and the transition to the universal port, Apple phased it out of their official lineup.

How MagSafe Battery Pack Actually Saves iPhone Battery Life? Long Term Review - YouTube
https://www.youtube.com/watch?v=VOzyHg0WxJ8

Transcript:
(00:00) this Mac save battery pack is L listen is literally saving my iPhone's battery right now since I've started using it I managed to reduce the battery degradation to almost a halt so in this video I'm going to tell you how this little battery pack can protect your iPhone and save you hundreds of dollars when this battery pad got released in 2021 I didn't pay that much attention to it to me the idea of having a bulky attachment to my phone seems strange and inconvenient and it's didn't really surprise me all that much for example it
(00:32) has a capacity of 1460 milliamp which is much less than even the smallest iPhone 12 minis battery iPhone 15 pro has a battery of over 3200 Mah hours so the battery pack cannot possibly charge the iPhone from 0 to 100 so what's the point this is pretty much how I saw this thing for a couple of years until my iPhone 14 pro start to lose the battery health like crazy but why did it happen no idea if you recall the battery on that thing was dying before very eyes it was losing the percentage points at such a rate that it made quite a bust in the Press so the only solution I found at that time was the max safe battery pack I
(01:14) wasn't expecting much from it but right now I can say that if you own an iPhone you absolutely have to get yourself one of these before I tell you about all those battery Shenanigans let me just say that all my expectations were busted I thought that this piece of plastic would make my phone uncomfortable to use but since the iPhone 14 pro is a chunky Boy by itself adding a small battery to it doesn't really change the picture all that much plus the quality of engineering and materials are topnotch we wouldn't expect anything less from
(01:45) Apple after all the polycarbonate feels great and not cheap at all if you remember the iPhone 5C which was made from the same material then you know what I'm talking about it is this soft to the touch but really rugged and robust material it comes in only one color white which made me a bit sad at first I was really skeptical about it preserving its visual appeal after a few months but it proved me wrong after using it for quite some time it still looks really good it has a couple of scratches and marks but nothing critical I'd say this battery Pack's design
(02:18) deserves a like and if you think our videos deserve a like you know what to do it's we and size I must say are great yes it makes the phone look a bit more bulky but the curved edges kind of redeem the ergonomics a bit and since the magnets are strong it almost acts like a convenient grip the battery pack is not the only accessory I

carry around by the way I also have this cool armonica wallet first of all the design is just sleek and smart It's Made of This unique material called Bliss no plastic completely recyclable and super
(02:50) durable the wallet adjusts its size based on what's inside which is pretty cool it's super light and fits up to 12 cards cash and even an air air tag the foldout design is super convenient and securely keeps everything inside I can easily access my cards and cash and with the air tag I never worry about losing it yes in the digital age I still carry cash you never know what could happen to your phone so I always have a backup plan the collor is really vibrant and it's totally washable making it perfect
(03:22) for daily use plus it's eco-friendly crafted in Italy which I appreciate what's really impressive is how it compares to other wallets more card capacity better environmental footprint and it's more affordable and the air tag integration none of the competitors have it the armonica wallet combines style functionality and sustainability in a way that's just right for everyday use highly recommended I will leave a link in the description so be sure to check it out what I don't like about the battery pack is the lightning Port before iPhone switched to type-c lightning was not a huge issue we were used to it I still have a lot of
(04:00) lightning cables so finding a cable to charge the battery pack is not a problem but I would still be happy if Apple updated it with a type-c port but Apple decided no we're going to stop selling it completely what you can't buy it no no you can't from Apple at least you'd have to do a little digging to find it on Amazon or your local reseller but you know we have to play with the cars we dealt so I kind of had to adapt to having lightning in a new type-c age now let me explain how all this battery saving works it all starts with the way the iPhones charge all batteries have a certain capacity AKA The amount of
(04:34) energy they can store now let's say we charge our iPhone during the night you use the phone during the day depleting the energy stored in that battery and in the night you put it to charge so that the phone could go from 10% to 100% sounds like a normal way of doing things then I have bad news for you Manuel you're killing your battery you see it all comes down to battery charge cycles each time you charge your iPhone from from 0% to 100% you use up one charge cycle and the more charged Cycles you use the faster your battery will wear out this is because the batter's chemicals are constantly changing as they are being charged and discharged
(05:13) eventually they just can hold as much energy anymore well this is exactly what this battery pack helps to tackle the Maxa battery pack is designed to be smart but charging your iPhone it doesn't just keep the battery topped off all the time which can actually wear it out f faster this is what cheaper battery packs or power Banks do charge the phone to 100% instead it starts charging only when the phone's battery drops below 90% this approach prevents constant charging which is like giving your battery a break from being
(05:46) constantly plugged in by keeping the charge level around 90% and not constantly charging to 100% the battery pack helps in reducing the wear and tear on the iPhone's battery this is important because lithium ion batteries like the and iPhones have a limited number of charg Cycles before their capacity starts to you know go down about going down if you want to keep our motivation High be sure to hit the like button and feel free to ask questions about the battery pack in the comments because from what I noticed it is not
(06:16) your typical battery pack this specific charging algorithm basically makes it an extender of your battery I basically increase the capacity of my iPhone's battery and when the phone needs energy it sucks it from both the internal battery and the battery pack this way the built-in battery works less which helps decrease the number of charge cycles it's getting but that is only part of what it does since it's an Apple product it has a tight integration into all supported devices your regular Chargers and power Banks do not

(06:48) communicate with your iPhone in any way if the phone can accept the charge they give it but this battery pack actually talks to your iPhone and decides how much power it needs to give give and when this again prevents overcharging it does so much yes and it also manages the heat since the battery pack and the phone are constantly communicating the charging proceeds without unnecessary heat the phone measures its internal temperatures and send that information to the battery pack and together they decide how to properly charge the phone without overheating it well of course if
(07:22) I'm trying to record the video while charging it will still lead to overheating simply because recording videos is very intense ensive task but in everyday tasks and general use I have never seen the phone get hot it is always at that comfortable temperature that doesn't ring any alarms and why would it this battery pack can charge only at 5 wats which is not a lot it is definitely not the battery pack for those who need fast charging 5 wats however is the best charging speed for your iPhone for your battery yes it is
(07:53) very slow but such a low power doesn't produce a lot of heat by itself and does not strain the battery chemic Les that much and with the charging power it's all about putting a strain on the battery that's the reason why Apple doesn't put fast charge in iPhones all those xiaomi phones that can do 120 wats have batteries that will go bad in a year the batteries and iPhones are designed to lose around 8 to 12% Health in the full year of extensive use so in one year your new iPhone should have around 90% battery health and in 2 years around 80 if you manage to have more than that you're lucky man I hope brings
(08:29) it back but Revisited better with type-c Port luckily in black color maybe a couple of different sizes or just thinner there's so much room for improvement here it would be nice to have some sort of a stand or rubberized material because could become a real alternative to the max safe charger pug and just lay in my table waiting for me to snap my phone to it if you want to buy one you need to remember about a couple of things one it's going to make the phone heavier and bulkier so if you use your phone without a case this battery pack might not be for you or if
(09:02) you shoot a lot of videos every day then you're not going to get that much boost since recording videos depletes charge faster than the battery pack can replenish it but if you use your iPhone daily doing relatively simple tasks this battery pack is for you but beware it's not cheap 100 bucks is a lot to ask but in my case it's totally worth it it's much cheaper than replacing the battery so if you're planning on buying the iPhone 15 or 15 Pro Pro be sure to grab this battery pack if you can and after you buy your new iPhone there are a
(09:34) couple more things you should do we made a video about it so be sure to give it a watch next thanks for watching and see you in the next one

Watch Before You Buy Apple's New MagSafe Battery... - YouTube
https://www.youtube.com/watch?v=pMLzKy3KvC4

Transcript:
(00:00) This is Apple's new MagSafe battery. After releasing their first MagSafe battery back with the iPhone 12, I thought this new version would be everything we were hoping for. It has USB-C instead of lightning. Even has a nice little status light. It's even super thin and light. But that's because it is only compatible with the iPhone Air.
(00:17) Apple, what are you doing? During the recent iPhone Air announcement, Apple announced this MagSafe battery. When they announced it, I got all excited, ordered immediately. And then, to my horror, when you look at the compatibility of the new MagSafe battery, it is only compatible with iPhone Air. How could that be possible, you might wonder? It's using MagSafe, which is the same MagSafe from the iPhone 12 to the 17.

(00:39) No, it's not a technical limitation. It is simply because they wanted to make it the exact size to fit the iPhone Air. It now does not fit any other iPhone. Does it physically charge other iPhones? Absolutely. You just need to put it on like a crucifix. Can you use the USB-C port to charge other devices like AirPods? Absolutely.
(00:57) But even if it doesn't fit perfectly, Will it still charge your iPhone? Yes, even my 16 Pro Max will get a charge from this battery. There is just an obnoxious gap. And because of that gap, it's not going to stay on securely either. This might be one of the most frustrating Apple accessories of forever. Now, not to mention, this isn't even using the new Qi 2.2 25-watt charging standard.
(01:19) The most you can hope for is 12-watt fast charging. But of course, the only phone that's going to get that is the iPhone Air because it's the only one that will fit. Now, I understand why they wanted a super thin battery for the super thin phone that fit super perfectly. And there's larger batteries now in the iPhone Pro series.
(01:35) So maybe they don't need MagSafe batteries as much. But if my videos are any indication of the interest that people have in MagSafe batteries, it would seem like Apple would want one available to every model. But yeah, that's not the case here. Now, the funny thing is this one actually does work with another iPhone model.
(01:52) I'm going to show you that in a second. And does Apple need to make MagSafe batteries with so many third party alternatives out there? Maybe not, but get a little closer. The amount of time I see people still using this lightning old Apple MagSafe battery at conferences when people are traveling. People want an Apple first party MagSafe battery.
(02:11) And to make one that only fits a single model of iPhone. Whereas every model from iPhone 14 and 12 to the new 17s all use the same MagSafe ring. It just seems kind of wild to me. Or maybe just make two versions. One that's just a tad shorter so it can actually fit the new phones. not only is it compatible and actually charged, it shows in the battery widget, even of a 16 Pro Max, it will charge really any model iPhone you want.
(02:35) Here's an iPhone 14. Look at that. Starts charging because it's the same MagSafe ring on all iPhones since the 12. Well, that is except one, the iPhone 16e. Technically, the iPhone 16e doesn't have MagSafe. There's no ring here, but it does offer wireless charging.
(02:53) And if you get a case like this one from ESR, technically you can use MagSafe batteries with it. And guess what? Even the new iPhone Air battery, you can put that on a 16e. It doesn't block the camera because that camera is super shallow. It's totally flush. It does stick out the bottom just a little bit, but technically you could use this with an iPhone 16e and get that 7.5 watt charging with this phone.
(03:18) All right, now that I got that out of my system, there's a ton of MagSafe battery options out there that you should get. Here are my top recommendations. Yes, my favorite is still the Anker Ultra Slim 10k MagSafe battery. charges at a good speed, doesn't get super hot, and has lots of capacity. This can charge your iPhone from 1% all the way to 100% in probably a couple hours.
(03:36) If you want a super thin MagSafe battery that actually does fit all iPhones, Anker also makes a 5K ultra slim. If you want a little MagSafe battery pack, lower profile, but Qi 2, charges at decent speeds, gets a little warm, but it does have a built-in kickstand. This is a great option. All of these are also USB-C, have the little charging lights, lets you know how much capacity is in each battery.
(03:56) And like I mentioned before, Qi 2.2 25 watts is a new standard. I've actually been testing this Ugreen one. It's pretty thick. It has a lanyard that also acts as a USB-C cable, so you can get like 30 watt charging from there, or it actually does charge your iPhone pretty fast, especially if you don't use your iPhone while it's charging and keep the screen off.
(04:14) This can get your iPhone into the 90%, even if it's at 1%. And if you have it in that state, screen off and charging, this one will charge faster than that Anker Ultra Slim. After several tests, I can confidently say. But if you use your iPhone

while it's charging on this, it's going to get warmer and not charge as fast. So these are all great options.
(04:32) I'll put affiliate links to these MagSafe batteries down in the description. And if you're getting the new iPhone Air, yeah, this might be a great MagSafe battery to get. You can keep that Svelte profile and still have wireless charging, but Apple can just make one that's a little shorter so everybody can use it, maybe? Anyway, rant over. Subscribe.
(04:50) Lots of iOS 26 content coming out this weekend if you're watching. I have a top 10 iOS 26 features coming out the day it's available for everyone, which is Monday, September 15th, and tons of iPhone Pro Max content, and more, all going to be right here on the channel. Thank you for coming to my MagSafe battery rant today, and I'll catch you next time.

And because of that gap, it's not going to stay on securely either. This might be one of the most frustrating Apple accessories of forever. Now, not to mention, this isn't even using the new Qi 2.2 25-watt charging standard.
(01:19) The most you can hope for is 12-watt fast charging. But of course, the only phone that's going to get that is the iPhone Air because it's the only one that will fit. Now, I understand why they wanted a super thin battery for the super thin phone that fit super perfectly. And there's larger batteries now in the iPhone Pro series.
(01:35) So maybe they don't need MagSafe batteries as much. But if my videos are any indication of the interest that people have in MagSafe batteries, it would seem like Apple would want one available to every model. But yeah, that's not the case here. Now, the funny thing is this one actually does work with another iPhone model.
(01:52) I'm going to show you that in a second. And does Apple need to make MagSafe batteries with so many third party alternatives out there? Maybe not, but get a little closer. The amount of time I see people still using this lightning old Apple MagSafe battery at conferences when people are traveling. People want an Apple first party MagSafe battery.
(02:11) And to make one that only fits a single model of iPhone. Whereas every model from iPhone 14 and 12 to the new 17s all use the same MagSafe ring. It just seems kind of wild to me. Or maybe just make two versions. One that's just a tad shorter so it can actually fit the new phones. not only is it compatible and actually charged, it shows in the battery widget, even of a 16 Pro Max, it will charge really any model iPhone you want.
(02:35) Here's an iPhone 14. Look at that. Starts charging because it's the same MagSafe ring on all iPhones since the 12. Well, that is except one, the iPhone 16e. Technically, the iPhone 16e doesn't have MagSafe. There's no ring here, but it does offer wireless charging.
(02:53) And if you get a case like this one from ESR, technically you can use MagSafe batteries with it. And guess what? Even the new iPhone Air battery, you can put that on a 16e. It doesn't block the camera because that camera is super shallow. It's totally flush. It does stick out the bottom just a little bit, but technically you could use this with an iPhone 16e and get that 7.5 watt charging with this phone.
(03:18) All right, now that I got that out of my system, there's a ton of MagSafe battery options out there that you should get. Here are my top recommendations. Yes, my favorite is still the Anker Ultra Slim 10k MagSafe battery. charges at a good speed, doesn't get super hot, and has lots of capacity. This can charge your iPhone from 1% all the way to 100% in probably a couple hours.
(03:36) If you want a super thin MagSafe battery that actually does fit all iPhones, Anker also makes a 5K ultra slim. If you want a little MagSafe battery pack, lower profile, but Qi 2, charges at decent speeds, gets a little warm, but it does have a built-in kickstand. This is a great option. All of these are also USB-C, have the little charging lights, lets you know how much capacity is in each battery.
(03:56) And like I mentioned before, Qi 2.2 25 watts is a new standard. I've actually been testing this Ugreen one. It's pretty thick. It has a lanyard that also acts as a USB-C cable, so you can get like 30 watt charging from there, or it actually does

charge your iPhone pretty fast, especially if you don't use your iPhone while it's charging and keep the screen off.
(04:14) This can get your iPhone into the 90%, even if it's at 1%. And if you have it in that state, screen off and charging, this one will charge faster than that Anker Ultra Slim. After several tests, I can confidently say. But if you use your iPhone while it's charging on this, it's going to get warmer and not charge as fast. So these are all great options.
(04:32) I'll put affiliate links to these MagSafe batteries down in the description. And if you're getting the new iPhone Air, yeah, this might be a great MagSafe battery to get. You can keep that Svelte profile and still have wireless charging, but Apple can just make one that's a little shorter so everybody can use it, maybe? Anyway, rant over. Subscribe.
(04:50) Lots of iOS 26 content coming out this weekend if you're watching. I have a top 10 iOS 26 features coming out the day it's available for everyone, which is Monday, September 15th, and tons of iPhone Pro Max content, and more, all going to be right here on the channel. Thank you for coming to my MagSafe battery rant today, and I'll catch you next time.

I've Spent $43,000 On iPhone Accessories - My Top Picks For The iPhone 17's

Now, I've blown more than 10 grand on iPhone accessories in the last year. I did some number crunching and only about $1,300 of that is worth buying. Like, what? Now, in the next few minutes, I'm going to cover my top rated screen protectors, cases, Mags Safe Puck Chargers, Mags Safe Multi Chargers, Mags Safe battery packs, normal battery packs, wall chargers, cables, Mag Safe grips, and Mags Safe wallets.
I'm only going to give you a couple of products per category. If you need other options, check out the other best of uh product videos that I'll be releasing over the next few days. Let's talk uh front protection. For screen protectors, I rank them based on design, clarity, glare, fingerprinting, impact, and scratch resistance.
With these fancy iPhone 17s, Apple blessed them with stronger glass, and an anti-reflective coating, which means you don't need a screen protector anymore, right? Those are the questions I actually had when I made my AR coding video and scratch resistance videos. With AR coating on the 17s, lots of companies are going to come out with their own products.
I'm going to try to test them all, but as of right now, this is the product to beat. Now, between the iPhone 16 and 17, glare was improved on this device by about 10%. But if you throw a flabad nano armor into the mix, that glare improves by that's pretty good. If you're going to get one, make sure it has the anti-reflective coating.
We covered the protection on the front. Let's talk about back protection. When it comes to cases in the last year, I decided to add impact monitoring to my drop test because, you know, why not? I know exactly what the iPhones do when I drop them in all the cases I tested. You know what I discovered in my testing? Cases with big corners, multi-layers, and are fairly rigid. They come up on top.
And oh, look, deja vu. The best case is still from these guys. It's the most limitless. Now, some of you got to complain that, you know, it's always them. But I'm a reviewer, not an influencer. No one's paying me to promote new products. I'm just looking for the best accessories for our tech. It's got thicker corners, but a shallower edge, which means that's not going to bust your screen.
I don't know why every single case manufacturer doesn't just copy this. Like, it is it just makes so much sense. The finish on the edges aren't too abrasive, and they still have the grip strip on this side, so that's nice. Every single member in my family has a mouse case and I haven't dealt with a broken screen protector in years or a broken iPhone in years.
Now, if you're looking for a case that's not as bulky as this or maybe a little cheaper, Apple's Tech Woven case, like Apple nailed it with this case design. The

texture of the product is amazing. But in this case, my iPhone doesn't feel like a wet bar of soap like a bare iPhone does. I did some early drop test with the iPhone 16 in the tech woven case.
I know it's not perfect, but the uh results were very promising. So, here's the deal. Help me help you by using my links so that I can keep doing what I'm doing. My only goal with this channel is to find the best accessories for my tech. All right, enough about protection. Let's talk about these things. MagSafe puck chargers. Now, for puck chargers, one of the biggest things I rank against is efficiency.
The ratio of power going into the puck versus what actually makes it to the iPhone. My top pick is this. It's Apple's updated uh Magie charger. The build quality of this product is topnotch. It is just so thin. This is the thinnest charger in my test group. And because of the metal casing, this thing is a beast in terms of heat dissipation.
And when it comes to charging, it gave my iPhone a charger 30% in 30 minutes, which is decent, but it is not the fastest charger in my test group. That goes to my number two pick, which goes to this IU magnetic wireless charger. When I first unboxed this thing, I thought it was a joke. This thing is massive compared to the Apple product. And yeah, there's a fan and some LED lights down here. Why? But beyond all that flash and bulk, this thing actually works. In my 30-minute test, it gave my iPhone an average charge of 36%. But here's the neat thing. Because of the fan, it ran at the same temperature as the Apple product. The best thing about the product is the price. Way cheaper than the Apple product, and this thing comes with its own charging brick. Now, for these puck chargers, I also test them with the Galaxy S25, and you'd be surprised which one works best for that device. Check out the top three video for puck chargers if you're interested. Now, if you need to charge more than just your iPhone, like headphones as well as a watch.
You're going to need a multi-charger. Now, when it comes to multi-chargers, I do solo charging sprints as well as fully loaded charging sprints. Like the puck chargers, I measure the efficiency, but what goes in compared to what comes out. For this part of the video, I'm going to give you two options. My top rated desktop or nightstand charger, as well as a portable.
The best desktop charger or nightstand charger is uh this guy. It's the ESR wireless charging uh station with cryoboost. Three reasons why this thing is pretty awesome, but there's also a big red flag. Now, first of all, it does really well in its solar charging test. On average, in my 30-minute charging sprints, I would get between 38 to 42% on my iPhone.
Second reason why I did it so well, in the fully loaded charging, there is absolutely no voltage set with this uh product. Like, it was just straight across. I'd never seen that before. That means the amount of energy that every single device on this uh charger didn't change. And the third thing why this thing is pretty awesome, it runs incredibly cool.
There's actually a fan in this uh unit. This product during my charge test never went over uh 50° C or 122° Fahrenheit to my test. But that fan is a red flag because if you listen carefully, you can actually hear it. If you need something that is completely silent, do check out my top five video as I think one of the newer Anchor Magos is almost as fast and doesn't have any fans, completely quiet.
Here's the best slim charger that I've tested. It's another product from Anu. Ani anu. Sorry if I'm butchering the name. It folds up really easily, which means it's very pocket friendly. But honestly, this thing feels a little cheap. But the performance is shocking. On average, my iPhone was getting between 41 and 45% in 30 minutes.
And the higher values in that range came when this thing was uh fully loaded. That just means this product is tuned for max speeds. Now, on top of that crazy charging speeds, this thing was pretty efficient. Uh giving me an efficiency of 67%. Top-notch charging, top-notch efficiency, and this thing only costs 45 bucks. Friendly reminder, if you see stuff you like, make sure you use my links.

Let's talk about T2 battery packs, which are basically these things with battery packs. Another big criteria I rank on for MagSafe battery packs is the conversion loss between what the charger gives from the charge pad versus what the iPhone actually gets. The best product that I tested is also from IU. It's the P43 version.
In got two mags safe battery packs. One that looks like this, and then another one that is much thinner, much sleeker. This one is terrible. Now, this battery bank comes with two ports, a USBC and a USBA. This thing looks like a carrying strap, but it's a cleverly hidden USBC cable. Now, in my 30-minute charge test with an iPhone, this thing gave this device 30% in 30 minutes.
This thing has a max wattage of 30 W, which it actually holds very consistently. Other products will claim a certain wattage, but it'll start up here and then it'll just crater. Overall, this battery pack, 10,000 mAh capacity, is strong enough for tablets and maybe a small laptop in a pinch. One of the downsides is that the efficiency for this product was a little lower than average, but the raw performance and the versatility just makes up for that.
If this doesn't float your boats, you might want to check out this thing. It's the kickstand power bank by ESR. And this thing comes in with a builtin smart display. Charge-wise, this thing is pretty fast. An average of 27% in 30 minutes, and it has incredible efficiency at 89% on average. Product comes with a uh built-in kickstand, which is fairly stable.
My only gripe about this product is that the magnetic strength is a little weak. Given the bulk of this product, I feel like it could be stronger. This guy is my number three pick. My personal preference for Mag Safe uh battery banks is actually my number two pick. So, check out that top five video if you want to know more.
Now, the downsides with uh MagSafe battery banks is that they're not very efficient nor fast. If fast portable charging is your thing, you're going to have to go with a old school battery bank. Now, one of the things I rank on with battery packs is the quality of the charge protocols. I do stress tests on all the advertised ranges, and you'd be surprised how many banks just fail at them.
Now, if I wasn't a reviewer and I needed some portable power, this is what I would walk away with. This Nano3 one has a decent screen, built-in cable, 10,000 mAh capacity, one USBC port, and the best part about this product, the wall prong, which means when you need this battery bank, it will always be charged.
Swap this out with your regular wall charger, and like you've got the perfect portable power charging solution. Now, if this prong wasn't a big enough selling point, the efficiency for this product is about 67%. Which is way above average. This product has a maximum output of about 30 watts, but at 30 watts, heat's going to be an issue. Now, when it got too hot, this pack didn't fail outright.
It still went to a lower power output. And when it comes to real life usage, no device is going to pull 30 watts consistently like I do in my stress tests. Now, if you need something a bit more traditional with a bit more juice, um, get this thing. This Belelcon product. The Ankor product is amazing just for smartphones.
But if you're looking to charge something big, yeah, this it's very, very plain looking. Has a decent smart screen built in. Maximum output for this product is 65 watts from both USBC outputs. And both USBC ports are also inputs, which is something a lot of other battery banks don't do for whatever reason. The voltage performance for all the power objects in this uh battery bank were way above average.
The biggest downside that I discovered is the recharge rate. It is way slower than I would like it to be. Now, there are a few more notable Ankor products in my top five. There are products with uh built-in cables that I really like and are very handy. So, battery banks are great, but they're kind of useless without a wall charger. Now, for the iPhone 17, Apple released this thing.
It's the Apple 40 watt dynamic charger. The majority of the wall chargers, they're spec for this thing called PD 3.1. This dynamic charger is spec for PD 3.2 plus AVS.

The biggest difference between the Apple charger and all the other chargers is that this charger allows the iPhone to pick very, very specific wattages and voltages. With traditional chargers, the iPhone only got to pick like five, nine, 15. But with this product, if the iPhone wanted 13, it would get 13 volts. That's the reason why Apple claims that on the iPhone 17's charging with this power brick is going to get you 50% in 20 friaking minutes. But what happens if you want something with more than one port? The product I'd recommend is actually this Anker product.

It's a Anker Prime GAN 735. This thing has two USBC ports, one USBA, and the maximum output is 67 watts. If you're using one port, if you're using both ports, one port will run at 45 watts, another port will run at 20 watts. Now, how does one connect this to this? And when it comes to cables, if a company says you can bend it 30,000 times, I'm going to bend it 30,000 times in my master bender 9,000.

The best cable for the iPhone is going to be this Ankor Prime uh cable. It's durable up to 300,000 bends. Anker claims this is a 100redyear cable. This is the end that I bent 330,000 times. Yeah, looks okay. A little limp compared to the other one. Now, my before and after testing with this product, I did not notice any voltage drops, resistance issues, or charging slowdowns.

My iPhone still got charged to 50% in 27 minutes, even after getting bent 330,000 times. The only catch with this product is that it has USB2 data speeds. So, if you're going to do anything involving a uh SSD, this is not the cable for you. You would need to get the Spigen Arc wire. This cable does it all.

fast charging speeds, fast data speeds, which makes sense cuz it's a USB 4 cable, but it's not as durable as the Ankor Prime. You can only bend it 10,000 plus times. This is what the head looks like after 11,000 bends. There's a little bump underneath the head, but I didn't notice any difference in terms of performance in my before and after testing.

Last thing I do have to warn you is that this cable is actually very stiff. So, if you're thinking this is going to be a good cable for your book bag, yeah, I wouldn't. If you need something a bit more flexible that performs well, uh, check this product out. It does pretty well in my top five list.

When it comes to Mag Safe grips, the biggest thing I measure is how strong it is. Magnetically, that is. Now, when it comes to phone grips, there is a clear winner. It's this thing. This PopSocket kickout stand solves the biggest issue I had with the Pop Grip as well as the Pop Grip round, which was propping my iPhone up in a portrait mode.

I'm not quite sure why it took PopSocket 5 years to design this thing because this thing is amazing. But because I'm a reviewer in, I'm going to point out the small things that annoy me, which includes this. But in order to overcome that, you just need to figure out how to orientate your PopSocket so it doesn't do that. So that's the overall top pick.

My personal favorite is going to be this thing. I'm kidding. This is the craziest Mags Safe accessory I've seen. It's a little book bag for your phone. It's the M phone tripod. This thing is amazing if you spend a lot of time watching stuff on your phone. This is technically number three out of my top five.

I'm talking about in this video because this thing, if you can muscle your way through it, is life-changing. As a stand, this thing does landscape as well as a portrait. It even elevates, reducing the neck strain you have when you're, you know, watching stuff. This thing's handy as a selfie stick if you just need a couple more inches to fit all your friends into your photo.

Even though the word grip isn't in the name, you can easily use this as a phone grip. There's so many places your fingers can go into that the weight of the iPhone is distributed among all your fingers. Biggest grip of this product is that it weighs almost 90 g, so it's going to add quite a bit of weight to your iPhone. Now, if you don't care how comfortable the back of your iPhone is, you could definitely put a wallet there.

For this year's ranking, I tweaked my scoring system to really focus on card access because too many companies are coming out with products like this. Why? This is the best wallet that I've tested so far. This wallet can hold 6 to8 cards, there is a cash slot, or if you don't want to hold cash there, you can just slap another card in there because you can.
So many cards. One of the things I like about this product is that there's a tension bar on the front pocket, which means it can hold one card without any issue. Now, this is the Kevlar backed version. This is the premium version. There is a cheaper one. The back of the wallet is also covered in leather, and I do think the leather that Urban Armagar uses is real because you can kind of see the striations from the cow right about here.
The stand on this wallet is decent and also let you uh use it as a grip. Now, I'll be honest with you, four out of five products are like this product. It's a hinge wallet style kind of product. The only product that is mildly different is this uh Phantom M wallet. If you're looking for just a pure card holder, this thing is worth getting.
The build quality of this product is phenomenal. The body is made from aluminum.
You've got a bunch of different finishes to choose from. This thing can easily store seven cards without any issues. And to access them, you fan them out like this, and they're really secure. Honestly, this is awesome.
And this little cutout, very handy for accessing the top card in your pile. And unlike other highquality wallets, it works without having to stick another magnet on the iPhone. This is on there pretty good. I know a lot of you thought this Jee wallet would be in my number one spot again. It's in the top five, but not number one anymore.
That's all I have for this video. Questions, comments, leave them down there. Again, if you want more options, do check out those top three, top five videos. I've got a bunch of them coming out in the next few days, so make sure you stay on top of my channel. Thanks for watching.

iPhone 17 + MagSafe Battery Bank = Game Changer (Top 5 Battery Banks Tested)

I bought $1,400 worth of CH2 battery packs, and these are my top five. This is what I'm going to do for this video. I'm going to go over the main pros and cons for each product. Monte and I have done full detailed reviews for every single product that we tested. Uh so, do check out that playlist.
Number five goes to this guy. Now, the one thing I really like about this product is this. It's a smart display. Tells you whether it's charging or discharging, the uh percentage left, and the time remaining if it's charging or discharging. This product also has a substantial kickstand, so it's not really your phone's not at a tipping risk.
It really boggles my mind when companies have these tiny little dinky things. Like the stability between the two is uh night and day. I do have an issue with the finish of this product. It gets really fingerprinty. You can definitely tell where the iPhone sits on the back of the pack.
Another annoyance is the magnetic connection. This thing comes off way too easily, which is fine if you're going to have it set up like this on a desk all the time. But if you're charging on the go, any slight movement is going to cause the iPhone to fall off the pack. Now, when it comes to performance, this thing is fast.
In my T2 charge test, this thing gave me 35% in 30 minutes with a T2 efficiency of 80%. Those are some of the best numbers I've seen. Apparently, Anker is really good at making power products, but this is the only Ankor product in the top five. Now, when it comes to thermals, this is weird because the wire temps are a bit higher, but they match the wireless temps, which are a bit lower.

And that's actually a good thing because that just illustrates how well this thing cools when you wirelessly charge. When it comes to cost of value, you are paying $130 for this product. It is the most expensive pack in my top five. Main reason why it doesn't rank higher is the price. You're paying for top tier wireless performance, a decent kickstand, a smart display, and you're also paying for the Ankor brand. So, this is number five.
Number four, slimmer, looks way more premium, but it has a pretty big red flag. Right, Monty? He really is. He turned 16 last month. So, here's how I test T2 battery packs. I measure the real capacity by monitoring full discharges to see what it actually holds. I check both wireless and wired charging speeds with power meters and custom apps.
I test efficiency by comparing energy drawn from the pack versus delivered. I monitor thermals for everything. And last but not least, I evaluate the design as well as the magnetic strength of the battery pack. This is number four. I love the shape of this product. This is the smallest and slimmest 10K battery pack. It's very pocketable. This is one of the very few products that has a metal casing which makes it feel very nice. But it will show wear and tear and the magnetic connection strength well isn't great, but because of its slim profile, you are gripping your iPhone instead of the battery bank. So, not a big deal, I don't think. When it comes to performance, this thing gave my iPhone 25% in 30 minutes on average.
That's a good charge rate. The thing supports both PO and PPS charging protocols with above average stability and accuracy. And wired efficiency is also above average. But here's the red flag. The T2 efficiency for this product is 39% which is far below the 6% average. For long full wireless charges, it will become an issue.
But if you're only using the wireless portion for 10 20 minutes at a time, it's not going to make a big difference. This pack does have a max output of 27 watts, but in my testing, it only holds 27 watts for a couple minutes. So, they're not lying, but sort of they are. Another downside is the recharge time for this product is over 3 hours.
So, if you buy it, make sure it's always plugged in. When it comes to thermals, this thing runs cool when wired. Pretty hot for T2. But given its above average performance for wireless charging, that makes sense. Terms of cost and value, this thing's going to set you back about 70 bucks. So, average price, slightly above average overall performance, but premium build quality.
It's really the form factor that boostes this product by scoring. So, this is number four. Number three is one of the most efficient banks that I've tested, and it's also the first budget pick. Now, every single battery pack in this top five is a 10K millia hour battery pack.
Out of my collection of about 20 plus, there's only four or five that are 5K. If you're looking for a good 5K pack, I got you. Go with this MPHI product. This product has awesome wireless charging speeds, a substantial kickstand that can function partially as a grip. Like, this thing is so stable. This thing is number nine out of 20 plus.
If you want to know what the red flags are, make sure you check out that video. This is number three, a product from ESR. Like my number five pick, this thing has a uh smart display of sorts. tells you percentage left and whether it's chi charging or not. I've got an S25 and right now it's not uh G2 charging because if it was, it would actually show a G2 symbol.
Way to go, Samsung. Now, like my number five pick, this thing does come with a kickstand. Not as sturdy as number five, but it's not a tipping hazard like the other products I showed you. This thing gives you a bit of flexibility in terms of the viewing angles that you want with the product.
Now, the magnetic strength for this product is borderline unusable from my perspective. It should be way stronger, especially for a pack that's this thick given that there's a higher chance you're going to be holding the pack like this and the

iPhone's going to come off pretty easily. Really should have added some sort of rubberized back.
I think when it comes to performance, this thing gave my iPhone a charge of 27% in 30 minutes. Fast. T2 efficiency was at 89% which is the highest in my test. The first two times I thought it was a fluke. Then I did it three more times and yeah, no, this is just very efficient and that made me very suspicious. I'll I'll get into that.
When it comes to cons, wire charging for this product isn't great. The accuracy and stability is way below average and there's no PPS support. When it comes to thermals, this battery back runs so cool. That low temperature for wireless charging kind of matches the high efficiency number, so it makes me less skeptical of the 89% efficiency, but still a little skeptical.
In terms of value, this thing is 50 bucks. This is budget priced with well above G2 performance, but poor wire charging performance. So, if you only care about fast wireless, yeah, this product will suffice. But if you're looking for a hybrid charging solution, both wireless and wired, then pick the top two. All right, this was number three.
Number two is from a brand that I've never heard of before. Now, if you're planning on getting one of my products, use my links. I'm a reviewer, not an influencer. I do not care who you get because all I care is about getting finding out what the best accessories for our tech is. The majority of this channel is supported through affiliate links.
I don't do any sponsored posts or anything. This is number two. Have you heard of iWalk? I've never heard of Eyewalk. When it comes to design, I really like the shape of this product. It allows you to hold on to the battery pack easily, but that shape means nothing if the magnetic connection isn't strong. And this thing magnetically is super strong.
I got the white one, and it does a great job of hiding fingerprints. This thing does have a meter. It tells you percentage and if it's charging or discharging. This thing has a built-in cable, and the magnets are strong enough that you can do this. The cable's tucked in here, and it is removable. And yeah, you've got two USBC ports on this baby, which means you can charge three devices if you wanted to.
You're basically just topping them up because it's three device charging setup. It's like three people sharing 500 mls of water. They'll quench your thirst. Now, when it comes to performance, it was 21% in 30 minutes. Very, very average. But the voltage accuracy and stability for the wire charging was way above average. Excellent.
I would say max output and input for this product is 30 freaking watts. Which means this battery pack charges to full in 90 minutes. Fastest speed out of the 20 plus battery banks that I've tested. But T2 efficiency is at 54% which is way below average. The main reason why it's not number one. For thermals, this thing wasn't terrible.
It gets a little warm, but it's still manageable. If you want to know what the hottest products were, it was from this brand. This battery pack is going to set you back 50 big ones. Not big ones, just 50 bucks. It's a budget product. Solid wireless performance, decent wireless performance, extra features, and fast recharging.
Sure, the wireless charging is only average, but if this isn't charging your iPhone fast enough, just use the cable. You can still do this with it. Now, if you thought my second ranked product was the underdog, you're going to be surprised with number one.
Is this battery bank from Inu? I tested two other products uh for this video, and you got to make sure you get the P43 one, not the P73 one.
The P73, this thing looks way better than the uh P43, but performance-wise, it is absolutely terrible. This thing is like number, I think 18 out of 20 plus. Now, this battery bank has two ports, a C and an A. Has a built-in strap, but the neat thing is that this strap actually doubles as a cable. Has a fun battery light indicator.
It's actually kind of rubberized, the uh indicator. I'm assuming somebody at NU is a dog lover. And the magnetic strength for this product is topnotch. Like your phone's

not going to go anywhere. I'm a big fan of products with two ports, but a spare USBA port. Why? Terms of performance, this thing gave my iPhone on average uh 30% in 30 minutes. Sweet.
This thing also had the best wired performance in the group. Also had the best in terms of wired efficiency. Efficiency is one of the biggest factors I rank on. And for every 27 watt hours I got from this pack, it only took 37 to put back in. That's an efficient ratio of 75%. That is just But in terms of T2 wireless efficiency, this thing was around 60%, which is slightly below average.
When it came to thermals, wasn't really worried about anything. It was neat to see that the T2 uh temperatures were below average. All around, this thing is a decent product. At 50 bucks, it's below the $70 average, offers top tier wireless charging speeds, top tier wired performance speeds, and comes with a bunch of extra features. That's all I got for this video. Question, comments, leave them down there. Again, if you're planning on getting one of these products, make sure you use my links. I'm reviewing an influencer. Do not care which brand you go with. My channel is mostly supported by you guys. At the end of the day, all I care about is finding the best accessories for our tech.

NSY <> PETL - Bi Weekly Strategy Call - June 19
VIEW RECORDING - 32 mins (No highlights):
https://fathom.video/share/hB3z125qM7QxGLQHgnPYn1kWGvFKM7Wv

0:00 - Nativ Yanko
Chipotle is healthy though. Yeah, yeah, Chipotle is good.

0:03 - Rakesh Guduru (PETL)
But Chick-fil-A, the sandwich, I don't know if you ate spicy chicken sandwich, Grace. I got it like twice this week. It's like the best thing ever.

0:11 - grace oguntuase (NSY Digital)
It's so good. It's insane.

0:15 - Rakesh Guduru (PETL)
Yeah. I heard about that.

0:18 - Nativ Yanko
Is that the one that's not open on Sunday? Or was that a different one? Yes, that's the one. Yeah, that's the one.

0:23 - Rakesh Guduru (PETL)
Yeah. They don't open on Sunday.

0:26 - Nativ Yanko
Have you been to Nando's, Rakesh?

0:29 - Rakesh Guduru (PETL)
Which one? London? No. No, Nando's.

0:32 - Nativ Yanko
Nando's? What is that? Oh, Charley knows. Every time me and Charley leave, we go to Nando's in the evening. It's a burger place? No, it's like, do you know what

peri-peri chicken is? It's Caribbean. Peri chicken, yeah. Like jerk chicken? It's actually, it's not really. No, it's more like, I don't even know. I think it's like African or Portuguese. think it's Portuguese. Portuguese, I think. Yeah. I think we'd like it, Rakesh. If you like that, I love Indian food as well. There's a spot in London, I think I was telling you about it before, it's like Vishnu, not Vishnu, Dishoom. Dishoom, yeah. Dishoom. Yeah, that's so good.

1:20 - Charley McDonnell
Dishoom, wow.

1:21 - Rakesh Guduru (PETL)
I know London has some good Indian food, I heard about that.

1:26 - Nativ Yanko
There's a big Indian community in West London, but there's the best Indian food spots ever. I know, I heard London, there are no more native people over there, there everybody from outside. Yeah, that's the big argument in the UK. Yes, yes.

1:45 - Rakesh Guduru (PETL)
Alright, anyways, our nightmares started, our flag got sold out more than we imagined, usually natural and black. They're always kind of hand in hand. think, whatever reason, last 30 days. We sold 200% more black than natural. Why? I think it's because of the Father's Day, the commercial, whatever. I think because Father's Day, black is so neutral, so it's very easy to gift. That's my assumption. So we sold last 30 days almost, I think, 8,000 black, something like that. It's a massive number. So that kind of made a lot of issues. So I think, Charley, my biggest concern is now I set black to a pre-order, and a landing page is black. We might see some impact on conversion. Yeah, I think it will drop a little bit.

2:48 - Charley McDonnell
I think on the reason why it's sold out so much, I think we're using it in a lot of ads as well, which naturally when people see the color on an ad, they want to buy that color, which, so I think maybe... Maybe for like the next few creative, but then how soon we're going to get the next ones through, but maybe we could focus on some different colors. But the good news is at least Petal Plus is sort of coming in place of it. We don't know what the performance of that is going to be like yet, but hopefully that can sort of, you know, offset the last single version right there.

3:19 - Rakesh Guduru (PETL)
Yeah, that's what I'm hoping, but I don't know, you know, because it's three weeks away from shipping. So if it's ready to ship, I agree, but it's three, it's already took like second position today in sales, Petal Plus, but that's just relaunched it. So I don't know how all that's going to impact. So I, and we are not getting until the end of the month, Petal Black. So it's a lot, let's see how the whole thing works out. I'm a little bit nervous. Yeah. Cause I think it is to do.

4:00 - Nativ Yanko
With it being in the ads, but I also think it is to do with... the popular color. Yeah, it's just like, I would get black. I'm very boring. Everything for me is like black or white.

4:10 - Rakesh Guduru (PETL)
Yeah, it's very neutral color and it's the highest mode. That's why I think whatever it's coming, I can show you our stock, what's coming. I can present in here. Hold on. Sometimes Safari doesn't let me present. I need to switch the browser. So, yeah, so I

hope this, this, what kind of experience you have in the stock out situation and pre-orders. I know every product is different, but I don't know. To be honest, ideally we would never be, like I saw a post recently.

4:55 - Nativ Yanko
It's like media buyers are new, like stock. Managers, where it's like agencies can just like scale spend, but if they don't manage stock, there's a lot of negative effects. get effects, the momentum, cetera. Yeah. So, Charley, what do we usually do when a brand gets, like, for example, when Mirai was, it wasn't. Yeah, I mean, there's two ways you can really go about it.

5:20 - Charley McDonnell
suppose you can either set it to pre-order, which is what you've done. But with that, the risk is you're sort of, like, constantly chasing your tail in that sense where it might sell out of the next stock that's coming in and you're constantly just trying to, like, catch up, which is tricky. Or you can set it to just, like, not available, which, again, that's probably going to impact conversion rate as well. I think you're on mute, Rakesh. See my screen, right?

5:52 - Rakesh Guduru (PETL)
So this is our inventory software, right? For example, here, if you see the black. So this is what's going to happen. So whenever we are getting black, so next lot is coming, ready to ship on July 6th, almost 6,000 units. But by July 11th will be our stock, but that's okay because we can still take pre-orders and we are pumping up, right? And the next stock is coming on 26th and 31st. But in this range, Petal Plus will be ready to ship and in stock. So that's why we kind of gave this gap because it might take sales from the black.

6:38 - Charley McDonnell
But if you see how it's inventory, how it gets and built over time.

6:42 - Rakesh Guduru (PETL)
So I think we should be okay. It's just this 10 days somehow if we manage, the situation is going to get because we are almost getting 6,000 units, which is kind of quite a lot. I have the same story for other colors. As well. So this is how everything goes on. But there's no way we can pass it. We have to take pre-orders. Otherwise, it's going to tank. Our conversion went from almost 7% to like 3% today. How long was the pre-order time, basically? So right now we are saying we'll take pre-order on black, but we'll ship on 6th, 6th of July.

7:32 - Nativ Yanko
Oh, wow. And they know that? Yeah, they know that.

7:37 - Rakesh Guduru (PETL)
If you go to our website, it shows when it ships. Okay, that's quite long.

7:43 - Nativ Yanko
Yeah, it's all long. me see the status of the other products. Okay, so I'll show you.

7:51 - Rakesh Guduru (PETL)
I'll show you easiest ways to seem all sense. You want to see today or what do you want to see? No, and let's say last 30.

8:05 - Nativ Yanko
So see, last 30, if you see, highest is black.

8:10 - Rakesh Guduru (PETL)
It's like we sold so much black, it was ridiculous, right? It's putting the data together. Yeah, we can't...

8:20 - Nativ Yanko
Can you share this analytics? For some reason, I lost the link. Okay, it's... It should be pinned in the Slack, think.

8:27 - Charley McDonnell
Yeah. It's analytics.parel.com.

8:30 - Rakesh Guduru (PETL)
So it's almost a building. Okay. Yeah, okay. So we're here.

8:36 - Charley McDonnell
So let me minimize this.

8:39 - Rakesh Guduru (PETL)
So if you see, so black, you see, we sold in last 30 days compared to the previous last 30 days, 148%. So that was a lot, 6,000 units, and the next was natural, 3,000. So still...-hmm. Mm Mm-hmm. How has natural increased as the black got out of stock?

9:05 - Nativ Yanko
Yeah, black just increased a lot.

9:07 - Rakesh Guduru (PETL)
Then we had added two more colors this week as for pre-orders, gold and blush, which is kind of already taking some spot in sales. But this is what caused all the problem. Black's being almost sold twice as much as natural. So now we have quite a lot of magic.

9:32 - Nativ Yanko
What's your strategy around building demand for black? Building the? Demand. So I read a book once. It's like when something is out of stock, let everyone know. Because people want what's scarce. So I would say put it on email. We are out of stock. We're going to be back in stock. It's selling like hotcakes, something like that. This is what I. Put it over here.

10:00 - Rakesh Guduru (PETL)
Demand keeps selling us out seven times. Put it on Instagram organic as well and put it on your email.

10:07 - Nativ Yanko
Let people know about it.

10:08 - Rakesh Guduru (PETL)
I think that's a very good idea. And also we are also putting over here, sold out seven times, order before it's gone, you see. So we have over here.

10:18 - Nativ Yanko
have, have you, if you scroll down, do you have, maybe this is like, it goes against itself, but do you have like a stock counter? Have you tested that before? No, we haven't tested that.

10:36 - Rakesh Guduru (PETL)
Yeah, we can test that one. Yeah. Yeah. Are you against that? No, I'm not against it. We can surely test it. Hmm.

10:45 - Nativ Yanko
But yeah, again, it could, could go against us if the stock is very high. Maybe not. Manipulated. That doesn't have to be a real number.

10:58 - Rakesh Guduru (PETL)
Yeah. Okay. . . . I personally think that would be a good test. Yeah, yeah, okay, let me write it down.

11:05 - Nativ Yanko
I was creating that sense of like everyone wants this, this is like the new thing on the market. We have some ads running out seven times sold out. I don't know if you know that. Oh, okay, you've launched them, that's good.

11:19 - Rakesh Guduru (PETL)
Yeah, we did that. Yeah, and that's what that is. And I know I want Grace to look at the rest, but I could, Grace, you're going to give me the 14 days breakout. So for example, this one is a very nice way to look at our 14 day sales, which ad is generating how much percentage of revenue. For example, this NSY PETL 29H4 is almost generating 37% of revenue and last 14 days it's up by 20%. And Claire, all charter somehow came back again. It's staying at number two. And in last 14 days, it's almost doubled in revenue. And these two are going down. And CDL, this came back up. So this is actually a very good way to look at it, how the revenue is coming in quickly. You know, I don't know how you guys do this, but I think this is the fastest and easiest way to do it.

12:35 - grace oguntuase (NSY Digital)
Yeah, we have something similar called Adnova that pretty much shows us the similar data like this, which is also really helpful. Okay. Okay, great.

12:45 - Rakesh Guduru (PETL)
Okay, let me give this to you, Grace. Okay, go ahead. You want me to walk you through your strategies? Okay. I know the street interview preview I saw. I don't know if you saw, Nettie, that came out so good. was one video which was completed and it came out. one that we made?

13:04 - Nativ Yanko
Yeah, or you guys made. Okay, do you want to share that? It was so good.

13:11 - Rakesh Guduru (PETL)
It didn't publish it because there's only one. think they're working on more.

13:16 - grace oguntuase (NSY Digital)
Yeah, we only had one hook variation for that one. I think that was my mistake in the brief. I wasn't that clear to the street interviewer on some of the instructions. So he only ended up filming like one of the hook variations. So what I was thinking is that we could do another street interview, maybe find another street interviewer. And I could like work on improving the brief so that it's more clear next time. But I think that the variation that we had, let me just find it. I think the variation. It could be like a text overlay though, hook variations on the same clip.

13:54 - Nativ Yanko

Yeah, actually, that's a good idea. We could do that.

13:55 - grace oguntuase (NSY Digital)
Let me just pull up the street interview so that we can... it. Just watch it. Because I think it was really good. The street interviewer did a very good job. Yeah, it came out so good.

14:06 - Rakesh Guduru (PETL)
I think we have to do more of those grays. Yeah. I mean, even the same creator. I don't mind. It could be the same creator with different angles. Yeah, we could use the same creator.

14:19 - grace oguntuase (NSY Digital)
We'll see if he's available again. Who is that? Jared? No, I think his name is Ryder. It's a street interviewer that Aliana found. Okay, nice.

14:31 - Nativ Yanko
We haven't posted this, by the way. What percentage is your phone at? Hello? Yeah, I think it froze. Oh, yeah, sorry.

14:47 - grace oguntuase (NSY Digital)
froze. Can you guys hear? What percentage is your phone at right now? 17.

14:51 - Charley McDonnell
17. 9%. Do you have a portable charger with you? You don't? How are you going to charge your phone? Have you ever seen one of these? What is that? It's called a pedal. Can I just put it on like that? Let's find out. Oh, hell yeah. Oh, there it goes. Look, and it stays on. it's charging. Check it out. So could you believe that 10 hours of battery life lives in that tiny little thing? Couldn't believe it.

15:12 - Rakesh Guduru (PETL)
How much do you think that costs? Assuming over $100. Yeah, it's about $50. $50. Yeah. And if you buy two right now, it's 20% off. And if you buy five, it's 30% off at pedal.com. Pedal.com. Go buy it. It's very good. Very, very good. I think it's very engaging. I think it's very covered upon it. It was not in the, it was not in for me to review. So that's why I didn't review it. Change my status. It was still in the editor stuff.

15:46 - Nativ Yanko
Was it? Wait, let me see.

15:50 - grace oguntuase (NSY Digital)
It's client reviewing. It's client reviewing. So if you're able to, you can change the status.

16:00 - Rakesh Guduru (PETL)
Can we see the hook again quickly?

16:02 - Nativ Yanko
Yeah. What percentage is your phone at right now? 17. 17? 9%. Do you have a portable charger with think of like a big text headline that we could do. Like, does your phone always run out of charge? Or like, how many Americans have a crappy phone charge? Like, something like that. I think we can be creative with it. But it's an easy way to squeeze the juice out of it. No pun intended. Like, and then we can see different product. Like, we can do it with different creators if it performs really.

I think this will perform very well. It's different. Yeah. We should do this. Oh, maybe I'll give it to, we should do this for like all of our brands. This is cool. This works really well, I think. We need to see what the numbers look like. Yeah. If we try this one, we'll test the version.

16:54 - grace oguntuase (NSY Digital)
And then if it works well, we'll see if we can work with another street interviewer. I'm. I'm. I'm. He just sent, like, these raw clips.

17:02 - Nativ Yanko
were no other raw clips that he sent. He sent a few others, but a lot of it was kind of just, like, fluff, if that makes sense.

17:09 - grace oguntuase (NSY Digital)
Like, I don't really think a lot of it was usable. Yeah, yeah. Okay.

17:14 - Nativ Yanko
Yeah. Our editors made it flow very nicely. Yeah. They definitely did a lot of work for this.

17:24 - grace oguntuase (NSY Digital)
Yeah, it came out so, it's so engaging.

17:27 - Nativ Yanko
It's insane. Yeah. So we're good to launch this, Rakesh? Yeah, just approved, Charley, can go.

17:35 - Rakesh Guduru (PETL)
And there are a few more for PETA+, Charley, ads I sent this morning. Oh, they're already live. Yeah, yeah.

17:42 - Charley McDonnell
They're all live. I'll get to it live after this call now. then, yeah. Beautiful. Beautiful. let you know.

17:51 - Nativ Yanko
So, yeah. are really good.

17:53 - Rakesh Guduru (PETL)
I, I, I, I, I'm, yeah. Let's see how this, my, my B is. It's. It might be on fire.

18:01 - Nativ Yanko
Let's see. Yeah. What else is working in the economy right now? I saw PETL 45 had like a 200% increase in spend share as well. PETL 29 is still doing well. Yeah, that's still the main driver. That's doing big numbers. 100k rev, wow. Yeah. That's amazing. And what's that time on that last 14 days?

18:33 - grace oguntuase (NSY Digital)
Yeah, last 14 days. Last 14, 100k in revenue, wow.

18:38 - Nativ Yanko
I can't see it as well. Yeah, that's insane. That's a top, top ad. 5% click-through rate.

18:45 - Rakesh Guduru (PETL)

That's going bananas, yeah. Can we view that one again? I want to just see if we can brainstorm.

18:52 - Nativ Yanko
might die, Nativ.

18:54 - Rakesh Guduru (PETL)
This ad might die because it's kind of focusing on Father's Day. Okay. Yeah, I think the good thing...

19:00 - grace oguntuase (NSY Digital)
Now that we know that these seasonal angles work, we can test them for other holidays, like Black Friday as well.

19:08 - Nativ Yanko
Black Friday is going to be insane for you, Rakesh. Just make sure you're in stock, though, because we want to scale you in Black Friday, because this is like a perfect, perfect, perfect stock of truth.

19:23 - Rakesh Guduru (PETL)
Also, Grace, we have to do something for 4th of July. I don't know. There's no way. There's no time. Another thing is for seasonal things, Nativ, I don't... To invest in ads on the seasonal, it's so challenging, right? The ad might lose its velocity once the event is gone. I don't know what we're going to do with this ad.

19:48 - Nativ Yanko
But I think, I think, like an ad, that, like, we create evergreen ads and we create seasonal ads just because we are scared that it's going to drop off. doesn't mean we shouldn't make it, if that makes sense. We just have to prepare so that we're not fully reliant on it, and we're actually making other evergreen ads. However, like 2.11 ROAS at 102k rev, I think we should definitely lean into it. But just like diversify evergreen versus seasonal, and not just go fully in and seasonal. Because when the season's done, we don't want to be like, neffed our pants down. Right, right.

20:26 - Rakesh Guduru (PETL)
Makes total sense. Cool.

20:29 - Nativ Yanko
So, 4th of July, yeah, if we can watch it, maybe I want to see if we can make it evergreen somehow. The Father's Day gift I have given every man in my life. It's under $50, and he will use it every single day. My husband is the hardest person in the world to shop for. He doesn't want golf clubs, he doesn't want another tie. He says he doesn't want anything. Last Father's Day, I got him a pedal. And I am telling you, hands down, it is the best gift I've given him in 20 years. It's the The world's first circular MagSafe power bank that charges your iPhone, your Apple Watch, and your AirPods.

21:06 - grace oguntuase (NSY Digital)
Just snap it on the back of your device and it starts wireless charging instantly. Here's why I knew he'd love it. My husband's phone dies constantly. He's always asking me to borrow my charger and he forgets to plug his in at night. He leaves the house with it at 40% almost every day. Now, Petal lives in his car and when his phone dies, he just pulls it out and snaps it on. No cables, no outlets. It has 3,000 mAh, so it charges up to 10 hours. And it charges his Apple Watch too, which he used to take off and leave charging on the kitchen counter for hours. It's also tiny, just

larger than a golf ball, and made from machine aluminum, so it feels premium. He always hated carrying around plastic bulky power banks. He loves how sleek and small Petal is.

21:48 - Nativ Yanko
 Fits in his pocket or his wallet. He told me this was the best gift I've ever given him. My husband has never said that about anything. And honestly, I liked it so much, I ordered the lavender color for myself. It's $49. But you can get up to 20% off and free shipping when you order two or more. Trust me, it's the gift he will love. Very, very good ad. I would say, if you go to the hook, quickly, there's two or three places that they say Father's Day. I would just say birthday. Best birthday gift that actually gets used and just change the voiceover. So the good thing with this is she's not speaking to the camera. So we can just change the voiceover, change the overlay. And now we've got a bit more of an evergreen ad. If we want to just do a direct iteration. then if you play a bit more, I think they say Father's Day one more time. Father's Day gift I have given every man in my life. It's under $50 and he will use it every single day. My husband is the hardest person in the world to shop for. He doesn't want golf clubs. He doesn't want another tie. He says he doesn't want anything. Last Father's Day, I got him a pedal. So you could say his Last birthday or like his birthday that just came up and the good thing again it's not her speaking to the camera so what an easy another easy iteration like have we done like different POVs so like wife to husband to the wife uh the parent for the child like the teenage child we've mostly just tried the wife gifting to husband angle i think back to school is so big grace right in august everybody's child children goes to school maybe we should do like a parents to the kids angle yeah that's a good idea do you know a big one could be this might be a bit of a stretch but like i'll just tell you a very short story basically when i was 14 15 i went to london to meet my friends and my phone ran out of battery and i was supposed to get home at like 3 p.m i got home at like 12 in the night And my mom called the police, she was crying like someone just died, my whole family were crying, and it's because my phone ran out of battery. So I don't know if we have to be that extreme, but that is an angle where it's like, make sure your kid has their phone for their safety. Might be a bit of a stretch, but it's a whole new angle we haven't tested yet.

24:21 - Rakesh Guduru (PETL)
 Yes, I think we should test that for sure, 100%. Yeah, me too.

24:25 - Nativ Yanko
 Parents to kids, yes. Parents to kids, I would say husband to wife. Yes. When is Mother's Day? I think Mother's Day is finished, right? was like in March. It's passed. We kind of missed that board.

24:39 - Rakesh Guduru (PETL)
 We haven't focused anything. Yeah, March 7th.

24:44 - Nativ Yanko
 I'll be like gifting times in USA dates. It's the people, yeah, people don't really give gifts in, on a... Yeah, are a lot of sales. It's very big for sales.

25:05 - Rakesh Guduru (PETL)
 But we are doing bundles. It says here, Valentine's Day, no.

25:11 - Nativ Yanko
 Easter Sunday, no. Mother's Day, no. Father's Day, done. Christmas and ages. Employee Appreciation Day, first Friday in March. No. Admin Professionals Day. Teacher

Appreciation Week, first week in May. Birthdays, baby showers, weddings, graduations, giving Tuesday, following Thanksgiving. Yeah, so we don't really have anything close. I would just say birthdays. Birthdays is a good one. Birthdays, back to school. Back to school is big. Back to school is beginning of September in the UK. don't know. I think it's the same.

25:49 - Rakesh Guduru (PETL)
Yeah, it's in August, but they kind of start from now, you know. Now they start buying back to school. Yeah, remember, that's what we did for Father's Day. Father's Day, me. We're doing almost two months before. That's why we have so many sales. And you would say, how would you position it as back to school? Like, hey, your kid's going to go back to school again, make sure their phone is fully charged. They always forget to charge, something like that. Always have a pedal in their back or something, some angle like that. Yeah, throw away or something like that.

26:29 - Nativ Yanko
Yes. Throw away from your child.

26:31 - Rakesh Guduru (PETL)
Yeah, put a pedal in their bag, you know, so they have an extra battery in case of an emergency. They can always use this. This is the best thing, a life changing for kids, something like that. Once it's in the bag, the phone never runs out. gives you peace of mind almost. Like if you have it in their bag, you have peace of mind.

26:51 - Nativ Yanko
You're able to reach them. Yeah. Have we ever made an ad like bottom of funnel explaining why it's called PETL? No, we never.

26:59 - Rakesh Guduru (PETL)
So.

27:00 - Nativ Yanko
So I remember you told me that, Rakesh, it's like a petal shape, and you want the whole family to have it. And when you put it together, it looks like a petal. Yes, yeah. I think we could potentially do like a third-person story of Rakesh, where the founder started this, here is the reason why, it's called Petal, blah, blah, blah. Because I remember you told me this, Rakesh, how you started it, and was quite interesting. But then you mentioned you, you're not really...

27:29 - Rakesh Guduru (PETL)
I to Disney World, and my phone died, so I went to the vending machine to buy a battery, and it was like . For $50, it was so terrible. Yeah. With the wires and everything. So that's when I was like, hey, I could do better. So that's why. Yeah, I was literally in Marbella.

27:48 - Nativ Yanko
They charge in like 20 euros for one hour of like a charger, and then you have to give it back after an hour. So it's a smart market, to be honest.

28:00 - Rakesh Guduru (PETL)
Yeah, and the company, the vending machine company with batteries, they were doing 50 million in revenue. I thought like this cat is with this. Yeah, crazy.

28:11 - Nativ Yanko

Like you just, there's just a need and you just, there's demand and you're solving that demand. Yes. Cool. I have to jump in one minute. But I think, yeah, easy next steps for us are like, we'll get all of these ads launched. Yeah. We kind of have to hold out a little bit on spend because of stock, unfortunately. But in the meantime, we can just start really building up our like repertoire of creative. So that when we are fully back, even before, we can start pushing.

28:47 - Rakesh Guduru (PETL)
Yeah, for example, from the last week of June itself, Charley, because the shipping date is so close. Yeah, we can just increase spend.

28:56 - Charley McDonnell
Yeah. Head of plus B coming into star.

28:59 - Rakesh Guduru (PETL)
We have a lot. We have on stand, which is coming in, over 50,000 units we have, which is coming in, right? We are still ordering. Every week at this point, we are placing over 10,000 units in order. By the time they come, it takes a while, that's why. We are buying a lot of inventory. There's over 50,000 units coming in. Next week, the two blush and gold are coming in. So the pre-orders on those are going to go away because it will be ready to ship. That increases our conversion, too. So all that is happening. So I know this 10 days, it kind of went out of stock. I thought this month's going to be crazy because we already did almost like 350. Crazy, yeah.

29:51 - Nativ Yanko
So it was on track for 620 this month.

29:55 - Rakesh Guduru (PETL)
But I don't know, being this out of stock, I don't know how it will affect. Let's see.

30:01 - Nativ Yanko
Okay, cool. Makes sense. Charley, any last points from you, or Grace, any last points from you?

30:10 - grace oguntuase (NSY Digital)
I have one question related to the creators. So the new, the blush and the gold colors are out. So would you like us to ship them the colors? Yeah, we can ship them after 26 because I will have them in hand so we can ship them.

30:25 - Rakesh Guduru (PETL)
Yeah, definitely we should do it. Right. Okay, great. That's it. And also I'm introducing another color end of this month. It's called Sage. It's light green color. Oh, nice. So we will do that too. Yeah, so that more colors and combinations are coming in. So hopefully that's so blacked down.

30:48 - Nativ Yanko
Okay. And when the Petal Plus comes, I may need to try it out. Yeah, man. I'll make some new ads maybe in return. Yes, I'll check you guys.

31:00 - Rakesh Guduru (PETL)
Or to Charley as well. Yeah, yeah. All right.

31:05 - Nativ Yanko

That was good. Really good chatting and we'll talk to you soon. Have a good one. you, Pesh. Bye. Bye. Pesh. Bye.

NSY <> PETL - Bi Weekly Strategy Call - July 15
VIEW RECORDING - 58 mins (No highlights):
https://fathom.video/share/3Xsi518GuTfMeY26sDgGvtejb5DpgDBv

0:00 - Charley McDonnell
Could be a messy one.

0:02 - Nativ Yanko
Some of our calls might be written off tomorrow.

0:04 - Charley McDonnell
No, I'll probably be in local call. Hello, I'm Grace. Mrs Morocco over here.

0:11 - Nativ Yanko
How have you been? Yeah, good. You're more Moroccan than me now. I literally, I don't know why I haven't been. All my family are there. Well, some of my family. Where in Morocco?

0:22 - grace oguntuase (NSY Digital)
Oh, we were just in Marrakesh. Nice.

0:26 - Nativ Yanko
That's not the capital, right? The capital is Red Bat, I think. I think the capital is Agadir, actually.

0:34 - Charley McDonnell
Yeah.

0:37 - Nativ Yanko
Capital. I don't know, it's Red Bat. Oh, is it? Oh, okay. That's when I think my grandparents were born. Oh, wow.

0:52 - grace oguntuase (NSY Digital)
I don't know, Charley, you saw the camels.

0:57 - Nativ Yanko
camels? Yeah, she was riding some camels. I said them just to you, actually. Oh, okay. I was to say, I did not see that. It's just like Jonathan's haircut. The second one. mean, I'll send it to you, Charley. He's got the same trim as my brother, no? The camel.

1:21 - grace oguntuase (NSY Digital)
Yeah. The little, the messy fringe.

1:26 - Nativ Yanko
Oh, no. Is that, is his head? Oh, his head's looking that way, no. I'm going to know, that looks quite dodgy. First dance.

1:34 - Charley McDonnell

Bye. I've just got a rude mind. You've just got to see that. I don't know. I can't see it. I don't know. Nope.

1:43 - Nativ Yanko
Let me see the other ones. Got a little mullet going on.

1:47 - Charley McDonnell
Yeah, that's what I'm saying. Billy Ray Cyrus. You have a mullet, Yeah, I can't deal with it when it's too long, though, so I'll just keep getting it shorter. I think that's the longest I can have. Are you going to that as well? oil world that Thank Not a minute, but just a bit of a a My hair's curly. My hair's curly, so people always tell me that just grow the back out a little bit.

2:09 - Nativ Yanko
We'll see. We'll see. I think he's done the thing again where he thinks it's in half an hour. We'll give it one more minute, then we'll just jump off. We've got the OG team back now. We've got Sanj back. We've got five. I think I told you, we brought Izzy on full-time. as well. I just signed another client like 10 minutes ago. They spend like a million a month on Meta. Spend. They sell like art. It's this company right here. DIY Art Club.

3:01 - grace oguntuase (NSY Digital)
This brand.

3:03 - Nativ Yanko
I don't know how they're scaling so much, but here's what it is. That's quite nice to have.

3:15 - Charley McDonnell
Yeah. This paint? Yeah.

3:18 - Nativ Yanko
Yeah. It's paint? I don't even know what it is.

3:22 - Charley McDonnell
I don't know what it is.

3:25 - Nativ Yanko
It's prints.

3:27 - Charley McDonnell
Exactly. just referred me. was like, send me your offer.

3:30 - Nativ Yanko
Send him the offer. He's like, yes. I was like, okay. Usually I have to do like a full proposal. I spend like the whole weekend auditing the account. It's easy. I'm going to give this one to Sanj because we have like 70 statics. But with our new software, I'm going to get the founders of this software that I have to walk us as a creative team through it. So we can start making like 50 statics a day automatically sent to our Slack channel. And then we can just talk to Slack. We want change, and it will come back to us, come back to the Slack channel. Statics are so easy to make, though. Yeah.

4:08 - Charley McDonnell
And it costs us almost nothing.

4:11 - Nativ Yanko
Even I can do it. You know your stuff. No.

4:17 - Charley McDonnell
Actually, I was just reading that book, to be fair. I nearly finished it. The one, Influence, or the short one? No, this one, the Breakthrough of the Poison. You've read that, right, Grace? Do you remember I sent you the digital version when we just started?

4:34 - Nativ Yanko
Yeah. I read, like, I think I got, like, halfway through.

4:37 - grace oguntuase (NSY Digital)
I actually need to pick it up again, because there's so many nuggets in it, actually. Yeah.

4:44 - Nativ Yanko
Like, I've literally interviewed, no exaggeration, 25 strategists in the past three weeks. And the amount that I don't know about sophistication levels, market, like, market awareness, like, Well, I think you do great, I agree. You've got the nice creative side, but you also understand direct response. Whereas I meet a lot of, they're always like these fashionable girlies, people like your kind of persona, these young, cool, fashionable girlies, they understand this organic marketing, but they don't know how to turn it into ads. And I think you having that background of UGC plus understanding the breakthrough advertising stuff, it's like that perfect connection. And to be honest, I think the other strategists, they're like the other way, they're very good at that response, but maybe you need to teach them more how to be creative, like make the ads look pretty. So maybe, I think there's like a good dynamic there of like, we have people's strengths and weaknesses, and that you can learn from each other. Yeah. Especially with Sanj back now, which is great. But anyway, let's... Has he messaged anything? I'll message him, I don't know if he's joined.

6:06 - Charley McDonnell
Cool. Let's jump off. I have a call. Oh, he just said, yeah.

6:13 - Nativ Yanko
Yeah, okay. Let's just wait for him then.

6:25 - Charley McDonnell
Wait, you're watching the game, Nativ? In a pub literally 20 seconds from my house.

6:33 - Nativ Yanko
So it's going to be good with all the people here. You're on mute, Rakesh. You're muted. Okay, okay.

6:49 - Charley McDonnell
How's it going?

6:50 - Nativ Yanko
Good. How are you? How are you guys? Good to see you. You always bring great energy to the course. I like it. I like your office setting.

7:02 - Rakesh Guduru (PETL)

Yeah, I'm in a little co-working spot.

7:05 - Nativ Yanko
I think I told you I moved to London, right? So it's just too hot to stay at home. So I need to be quiet. The AC is, I don't think I'm going to get it fixed. I think I'm just going to have to live through it. I've got, this is very niche, but I've got a fan that is on the bed and it's on my face. So I wake up with a super dry face because if I don't do that, I'm just going to sweat. But it is what it is. Are you watching the game later, England?

7:38 - Rakesh Guduru (PETL)
No, unfortunately, it has a via time at 3, you know, it's. Yeah, it's the middle of the world. Yeah, it's for the world, you know, they want everybody to see, not just Americans. But that's what time for you guys? It's like 7, 8 p.m.

7:55 - Nativ Yanko
8 p.m. It's in five hours. That's perfect. Who are you vouching for? What do you think? We're English over here. Spain? Charley's shirt. Show the badge on.

8:14 - Rakesh Guduru (PETL)
Oh, that's Argentina, the old... No, it's England.

8:19 - Charley McDonnell
Oh, that's England? You don't know we're from England?

8:22 - Rakesh Guduru (PETL)
I know you're from England, but I don't know if England is a good team, better team than Argentina. We'll see today.

8:31 - Charley McDonnell
We'll see today. Damn.

8:35 - Nativ Yanko
You don't want England to win?

8:37 - Rakesh Guduru (PETL)
No, no. I mean, they played good, but I don't know if they're so good. Argentina is a . We'll see. Four years ago, but we'll see.

8:47 - Nativ Yanko
I don't want Messi. I want Messi to stay quiet today. Yes, yes. But they played a very good game last game. Argentina.

8:57 - Rakesh Guduru (PETL)
Oh, England played so... So... ... Good. Yeah. Against Norway.

9:02 - Nativ Yanko
Yeah, against Norway. Yeah. Yeah. It was a fun time here in England because it was like Saturday night. So Charley was going crazy. Yeah.

9:15 - Rakesh Guduru (PETL)
Cool. All right, guys. Let's jump in.

9:19 - Nativ Yanko
back.

9:19 - Rakesh Guduru (PETL)
Looks like Charley things are working. So let's have.

9:25 - Charley McDonnell
Let me show my screen. We can get through it all. Okay. So let's first grace Gail. So I know she has a bunch of creative stuff for us.

9:37 - Rakesh Guduru (PETL)
Then I think we can get into our performance. Yeah. Great. Great. Sounds good. Yeah.

9:43 - Charley McDonnell
So I was actually on holiday over the past week.

9:44 - grace oguntuase (NSY Digital)
So I haven't really been working on briefs, but I started a few today. So I can just share my screen to just, if it loads, yeah, I'll just showcase what we've been working on. Let see. Let me log into NSY Dashboard as well.

10:06 - Rakesh Guduru (PETL)
Do you me to share? I'll share my screen, Grace.

10:09 - Nativ Yanko
Yeah, I don't think it's happening. Cool. I've got mine here. Yeah, let's just give an update on where we're... We've got a lot of ads launched, which is great. Yeah, pretty much all four rounds are completed.

10:22 - grace oguntuase (NSY Digital)
Oh, wow. Yeah, we've been efficient. Super, like, efficient.

10:25 - Nativ Yanko
It's nice. Yeah.

10:27 - grace oguntuase (NSY Digital)
So we're just moving on to five now. So I've worked on three, just, like, working on some new static ads for the PETL Plus, and then the two new colors as well, the Blush and the Sahara Gold colors. So those, I think, these will come out pretty nicely. So this one's more of a, like, family-oriented angle. Then this one's, like, more of a gifting angle for the Blush and the Sahara. And then the last one is actually, it's... Let me close. Sorry? Okay, go ahead. Okay, yeah. And then the last one is like an idea that we've actually seen work for another one of our clients, Gaudens. So we thought that since you're introducing two new colors and of course the PETL+, that'll be interesting to try and see if this will work for you guys as well. Let me just try to pull it up actually. I have the static there to show you what it looks like. Just need to wait for it to load.

11:35 - Nativ Yanko
Yeah, one, this one has spent how much, Charley? Like 200k, 300k? Yeah, it's like the top step.

11:42 - Charley McDonnell
Probably more, to be honest. Probably like 500k, no, maybe like 400k to spend on just one ad.

11:51 - Nativ Yanko

It's mental.

11:52 - Charley McDonnell
It just keeps working. I don't know, I honestly don't know why. I think it's just... I think Meta's just found the perfect audience.

12:00 - grace oguntuase (NSY Digital)
Yeah, so it's this like layout here, it says like you asked, we delivered, it's like static, yeah, yeah, something like that, yeah, do you what we can do here, sorry to cut you off Grace, actually carry on, I'll say at the end, yeah, was just going to say, write it down, don't forget, where it's like the common bubbles, people are like asking for a larger size, or they're asking for like gold colors, and you know, yeah, and then we can have like subheadings, or like where we're introducing the new colors, and the new sizing as well, and saying that it has more capacity, I think these will work well.

12:47 - Nativ Yanko
Yep, so like piggybacking off what Grace is saying, what, because I made this one like two years ago, when I was still doing a lot of the creative strategy, and we did this with All the different colours. So if you just scroll up a little bit, Grace. This one, we did it grey. And the beauty here is we can just keep rinsing this when we release new colours or something new. It's like a great add for new drops. So we just released this limited edition gold colour, the Sahara colour, kind of what Grace was saying all along. And try to find potentially corresponding reviews on that. Or maybe manufacture them if you want to be a bit cheeky. Like, oh, this would look great in gold. And then it's like, you asked for gold, we delivered gold. Or like, even back in stock. Like, when is it back in Even packaging. Packaging, Grace. They asked for better packaging.

13:42 - Rakesh Guduru (PETL)
Now it ships in amazing packaging. Yeah. So, yeah. yeah.

13:47 - Nativ Yanko
We can basically, like, if anyone's asking for anything, just rinse this format and just try to find corresponding reviews. And then just visually show the new petal colour for the new package. Or if someone's asked about the, this would be amazing for the new size. Oh, like, I wish you had a bigger one. This is so good. You asked, we delivered. Yeah. So I always iterate on this. So I think this is a great idea, Grace. Yeah.

14:18 - grace oguntuase (NSY Digital)
One other idea before I hand it back to you, Grace, is I'm thinking of an iterative.

14:23 - Nativ Yanko
So, like, let me get the ad account up. I was thinking of all of Jared's ones that have smashed it. I think we can do that with a woman, essentially a younger, more energetic woman at all. I don't know what you think about that, Grace and Charley. Yeah.

14:45 - grace oguntuase (NSY Digital)
I think that we could, yeah, definitely do some with a woman instead, because we've seen the woman angle or, like, you know, a female creator does work from the Father's Day, the Father's Day ad that did pretty well recently. Do think the audience does resonate with women as well?

15:03 - Nativ Yanko
Yeah, I even think, usually we work with like older, more mature women in our ads, but I think like a young, cool, energetic one. Like Claire, Nativ, like Claire. Like Claire, like Claire. I literally just doing the exact same thing. What's the best MagSafe power bank you can buy in 2026? I tested every top selling one. Here are my top. You know what? I would even do like an iteration of this. don't know how good it would be. It just came to my mind now. Like an AI concept. So someone's typing in into ChatGBT, what is the best thing? And it like shows PETL or something like that. So it's a small iteration. I don't know how well it will perform, but yeah, changing this to ChatGBT, potentially changing it to Claude, and then changing this guy to a younger, energetic woman. Maybe we change it to like a Mexican person, a Mexican man or woman, changing up the demographics. Well, if you need say. Thank different pockets of the audience. So yeah, that, that was my idea. And we can even do it for this one as well. Yeah. Same, same idea. Most people don't realize Apple discontinued their MagSafe battery pack and that the third party replaced.

16:18 - Charley McDonnell
And I think we can just.

16:20 - Nativ Yanko
Sorry for that.

16:21 - grace oguntuase (NSY Digital)
I think we have actually gotten a female to do it. Yeah. I think that they've already filmed it. I think it's just in editing right now. Okay. Nice.

16:30 - Nativ Yanko
Great job. Yeah. That's right. Amy.

16:34 - Rakesh Guduru (PETL)
Yeah. Um, I think it was a different creator.

16:38 - grace oguntuase (NSY Digital)
I'm not sure. Let me. It says it's launched today because there's nothing in editing.

16:43 - Nativ Yanko
True. Actually.

16:44 - grace oguntuase (NSY Digital)
Yeah. It was probably already launched actually. No.

16:49 - Rakesh Guduru (PETL)
I don't think I've seen any. Yeah. Maybe I might. This one. Yeah.

16:54 - Nativ Yanko
Apple discounted female creator. Did we launch that? Oh, yes, yes, yes, that was a while ago, we launched that, yeah, while ago, yeah, and then I found this, yeah, wait, let me see, this is the husband hat, if your husband's still lugging around, hmm, so this is like the husband angle, Apple quietly stopped making theirs, but most people have no idea, there's a better, okay, I think she's a good creator though, so we can use her for that other ad, Grace, unless you just copy it one by one, like one-to-one, same editing style, we obviously got the same editors on that account.

17:44 - grace oguntuase (NSY Digital)

Because I think the I did for that ad, the Apple discounted female creator, was I changed up the script a bit, so that might not have, like, you know, that might be the reason why it didn't do well, so I think for this one, for the top five ranked one, I think I'll just, like, get her to just film the script. Like, word for word. Nice. Yeah, like, I think just changing one variable at a time.

18:04 - Nativ Yanko
Yeah. And, like, keep the winning variable, which is the script. Yeah, okay. Very interesting. Yeah, and I think we can use her for a different, for the other one that I showed earlier. I also think there is a lot of opportunity, and I think you've already done this, Grace, but, like, really doubling down on, like, us versus the discontinued Apple charger. Yeah. Yeah, we've made many iterations of that.

18:33 - grace oguntuase (NSY Digital)
We've tried a few static versions, and actually this, let me just share my screen real quick. This static has been doing pretty well over the past few weeks now. Let me just, can you guys see that? Yeah. Yeah, this one's been doing well over the past few weeks. So we could try and make some more, like, video variations. me just kind of moreations. you. We wanted to try the PETL versus the Apple Charger, but maybe we could do PETL versus other competitors like Belkin or like Anker. I know the Anker Mago is like a very popular portable charger that people like. So maybe that's something we could do as well. Were you using yours in Morocco?

19:22 - Nativ Yanko
Yeah, I actually was. It was so helpful. Okay, nice. We should have made like a grace went to Morocco.
ACTION ITEM: Send shipping address to Rakesh for 5,000 mAh PETL - WATCH: https://fathom.video/share/3Xsi518GuTfMeY26sDgGvtejb5DpgDBv?timestamp=1167.9999
That's interesting. So yeah, on this, I definitely agree, Grace. think we should make. I have to send a brand new.

19:38 - Rakesh Guduru (PETL)
Charlie, you're going to get 5,000, man. Forget about the 3,000. You're going to get 5,000. Tomorrow we are shipping to all. I'm going to send me your address. Shoot me your address. I'm going to ship you on. Nice. Let's make everybody jealous. He's going to get the 5,000.

19:57 - grace oguntuase (NSY Digital)
Cool. What I was going to say. So yeah, so Grace, I agree.

20:01 - Nativ Yanko
I think we should make iterations on this format of the Us vs. Them, but I also think we should make like video, more videos around the Us vs. Them specifically for the Apple MagSafe. I'm just trying to think of ways, like what are some winning formats we can do? Not a here's what would happen because it's more of supplements. I say maybe just like in the car, just to yap into the camera, holding the two up, like I used to have this, this continues, blah, blah, blah. Oh, I want to buy it for my family, but I can't buy it anymore. Yeah, good. Yeah.

20:36 - Rakesh Guduru (PETL)
And also like one more angle, Grace, like we can say, hey, every, all phones are AI, everything is AI. The chips are becoming more powerful, but you know what? The battery is not, not getting any bigger.

20:52 - Nativ Yanko

So rather, and that's one angle.

20:54 - Rakesh Guduru (PETL)
And second one, rather than keep constantly chasing new. iPhones, because your battery is degrading, why don't you just buy a pedal instead of buying a brand new phone? I don't know if it works. Yeah, I like that.

21:10 - Nativ Yanko
I also think we can make some iPhone-specific. I don't know if you've done this before, Grace. If you've got an iPhone 17, this is how you make it even better or something. This is perfect for you.

21:23 - grace oguntuase (NSY Digital)
We actually did test some that were iPhone-specific in the hook, but I do think the execution could have been a bit better because it was around the whole angle of, if you have an iPhone 17, then you need this charger. But as Rakesh said, educating the audience on how your battery dies quicker the longer you have the phone and how it helps to solve that problem. I think that's an angle in itself, even. Yeah, that's great.

21:51 - Nativ Yanko
I think, like, if we can turn PETL into, like, because, like, Rakesh, just for context, we work 90% with supplement brands. Thank And there's a very, like, specific structure of problem, agitate, solution, mechanism. If we can, like, apply that thinking to PETL, I think we can smash it. Just, like, find big problems, figure out what they're trying, why that's crap, and why they need to come to us. Yes. Yeah, and great. I think this angle.

22:20 - Rakesh Guduru (PETL)
Hey, have you been noticing your phone keeps dying much faster? Problem. That's the problem we're going to... Yeah. I think then, because your chip, your AI chips are getting more powerful, they're draining your battery, right? So I think, because AI is, like, a buzzword right now everybody's using, I think we should bring into our ads, too. Yeah.

22:41 - Nativ Yanko
Yeah. Like, we're making, like, AI the enemy. People hate AI. There's such bad press on it. So I agree, like, just leaning into the hype a bit. Yeah.

22:53 - Rakesh Guduru (PETL)
And also, another angle, I don't know if it makes sense, have you heard the news Apple is... Increasing their price by, no, increasing their price by like 30%. So yeah, because of the memory chips, right? So are you still looking to buy a new phone? We recommend just buy a pedal. It's like a brand new phone. I don't know if it's...

23:20 - Nativ Yanko
Grace, I think that's good. Grace, have we done an ad around like, have you seen whenever a new iPhone comes out, all of a sudden your charge just decreases by like 30%? Have we done like a hook like that? No. Yes, yes. Because that's like a big thing. I know everyone talks about that. Like, it's like a funny thing that people like to say, oh, the new iPhone's out, my phone's about to get slow, or my charge is about to get short.
ACTION ITEM: Send meeting transcript to Claude; prioritize creative ideas - WATCH: https://fathom.video/share/3Xsi518GuTfMeY26sDgGvtejb5DpgDBv?timestamp=1420.9999 So just playing on that a little bit. Yeah. Yeah, so I would say, Grace, take the

transcript of this call, put it into Claude and like prioritize the ideas. Then I think, yeah, like you have the quality. can easily execute this. Yeah. Yeah. Karen's smashing out some amazing ads. Cool. Any other last points you want to touch on here, Grace, before we hand it over to Charley?

24:14 - Rakesh Guduru (PETL)
I just want to show her. Check out the unboxing, Grace, from Claire. It's been kicking some . It took like second and third spot, actually. I think you're looking at a broader window.

24:29 - Nativ Yanko
It's just launched yesterday. Yeah, look at last seven days or so. Last 24 hours, yeah. Yeah. It just went yesterday. Yeah, it just went like yesterday.

24:40 - Rakesh Guduru (PETL)
And it took second and third spot. Like if you see, you have those two spots, that's unboxing. Can we hear this sound? Good.

24:49 - Charley McDonnell
Made by Apple. Let me show you what it does. It's like unboxing a new iPhone. So Petal is a MagSafe battery pack that snaps on the back of your phone and can also charge your AirPods and your Apple Watch. Once you try it, you'll never... They came out with two new colors, Blush Gold and Sahara Gold. She's perfect. Look at that.

25:05 - grace oguntuase (NSY Digital)
Now you can match pretty much any iPhone or case. I've put my whole family on Petal. It's the perfect high-quality gift, comes in this nice box, and everyone needs one.
ACTION ITEM: Send Claire/Vero unboxing B-roll (no text) to Grace - WATCH: https://fathom.video/share/3Xsi518GuTfMeY26sDgGvtejb5DpgDBv?timestamp=1509.9999 If you're an Apple user, you're a Petal user. Grab the new colors at gopetal.com. I think one thing is, um, actually, if you guys can send us this B-roll, because this is really clean. That's exactly what I was going to say.

25:27 - Nativ Yanko
Spot.

25:29 - grace oguntuase (NSY Digital)
Yeah.

25:30 - Rakesh Guduru (PETL)
I don't have a B-roll, but I have a one without no text and everything. I can send you that. Yeah. that could work. The editors could cut it. Do second variation also. Yeah, that one has 4.18. Yeah, that has an amazing row.

25:45 - Nativ Yanko
This is the ultimate setup.

25:49 - Rakesh Guduru (PETL)
Pause it on hook.

25:50 - Nativ Yanko
Pause it on the hook quickly. I can't believe they don't sell this at the Apple store. That's a great hook. I would even make that into a static headline. I can't believe that one. Let's hear what she says. This is the ultimate setup, and PETL's not even made by Apple. Let me show you what it does. It's like unboxing a new iPhone.

26:12 - grace oguntuase (NSY Digital)
So PETL's a magazine. It's a great hook. Yeah, the one is converting crazy.

26:22 - Rakesh Guduru (PETL)
And we have another ASMR type, which is, I think, CJ. CJ79.

26:33 - Nativ Yanko
Just a quick one. Do you have access to this creator? She would be perfect for that winning ad from Jared. Yeah. Yeah, I have that.
ACTION ITEM: Duplicate Jared script in Notion; set to Filming In Progress; send to Rakesh for creator - WATCH: https://fathom.video/share/3Xsi518GuTfMeY26sDgGvtejb5DpgDBv?timestamp=1609.9999

26:44 - Rakesh Guduru (PETL)
If you want, give me the script. I can send it to her. Yeah, she's not very expensive. I think she charges like $400 or something. Okay, yeah, if you can coordinate that. And she already has a product.

27:00 - Nativ Yanko
Like, so she can do it fast. Yeah, so grace, what I would potentially do so that we can track it properly, literally just go into the Jared script on Notion, literally just press duplicate, and just like change the batch number, and like the creator, and then we just move it to filming in progress, and then send it to Rakesh, and then we can just like attach the link and assign the editor when the content is in, and that equals like another concept. Yeah, I can do that after this call.

27:28 - grace oguntuase (NSY Digital)
Perfect, that's great.

27:30 - Rakesh Guduru (PETL)
So this is another one which is picking up, I think it has almost three ROAS, it's just unboxing as well, yeah.

28:06 - grace oguntuase (NSY Digital)
I think this is Vero the editors can use as well. That's pretty good.

28:11 - Rakesh Guduru (PETL)
Yeah, I can send both those with no text and everything. Okay. Yeah. All right. So those are the ads from my side. Let's see. The Roelios also is doing a little bit good. ROG78. It's, it doesn't have a lot of spend yet, but, uh, it, uh, Charlie, well, maybe you can keep scrolling, uh, Grace. ROG78. That's also, yeah. This one? the Roelios is crazy. I spent $49. Oh, yeah, this one.

28:55 - grace oguntuase (NSY Digital)
Okay. $50 on something that has saved me on every single trip since. Among. the road constantly. Hotels, airports, meetings.

29:03 - Rakesh Guduru (PETL)
My phone and Apple Watch are my entire office. And for years, every power bank I tried was the same. Cheap plastic rectangle that hangs off your phone instead of sitting flush. Takes up half your bag. Only charges your iPhone. Not your watch, not your AirPods. And by the time you actually need it, it's dead too.

29:21 - Nativ Yanko

I started traveling with a pedal three months ago, and I'm not going back. Circular. Snaps right on. Starts charging instantly. No cable, no outlet. It charges my iPhone, my Apple Watch, and my AirPods. Small enough to fit in my pocket. Not my bag, my pocket. I've gone through entire travel days without touching a single outlet. Grab two and get 20% off and free shipping at gopedal.com.

29:45 - Rakesh Guduru (PETL)
Look at, look at this one. 710. ROG 710. Yesterday, have you, is that yesterday? Yeah, this is. I'm seeing ROG 78, yeah, ROG 710 V4 Travel, I have that, that has a crazy conversion, yeah, go to the next page. Is it this one? Yes, yeah, the 710 ROG.

30:25 - grace oguntuase (NSY Digital)
Why does every trip end? Oh, wow, it has a, that's a high rule.

30:30 - Rakesh Guduru (PETL)
Yes, that's the one, right? With your phone, your watch. And your AirPods.

30:35 - Nativ Yanko
Look at the ROAS. What's the AOV though? What's the AOV though?

30:42 - Rakesh Guduru (PETL)
let's try. bought, someone bought bigger. Grace can check it real quick. If you just press the X, it's $87.

30:51 - Nativ Yanko
Okay, so yeah, that's just a good performer then. That's crazy. It has four conversions, crazy.

30:58 - Charley McDonnell
Play that.

30:59 - Rakesh Guduru (PETL)
just Brent, you just uh, And with your phone, your watch, and your AirPods all read at the same time.

31:07 - grace oguntuase (NSY Digital)
Apple actually made a battery pack for this. Then they quietly killed it in 2023.

31:12 - Nativ Yanko
Never made another one. So you're back to some junky rectangle that hangs off your phone, cracks in a week, and only charges one thing. This is PETL. Circular, sits flush, snap it on, and it's like giving your phone a second life, right when you need it most. Your iPhone, your Apple Watch, your AirPods, all charging from one pack. The second you land. Machined aluminum, tempered glass top, zero plastic.

31:36 - Rakesh Guduru (PETL)
Small enough to actually fit in your pocket. And at the hotel, it doubles as a stand. All your devices charging on the nightstand while you sleep. Apple charged $99 for this. PETL is $49. Half the price. Go to gopetl.com. Grab two or more, get 20% off for a limited time. But the hook with the scene, I think, is working. I don't know. We'll see how. That's goes, but it just went live yesterday as well, so it's a brand new ad, yeah. Yeah, that's strong performance for an early ad.

32:12 - Charley McDonnell
Yeah.

32:15 - Rakesh Guduru (PETL)
So we'll see those, maybe we have to iterate on that. And today we are testing something brand new I just sent to Charlie is the, let me show you the creatives. I think it came out nice. It's all, we are focusing on the gifting and the packaging, that type of stuff. I don't know if Charlie set it up yet, but let me show you. Not yet. was about to.

32:39 - Charley McDonnell
Okay.

32:41 - Rakesh Guduru (PETL)
So let's show it to the folks. So you guys know, these are all static, by the way, but I think they came out amazing. These are all gifting. Okay. Let me, okay. I have them. Let me share my screen here. Share screen. Share. Okay. So, all right, let's do this.

33:08 - Nativ Yanko
Can you guys see my screen? Yeah.

33:12 - Rakesh Guduru (PETL)
So, I mean, we haven't tested it. We're going to test it right now. But I think it's, there's a lot going on here. Right. So, let's see how they do. But the idea is to showcase the gifting, packaging, a premium kind of angle. So, if you see, we kind of did something like that. So, showcasing what's inside the package. And it's perfect for here. I think these statics might do good. Because these are very well made. Right. So, so, that's... So maybe we should keep an eye on these two. Let's see how this do, and maybe you guys can make some gifting iterations. Nice.

34:15 - Nativ Yanko
Yep. Okay. So, Charley, you want to take over?

34:21 - Rakesh Guduru (PETL)
Yeah, sure.

34:22 - Charley McDonnell
Just give you a quick run through of performance. You know anyway, because you obviously keep up to date with the Muslim sales, but obviously we did scale spend on Friday. In let just get rid of that. Cool. So, yeah, overall consensus is it's sort of trending back to where we were. Yesterday. So, have you seen yesterday? 24K, yeah. Yeah, yes it was. it's annoying. We're literally just below the best day ever. So, yeah, seem to be finally back to where we were. Obviously, this was just before the black went out stock, and obviously there was a few other things as well. The conversion rates are... Massively, it's a 15% increase week on week there. Revenues up around 10% as well, which is good. AOV seems to be a bit higher as well, which is good. And then, yeah, I'll see Meta spend is slightly higher as well. We did scale by around 10%, but because of the way Meta paces the budget, will average out over the week, but day to day it will fluctuate. So that's why it's not around like 10% just yet. But what is good as well, the efficiency is also improved. So we've essentially spent more, but the efficiency has improved as well. So if you look here, spend has gone up 4% and then our ROAS, our Shopify developer Meta spend is like up 5% as well. So we're spending more, we're getting more efficient, which is like the golden scenario to be in as a growth strategist. So, yeah, seems to be doing really, really good. The only concern I have now, which is sort of like a good problem to have, is we're spending like quite a lot and we're scaling quite quickly. We're essentially

our CPM and CPMR metrics, which is. Like how efficient we are at reaching people when they're new people is starting to creep up. So this is more like granular, like media buying stuff. But like if we look at this week compared to last week in CPM, we can see it's trending upwards. So we were at $67, we're now at 80. And then at CPMR as well, which is like how efficient we are reaching new people is also increasing as well. So we've seen this a lot with lots of different brands. fact, we literally had this same problem with that soap brand. I think we spoke to you about last week or the week before who are literally at like identical sort of spend levels. So they were around the same think it's because of the season? Do you think because it's July? I don't think it's the season, no. I think it is just a case that we're spending a lot. And also the main issue that I can see here in this sort of structure is we're not consolidated enough. So what we did with that brand was we were literally at like the same CPM numbers. I think we were around like $100 and CPMR was around the same. same era. you. We basically restructured the campaigns to group the ad sets by either like personas or angles. You get to a phase where right now, mean, we've got 108 ad sets in here, not all of them are live, obviously, but there's probably around 25, 30 that are live, I would imagine. So we can try and trim that down to like four or five max. We keep all the learnings in one place. And then also, as a result, that Meta rewards us with cheaper CPM. So it basically means we'll be getting a lot more eyeballs for our money, which in theory should be a very low leverage, a very low hanging fruit thing for us to basically boost revenue even more, because we'll be just hitting more people for the same amount of money. So that's my sort of plan for this next week, really, to try and get that action into place, which it shouldn't really disrupt things because we'll move things over using post IDs. And like I said, the top spending ad sets like this one here, for example, we'll probably just repurpose that. So we keep some of the learnings there anyway. And then it will just be a case of like grouping up the creators. That we've got in terms of, I'd say, angles more so than personas for this brand, just because, again, for supplements, you get more like the persona side of things. So, obviously, we've got like gifting, we've got- How are we going to do grouping?

38:14 - Rakesh Guduru (PETL)
We might disturb a lot of stuff, right? Yeah. We shouldn't really disturb it.

38:19 - Charley McDonnell
So what we've done is, again, we did it with that other brand that was spending literally the same amount. We basically took like the top performing or top spending sort of ad sets over like the last 14 days, because that's where the most learnings are. So, for example, this one, this one, this one, and this one. So say we've got like four core-like angles, which could be like travel, the Petal Plus launch, it could be like the ranking, and then also like back in stock as well. There's going to be quite a few. And then what we'll do is essentially we'll go through each of these ad sets. Obviously, we've got the date created here. So what we'll do is we'll go through, take like the top performing ones or any ads that have spent a substantial amount that are performing, we'll move them in. to the right ad set place and what angle they're in using their post ID. So it will carry the learnings over. Then what we do is every seven days, instead of launching ad hoc, which is what we're doing at the moment. So this is why I asked you the other day about if you have like a set quota on creators for your internal team. Obviously, from our end, we've got like a set amount per month. If from your end, you can give us a set amount per month, we can work it all out, add them all together. And we can basically say, okay, we can launch X amount of concepts per week. And then what we do then is we launch them, we give them seven days. So we look in the date, create a column, and then we'll look at your unit economics, your spend levels, and we'll basically decipher like a threshold of like spend levels. So if it's spent above like $250 in seven days and the ROAS is

like two X, then we'll leave it on. If it isn't, then we'll kill it. And then what we'll do there is every seven days, we'll rotate the creatives. And that in itself is, I think, a big reason why CPMs have come down so much in that other brand is because... How are they performing now in terms of CPM? How much efficiency did you gain? fell from, again, I think CPM for them was around $90. It fell from there to around $39, I think it's at now, over the last seven days. So it's, yeah, it's had a massive impact. And again, that's just like, it's an often overlooked thing, really. And I think a large chunk of that really is the creative, but also the consolidation side of things also helps us get everything back into active. And just, it's a lot more stable and a lot easier to manage and a lot more scalable as well. So, again, that's a very easy thing we can do to just try and get more eyeballs, which means more traffic. And at your current conversion rate, it's going to be a hell of a lot more revenue as well. And it will allow us to scale a bit quicker as well, because the ROAS will improve. Got it, got it.

40:51 - Rakesh Guduru (PETL)
From my team, what I'm shooting for is two static creatives. Concepts. Yeah. Concepts per week and to add like UGC concepts a week. But this time, this one, two weeks will be a little bit higher in terms of UGCs because some of the influencers I've already worked with in the past, I kind of told them to do these unboxing videos and so keep everything going. Yeah. So I will have a more like two or three like that. But once this initial, this launch phase is because introducing new packaging, new model, if that is cooled off, so you can expect like four concepts from us per week.
ACTION ITEM: Send weekly creative quota to Rakesh; align on launch cadence - WATCH: https://fathom.video/share/3Xsi518GuTfMeY26sDgGvtejb5DpgDBv?timestamp=2500.9999 Is that your whole internal team, not like one person?

41:48 - Charley McDonnell
Yeah, it's all my internal team. Yes. All of them. Okay, that's good. So, yeah, like I said, I'll go away, look at how many concepts we're doing, you're doing, come to you with like a set amount per week. And then I think what would be good. From your end, more for like an organizational point of view, is like a dashboard of sorts. So I don't know if we can build like a tab in R1 or Rakesh's team to upload, see if that might mess things up.
ACTION ITEM: Build PETL internal-team tab in Vercel approval dashboard; share w/ Loom - WATCH: https://fathom.video/share/3Xsi518GuTfMeY26sDgGvtejb5DpgDBv?timestamp=2525.9999

42:13 - Nativ Yanko
No, no, we can just tell Claude, just figure it out. So you're saying in our approval dashboard on Vercel, have another tab. Let me get it up actually.

42:24 - Charley McDonnell
Yeah, just so like we don't, because if we're not launching them as soon as you send them, if that makes sense, like there's going to be a bit of a backlog, which is fine. Yeah, so we need a tracker. So we need a tracker to basically look and say, okay, we've got these last week, we haven't launched them yet. So let's launch them this week, for example, so we don't miss anything.

42:41 - Nativ Yanko
So yeah, so maybe like a little thing here where it's like, like a Petal internal team and it's like the same layout. Yeah. Because here, like, yeah, you can see everything's launched and we only have three edits. Like this is perfect. And then we just have another one. And then what you can do. Try. Rakesh will move it to edit

approved, and then whenever you launch it, just move it to edit approved to launch, exactly.

43:18 - Charley McDonnell
Yeah, that's good.
ACTION ITEM: Restructure Meta ad sets by angle (Travel, PETL Plus, Ranking, Back In Stock); use post IDs; duplicate/approve before pausing - WATCH: https://fathom.video/share/3Xsi518GuTfMeY26sDgGvtejb5DpgDBv?timestamp=2598.9999

43:19 - Nativ Yanko
I'll have that, realistically I'll do it on the weekend, because then I'll have an option to build it, so probably by Monday.

43:29 - Charley McDonnell
I probably won't get the restructure done until probably Friday, I'd say, tomorrow, Friday, just because it's going to be like a big task, if that makes sense, of like getting all the ads, grouping them, and then moving them over. Yeah. It'll take me like a couple of hours, and then...

43:43 - Rakesh Guduru (PETL)
when we do it, for like a little bit of time, it'll be screwed up, everything, or no? I don't think so.

43:51 - Charley McDonnell
mean, you're naturally going to have like a little bit of downtime of like maybe like an hour or two, where the ads that we've moved, and they're in... The new ad sets are like technically under review again, so they're not quite live, but that's going to be the same as launching any ads. So you might see like a little bliff for like one day, but in the long run, it's going to be worth it.

44:12 - Rakesh Guduru (PETL)
Yeah, but do you want to duplicate, wait until they get approved and turn the others one off? So you don't turn prematurely? Yeah, that's a good idea. We can do that. And then obviously you just need to make sure that we do switch them all off just because if it's overlapping and finding it, that's where CPMs rise. Yeah, as soon as they're live, like probably the same hour or the minute, depending on your, as soon as they go live, you turn it off, right? Yeah, I just don't want us to turn it off, wait for the reason, go then to publish. Yeah, I agree. We want to try and get through it as unscathed as possible.

44:53 - Charley McDonnell
And you are naturally probably going to see some disruption, like I'm not going to lie to you, but however, in the long run. Let's not do that.

45:01 - Rakesh Guduru (PETL)
Let's not do that on Tuesday because Tuesday is the slowest day. down day. Yeah, that's fine. Sounds good.

45:10 - Charley McDonnell
It's just more time to build the dashboard as well. So, yeah, that's good.
ACTION ITEM: Increase Meta budgets Fri-Sun - WATCH: https://fathom.video/share/3Xsi518GuTfMeY26sDgGvtejb5DpgDBv?timestamp=2716.9999

45:13 - Rakesh Guduru (PETL)

Yeah, let's not kill our Friday, Saturday, Sunday, which are highest revenues. So, because everything will be light this weekend, I think we'll be doing some crazy numbers, I'm assuming, this weekend. So maybe, again, Friday, you can up the budget a little bit. Everything goes live. I think we should be hitting 30K days very soon. Yeah, it's trending upwards.

45:40 - Charley McDonnell
Even this week, like you can see, it's sort of the revenues just sort of growing and growing and growing, which is, yeah, really, really good. So, should be a big weekend. Yeah.

45:51 - Rakesh Guduru (PETL)
And I just want to, like, I don't know, Nativ, one thing I want to bring to your notice is, I have seen. I'm the, okay, let me pull this, my analytics dashboard. So I am seeing the bundle, even though AOV is going, people are not buying bundles as much as, so it's like, I just want to understand a little bit more. For example, yesterday, right? Or maybe like, let's see last seven days. Let's see how the data is for last seven days. So this one is going to show us bundles in a second. see, if you see the orders of this five pack went down, like 25% and the singles are going up. I'm not sure why, so I'm just trying to understand. I'm seeing even like yesterday, like the bundles.

46:55 - Nativ Yanko
What's the data science here? Is it over seven days? Yeah. Yeah, that one is. It's seven days.

47:01 - Charley McDonnell
Oh, this is yesterday, I think.

47:02 - Rakesh Guduru (PETL)
This is yesterday. And if you see only four bundle packs, it's kind of slow. I don't know, maybe because we launched Petal Plus, I don't know. But if you scroll down again, over last seven.

47:17 - Nativ Yanko
Yeah, this is last seven.

47:19 - Rakesh Guduru (PETL)
If you see, it's actually, a five bag went down significantly. I don't know why. I would say we need to give more data significance.

47:27 - Nativ Yanko
Yeah. It could just be a down week. Yeah, after two, three, four weeks. Because 24, I know it's quite a lot of orders, but like in total, but 24 is still lowish to get like real. Because when you're at low scale like that, every order is like a big percentage bump. Like if you had 10 orders and it drops to five, five orders is not a lot, but that would say 50%. So I think we need more data significance. But for example, with one Petal, you're at 992 orders. bit, you're if go. take So And at a 21% bump, that's telling us a real story in my opinion. I think that's just, Charley, you think that's just the increase in budget we're spending? Yeah, I think so.

48:10 - Charley McDonnell
I mean, everything, I think that and also just the efficiency, like we've found the new winner, which has definitely helped. Like we saw with that one that we, I think the Father's Day one we launched a while ago, like it just transformed the account.

So I suspect this new Claire one will probably have a similar effect, maybe not to the same level, but it will definitely boost revenue and efficiency that way.
ACTION ITEM: Monitor bundle vs single sales; flag if trend persists - WATCH: https://fathom.video/share/3Xsi518GuTfMeY26sDgGvtejb5DpgDBv?timestamp=2902.9999 And then obviously that would just allow us to scale a little bit more as well. Yeah.

48:33 - Nativ Yanko
So yeah, I think Rakesh, next steps here, just like no changes, but keep an eye on it. And if this trend carries on, we can find the root cause. But yeah, and we can like think, what current landing page tests are you doing now? Or offer tests?

48:52 - Rakesh Guduru (PETL)
So we are currently setting up, it's almost done, maybe in a day or two, we are launching. So this. This is we are testing, this piece. So this, because a lot of our customers are a little bit older, so we want to show them this piece ahead. And the second thing I'm testing is, like I said, these start at 5 and go all the way to 30. So next one I'm testing is it starts at 0, goes all the way to 25. So it's a different discount structure. If that is, has no impact on conversion, I'm going to break that, make that live. So before I make a decision, you just want to be 100% sure. So I think those are the only two pieces we are testing. And I think there's one more piece is here, there is another, because my variation doesn't have it, there's an additional piece here, which shows each device how much it charges. So that, yeah. So the three split tests which are going on at this point, I think right now the color structure, I think everything looks a lot, I don't know why is that happening.

50:14 - Nativ Yanko
One question, and this is like a very random question, how expensive is it to put like tracking inside of it? What do you mean? So like with my AirPods, I have like find my AirPods on my phone. Is that like expensive technology to put into a product? No, it's not.

50:36 - Rakesh Guduru (PETL)
It's very cheap. should. I will be doing probably 20, 27 models. Like when I refresh, I say, hey, pedal three or pedal two, right? So I want to put like a tracking in it. Um, I probably pedal four or five, I want to put like a display on it. I don't know. We'll see. Interesting. think, I don't know. I don't know why tracking.

51:00 - Nativ Yanko
It to my head, but it could help us with ads. It's just good for marketing if it's very cheap. I think you'd get more conversions, but again, that's something down the line. Yeah, I think that the idea is for me to refresh the product every two years, right?

51:17 - Rakesh Guduru (PETL)
So to make sure all these customers we acquired, let them keep excited. Hey, we launched new upsell.

51:25 - Nativ Yanko
Yeah, new and improved. I think soon when you get to like big scale, start doing like collabs with that Hello Kitty and all these like, yeah, like if you were in the UK and you were like, there's a brand in the UK called Sanucci. They connect you with all the football teams. They got like licensing rights from Arsenal. I listened to a podcast with a founder and he said that just blew up like crazy. So, and I know, I know, um, Bridge Wallet does that. So it's just some idea. Yeah, definitely.

52:02 - Rakesh Guduru (PETL)
We have to do a lot of variations, colors, some brand partnerships, like that. Maybe PetalX, NSY.

52:10 - Nativ Yanko
We could sell that. I guess. could do, maybe like one day, if I run some events in the UK, you can be like an official, like if we give like goodie bags. Because one of my other friends, he runs like a lot of events in the UK and his clients, they give like free gifts in like a goodie bag. Anyway, I digress. just kind of came to my mind. see, I've been, a lot of people approach us, hey, they want to do like a gift thing, right? Yeah.

52:41 - Rakesh Guduru (PETL)
We've been saying no, no, no. But I was like, okay, because I want to bring these guys probably 2027 or maybe once I have like a massive investment going on, then when we order more inventory, then we'll start accepting. But anyways, I thought, okay, one brand, I go ahead and I went ahead and. Thanks. be right They their order. So we are putting this small logo on it, and we are shipping them 500 units, actually. like this.

53:13 - Nativ Yanko
Yeah, advantage.

53:14 - Rakesh Guduru (PETL)
Yeah, $35, not bad, right? Per unit.

53:21 - Nativ Yanko
$35 includes of this customization.

53:25 - Rakesh Guduru (PETL)
So this is the logo they wanted. So we put it, so, but that's a different angle we should be going after, like corporate gifting at some point, right? You have no idea. Every day I get at least one or two requests for corporate gifting, I've been pushing them, but maybe one-off orders I'll start taking. That's how I took this order. But it's at $20,000, $20,000, $25,000. It's crazy. And we don't even have a dedicated landing page. Imagine we have a dedicated landing page. This is called Premium Gifting Segment. I'm telling you, this brand is going to be massive.

54:08 - Nativ Yanko
Yeah, B2B is going to be huge. I was speaking with Sambhav, and he was telling me, this is probably the biggest time. Every single person has a phone. In an ideal world, you could sell this to every single person in the world. The time is insane. So, yeah. I would do the same. If you're getting demand from it, do it. It doesn't take your eye off the ball. We've obviously got the Meta side covered, but easy revenue. Did I show you the docking station?

54:44 - Rakesh Guduru (PETL)
Oh, man. Yeah, you showed us.

54:46 - Nativ Yanko
This thing is one pound.

54:49 - Rakesh Guduru (PETL)

It's so heavy, you know, because it's so... And it feels solid. And so this is going probably would be in... It's know, it's it's it's it's it's In stores by, I mean, online by September.

55:04 - Nativ Yanko
Apple could acquire this. You know when you go to the Apple store? I think so, bro. Why not? Why not? I think when I go to the Apple store, they acquire companies and then they sell it in the Apple store. So I think they acquired like Belkin or something like that and they put it in their store. They acquired Beats by Dr. Dre. Yeah, yeah, they did Beats. Yeah, that's for sure.

55:30 - Rakesh Guduru (PETL)
Yeah. The runway is long. So as soon as I figured out, put more like almost 2 million or we have $1 million in inventory at this point. If we have another 2, 3 million in inventory, we have to focus B2B marketing. I think that's huge, you know. So that segment, people want to give away products, right? They're always looking to give their customers, give their employees and all. So it's a massive gift in events, the gift in events. Maybe some of this we have to cover, grace, gift in events. Do you think at some point I want to test even 10 packs? So we have five, right? I want to do the split test of 10. So say, yeah, then the five will be 25. Say our 5% less discount works. Then I want to do 25 for 5 and 30% for 10, right? So I want to do that. That's a massive AOV too.

56:35 - Nativ Yanko
Nice. Yeah, really, really good stuff. I'm actually excited about this next two weeks. I think we can scale a lot. We'll keep you posted with all the next steps. I will build this new Claude code thing on the weekend. I'll share it with you on Monday and I'll create like a loom on how to use it as well. Okay, perfect.

56:56 - Rakesh Guduru (PETL)
So are we all clear? Grace, you have some good... Thank And Charley, let's shoot that change Tuesdays, Wednesdays, let's not do it on for the weekend.
ACTION ITEM: Email Peptico re: intro to Nativ - WATCH: https://fathom.video/share/3Xsi518GuTfMeY26sDgGvtejb5DpgDBv?timestamp=3421.9999 And Nativ, did Peptico got back to you or no? No, not yet. I appreciate the connection.

57:20 - Nativ Yanko
Wow, that's crazy. They've been on my to introduce the customer. Yeah, that is crazy. Why? They saw our ads or you said about us?

57:32 - Rakesh Guduru (PETL)
No, they knew how Petal's been skyrocketing, right? There's like, hey, who is your ad agency? I was like, hey, I don't want to give, right? So I didn't give them for a long time. I appreciate it. Yeah, now I'm like, okay, guys, this talk to Nativ is the , right? So, but I'm surprised they haven't gone by. Cool. So, uh I'll up with them in worst case.

58:01 - Nativ Yanko
I'm sure we'll have a chat at some point, get Charley and Grace scaling their accounts as well. Cool. We have to jump to a team call. As usual, really, really good speaking and we'll talk to you soon. Bye.

NSY <> PETL - Bi Weekly Strategy Call - July 29

VIEW RECORDING - 41 mins (No highlights):
https://fathom.video/share/jm3BF84Ru9_thFscx2Z1sq8C-NaZaHUV

0:01 - Rakesh Guduru (PETL)
Yeah, because I know a lot of clients.

0:04 - Nativ Yanko
have one friend who spends like 2.5 million a month on a credit card on Meta. He has probably one of the most points for flights in the UK, I think.

0:17 - Rakesh Guduru (PETL)
He spends like 2.5 million a month. No, have my other, actually he's a partner in Petal. His name is Muru. He does all his business transaction on a credit card, and his salary is points. And you know how much, he makes half a million a year in points. Well, like, yeah, you can get like flights.

0:46 - Nativ Yanko
I need to start doing that.

0:48 - Rakesh Guduru (PETL)
Dude, he takes cash. He doesn't even do, he converts points into cash, because you can also request cash. And he makes half a million in cash. Why don't you do it? Why I don't have a credit card, which is so, I mean, I never applied for a credit card, and now yesterday with what happened, I need to get a credit card, you know? I recommend get one, and then pay with credit card. keep growing. Yeah.

1:16 - Nativ Yanko
Allow you to scale spend.

1:19 - Rakesh Guduru (PETL)
But, how's it going, Grace? Grace! How are you? You always have good energy, Rakesh.

1:27 - Nativ Yanko
I like it.

1:30 - Rakesh Guduru (PETL)
I know. I try to be positive. Yeah, yeah. That's the best way to be.

1:38 - Nativ Yanko
Sometimes it's annoying when we get on, not annoying, but we get on a call with a client, sorry, and the mood is just very low. But here, it's like a good environment to come up with ideas. Very nice. Yeah, it's very hard to establish the rapport.

1:56 - Rakesh Guduru (PETL)
It's not happens with all the teams. Some teams... ... I don't get along, I'm not happy with on the call, but usually I don't work with the people I don't like. That's actually similar methodology to me now.

2:09 - Nativ Yanko
Like I've been hiring a lot recently and that's a big thing. It's like if you could like, if they're just not aligned on like a culture fit, as I like to call it, it's hard to work with these people for like a long period. But yeah, as you saw on Slack, Charlie is on holiday. He needed that. Yeah, he was getting gray hairs. But yeah, so

like Max and I are basically looking after the account. Max is good. He knows what he's doing.

2:38 - Rakesh Guduru (PETL)
Yeah, Max is the one that taught Charlie everything, actually.

2:41 - Nativ Yanko
So you have two guys to run ads?

2:43 - Rakesh Guduru (PETL)
We have three.

2:45 - Nativ Yanko
So like we have Charlie is our main guy. Like he's the one that we're going to be skating like the big brands with. That's why he's on your account. And then we've got a guy called Jacob who's just started with one of our other clients. He. He. He. Um, he, do you know a brand called Javi Coffee? Oh yeah, yeah.

3:04 - Rakesh Guduru (PETL)
He was the senior media buyer at Javi Coffee.

3:08 - Nativ Yanko
They do like nine figures now. So he's got, he's like 10 years, 15 years older than me. So he's got a lot of experience. And then we've got Max as well.

3:17 - Rakesh Guduru (PETL)
How did you get out of this people?

3:19 - Nativ Yanko
It hasn't been, I had so many interviews. Like I literally, my past two, three months has just been interviews, interviews, like 10 to 12 calls a day. It's been crazy. However, um, yeah, like the more people you speak to, like you start, cause if you speak to just one person, they could be not the best, but they're almost like in a vacuum. And if you interview two people and one's terrible, it makes the other one look incredibly good. But if you interview 10 to 15, then like, you can really get a gauge on what, what is good and what bad looks like. Actually on that, like, did you, what's the situation on email? Did you manage to speak to any of them?

4:02 - Rakesh Guduru (PETL)
Yesterday, I had all the calls yesterday. I cancelled everything. was dealing with Meta. So today, after this call, I have a call with Eli, and Toby is not available tomorrow. So I have a call with Toby on Friday. Okay, nice. Perfect.

4:18 - Nativ Yanko
Yeah, I would say try to get an audit out of both of them.

4:22 - Rakesh Guduru (PETL)
Yeah. Just get an audit.

4:24 - Nativ Yanko
See who gives you the better audit. Who's more aligned. Who'd you get a better vibe from?

4:30 - Rakesh Guduru (PETL)
Yes. Because they're both good.

4:32 - Nativ Yanko
So you can obviously make the decision from that. Yeah, because the add-to-card rate is insane.

4:38 - Rakesh Guduru (PETL)
We have over 250,000, no, over 30,000 add-to-cards a month.

4:46 - Nativ Yanko
And the 30% take rate, so 70% are adding to copy.

4:51 - Rakesh Guduru (PETL)
Yes.

4:52 - Nativ Yanko
70% times 30,000 a month, that's 21,000 people that are just forgotten about.

5:00 - Rakesh Guduru (PETL)
Somehow we have to, that's why I'm hoping with this, whatever, one of these guys will get and they kind of turn that knob up. So then we'll see some real, real traction with revenue. Agreed.

5:18 - Nativ Yanko
Cool. But let's jump in. I think the best place to start is probably like on the creative. Oh, yesterday. Have you seen yesterday?

5:26 - Rakesh Guduru (PETL)
I know you guys are doing analytics or not, but yesterday we got an order for 500 units and I took it. Oh, wow.

5:35 - Nativ Yanko
What, like a... It's a B2B order.

5:38 - Rakesh Guduru (PETL)
They want to give away as a gift. So I gave them 30% discount and I took 500 units. Yeah. From an ad? Yeah. There's no other way, right? Yeah.

5:52 - Nativ Yanko
We could make more of that. think. Yeah. Essentially something we can speak about today. But yeah, Grace, I'll let you kind of share. Yeah, no problem. me just share my screen real quick.

6:15 - grace oguntuase (NSY Digital)
Just give me one second.

6:20 - Rakesh Guduru (PETL)
Can you guys see this? Yes. Okay, perfect.

6:24 - grace oguntuase (NSY Digital)
So we've currently got the batch five ads in the pipeline. So we have a lot of filming briefs that the creators are currently working on. We have some for Jared and some for Amy as well. They just got their shipments of the PETL plus and the new colors as well. So they're working hard on those. We're hoping to receive the content I think the end of this week, if not the start of next week, hopefully. We also have a few edits as well. We have this black back in stock video that's like around stock

urgency. We have a few statics that are also in editing as well. And then we have a from Round 5 that we've also launched. So everything seems to be going smoothly, which is really nice. In terms of ideas for Batch 6, I've already had a think about what we can do there. And actually, I got a few ideas from the Pell Analytics board that you guys made. So I think that this one would be really good. The top three charging mistakes iPhone users make. So you already know that the top five best power banks angle is working really well. So kind of like going towards the negative here about like starting it off with like the mistakes iPhone users make. That might be something that could perform well. Also, from what we've seen in your ad account as well, the whole like price discount angle works really well in static format. I'm thinking we could do something in video format instead. We could possibly get a UGC creative film, you know, like something like this. Like I'm 62 and I finally ditched my cable mess. It charges your iPhone, you know, your watch, AirPods. But it's like But like the main point of the angle is around how the products are discounted. So we could potentially see if that, if the whole discount angle works in video format as well. Some other ideas here are targeting the mail. On that note, Grace, for example, PETL makes it easy to do bulk orders.

8:23 - Rakesh Guduru (PETL)
Like that's how the hook should be. Like, for example, hey, how do you give to a team? You have to go on an Amazon and pay a full price or go on an anchor.com and pay a full price. But PETL does business different. They give a bulk discount, something like that. Play on that note because there's no way today they get bulk discounts directly on the PDP, right? Everybody has to call someone and do all kinds of stuff. I think we have to somehow say PETL makes it gifting easy or something like that or incentivizes you for buying more. All right. So maybe some angles. Yeah, definitely.

9:03 - grace oguntuase (NSY Digital)
And actually that goes back to the B2B point that you made earlier. I think that would be perfect for targeting businesses. Like you just said, you got an order of 500 units. So potentially targeting those businesses with the bulk discount framing, I think that's something that would perform well as well. There's some other ideas here, but I'll definitely need to have a think later about what other angles we could do for round six. Do you have some ideas even, Rakesh, about what we could do? I think this is perfect gifting.

9:38 - Rakesh Guduru (PETL)
I think I want to focus. These tickets are massive. I think that's one of the ways we get a better ROAS. And also I think some back to school I'm testing. I don't know the data. I haven't seen the recent data. So we've been launching some, we launched some statics on back to schools type of stuff. We'll take a look at how that's doing. And I did some competitive videos, which I can show you quickly. It's not, I mean, I still haven't transferred you, but I think it came out really nice. So we kind of did, what is the comparison between the pedal and the Petal Plus? I think that came out really nice. But I think on the top, like, overall account, I think we were, like, if you see one of the killer videos we've been working, at some point, one creative takes, like, off, right? We don't know which one. So we, so far, like, this one, this one is saving our . So far, it's been working so well. But the raw is kind of, the first one, the top five. That's the 48, yeah. Yeah, that's been, after, after Father's Day, like. The Father's Day Amy's, I guess, that works insane with the best row acts. But after Father's Day, because she was focusing on gifting to a husband on a Father's Day, right? I think the gifting angle is somehow working. And because it's not a Father's Day, we didn't have any other occasion to push PETL. But this came back off that and somehow gave enough momentum to our ad account, for example, the 30th. So I think that, so where I'm going with this is somehow we have to feed this top creative.

There's no other way we know, like, right? So I think if we push in this gifting, which is very generic, actually, it doesn't have to be a Father's Day, right? It could be any day. You could appreciate somebody. I think we have to push that. Alright. Angles, I think that's gonna, that's gonna work worse. See, we got Petal 48, this one, Top 5, it's kind of explaining the, pretty much, are you sharing your screen? Oh, I'm not sharing the screen, okay. I think she, pretty much, I'm looking at what Gray's looking at. I'm just changing my view, right? It's a last 30 days. So, this last 30 days format, if I'm seeing, if you see, this guy just took over almost 3,000 purchases, right? Yeah, 123k spent. Yeah, it's a killer ad. So, now, the Claire version's gonna go live today, I'm excited about. Then, this discounting stuff, abundant discount is, is doing good. Then, Claire came in, and we just pumped this, I think, a week ago or something. And, it's pretty much about the unboxing and the new color launches, right? Right. So, and some of the statics have been, look, 3.21 ROAS with 168 purchase. It's just very good. We haven't, we haven't did anything like this. I think showing how small it is or something like that. This is giving us a good ROAS and good purchases as well. So we tried some unboxing and everything. I think it's just, we need more creatives. Somehow we have to feed it in a way that every month, at least we have something very strong. I think that will, that's the only way this account can go like flying. Yeah.

13:44 - Nativ Yanko
Creative volume and just winners from that volume as well. And obviously if you increase volume, the likelihood you're going to find a big one increases. You make bets basically. Yeah, we are making bets. You're making more bets bets.

13:58 - Rakesh Guduru (PETL)
bets in the account. next time.

14:01 - Nativ Yanko
I think the ones that Grace has, they're going to smash it, specifically like the, let me get it up here, PETL, it's so hot in here, I probably need to go outside. Damn, get up, damn, UGC doesn't have any AC? They have AC in my office, but I'm in the, I'm in like the cool room, where you take calls. I'm boiling, but we used to get up, like a fan, like, even though I have AC, I always have a fan.

14:38 - Rakesh Guduru (PETL)
Oh, yes, yes.

14:39 - Nativ Yanko
It's just weak, it's like, you know, and it's, again, I always say it stinks in here, it smells like BO, but I think, did we make Grace, you know that we're winning ad that we've got for Galbraids, the static, where it's like.

15:00 - Rakesh Guduru (PETL)
It just went live yesterday.

15:02 - grace oguntuase (NSY Digital)
We asked, you delivered or something?

15:05 - Nativ Yanko
Yeah, that one.

15:06 - grace oguntuase (NSY Digital)
I think that one's going to do well. Yeah, I agree. I think that's going to do really well.

15:10 - Rakesh Guduru (PETL)
You're talking about the statics with all the pop-ups, right? That one? Yeah.

15:15 - Nativ Yanko
Yeah, yeah, yeah. We've got this ad that needs to be launched, the Claire one. We're going to get that launched in the account today. I'm trying to think of any other concepts. How about the concept around giving it to your kids so that they always have batteries so they can communicate with you? More like a safety angle. Their phone never runs out of battery. Yeah, I think that would fit into the back-to-school angle that Rakesh was talking about.

15:49 - grace oguntuase (NSY Digital)
Yeah, yeah.

15:50 - Nativ Yanko
And when, Rakesh, do you think the tracking in the PETL is going to come out?

15:55 - Rakesh Guduru (PETL)
I think I'll push that to 27. I'll show you. Maybe some of other pipeline products I'm working on, but that's a secondary, right? So I'll show you some of the good stuff that's coming, man. Because the way what I'm thinking to build Petal is, we have this, of course, a power bank, right? But ecosystem around it, so people are like, hey, I need this. They have so many other cool things, and there's always a way to upsell this guy. I think you should be able to, you sell wires, right? No, we are not selling wires yet, but I want to sell wires, yes.

16:34 - Nativ Yanko
think you should sell wires, like, oh, let me just throw in a wire with this as well, like a charging cable. I think you should have a charging cable, a booking station.

16:45 - Rakesh Guduru (PETL)
Yeah, we are selling like a keychain cable, on those way, it's fine. We're actually doing good. If somebody adds like one of those keychain cables, then it pays for my fulfillment. Okay, interesting.

17:02 - Nativ Yanko
then on shipping, what's shipping time?

17:07 - Rakesh Guduru (PETL)
Shipping, we kind of try to fulfill the same day if it comes before 12 noon. Same day? Same day, 12 noon, or next day after 12 noon, yes. Okay, so you've got that lockdown.

17:21 - Nativ Yanko
That's great. I think that's one of the reasons you have quite a good, one of the reasons you have a good conversion rate. I would say we should potentially make an ad around that. You've got your trip tomorrow, you've got your flight, your summer trip, get a petal so you're stocked up for your summer trip or something like that. Or like a situational where someone's in, I don't know, Morocco, in the middle of the desert, on a camel, and they don't have a charger, kind of like Grace was. She was a Morocco on a camel. Like a situational, you brought your petal. Yeah, it was very helpful. should have. Grace was. was a UGC creator. should have made some UGC. Yeah. Like more of these like situational angles, think we can test.

18:07 - Rakesh Guduru (PETL)
Yes. Yes.

18:10 - Nativ Yanko
Around travel. Yeah.

18:13 - Rakesh Guduru (PETL)
But remember, Chris, we also thought about that gifting. I know we made for Husband Fathers Day. Remember Nativ told you to change the, remove the Fathers Day and refire it? I think we should do that. Yeah. Yeah. Amy's. That was a killer. Last month. Yeah. month. June, that did so well.

18:36 - grace oguntuase (NSY Digital)
I definitely plan to do something like that for, especially for Q4, because if we remove the Fathers Day and just open it up, it has so much more potential for, to do well. 100%.

18:48 - Nativ Yanko
I think for Q4, we're going to smash it because we can just take all of our winning ads and put like a little banner, like Black Friday banner.

18:58 - Rakesh Guduru (PETL)
Yeah. Great spending. spending.

19:00 - Nativ Yanko
And anything we did for Father's Day, we can just change the narrative to Black Friday. We're going to have a huge, huge, huge Black Friday, in my opinion.

19:10 - grace oguntuase (NSY Digital)
Yeah, we can even take, like, all of the top performing ads and then just do that thing we do for other brands, where we put, like, a banner on top and just put, like, the discount. Exactly, exactly that.

19:20 - Rakesh Guduru (PETL)
Yeah, I'm trying to think of any other angles. Like, what about these doctors who are buying, right, for their staff? So gifting for staff, I think it's huge. A, don't gift something nobody uses. Your phones, batteries, is the most important thing your staff or your team needs. I think we've done that.

19:47 - Nativ Yanko
We've done that, but not for doctors. We've done the one, Grace, if you remember around the tie, you can buy them a tie, you can buy them all these things. So this is the one that you actually use. Have we done that? I think we have. No, no, no, no, no, no, Thank In batch one, I think.

20:01 - grace oguntuase (NSY Digital)
That was for, like, a wife buying for a husband. I think Rakesh means, like, businesses, like, buying for their stuff.

20:08 - Nativ Yanko
Yeah, I know we didn't do it for business, but I'm saying that concept, that was, like, wife buying for the husband, did that do well? Very well. Yeah.

20:20 - grace oguntuase (NSY Digital)

I mean, they kind of did wife buying for husband for Father's Day, and that was a top performer in June.

20:27 - Rakesh Guduru (PETL)
Yeah, okay, I remember that. Yeah, that's Amy's point, right? Yes. Okay, yeah, so that's the one I was referencing.

20:35 - Nativ Yanko
I say we just do that through a doctor's frame, or, like, it doesn't have to be a doctor, through an employer's frame. Yes. Like, buying for their team, buying, like, yeah, like, more like the corporate, corporate gifting. Bro, you were in that boiler room with the door closed, man, forget it. If only you knew how hot it was in that corner. But yeah, I think we should do more of that because it's a proven concept. Now we just have to change the point of view.

21:07 - grace oguntuase (NSY Digital)
You definitely work in those breaks for next month, the whole B2B angle. Nice. I think that will do really well.

21:14 - Nativ Yanko
And then yeah, Mokesh, from the media buying side of things, what's the goal in terms of spend for August again? Okay, let me tell you that right now we have it.

21:26 - Rakesh Guduru (PETL)
So we are expecting for August, daily spend $16,000 almost. Yeah.

21:39 - Nativ Yanko
Okay, because we're at like $11,500 now. Yeah. I told Charlie to keep pushing.

21:45 - Rakesh Guduru (PETL)
Don't wait until August. He should be pushing right now. Tell Max to.

21:49 - Nativ Yanko
I think one of his objections, because I spoke to him, one of his things was like, if you scale too quickly, can shock the system. I think we can incrementally. Yeah, do it, do it incrementally, like up to 10% is allowed, right, yeah. Yeah, okay, interesting, yeah, because, yeah, last 14, let me just share my screen, because I also know how to do media buying as well, so I can manage this, but 148k at 1.91 ROAS, how do you feel about this right here? I think the Blender is about 2.2.

22:27 - Rakesh Guduru (PETL)
And that's within KPI? Yeah, yeah, key, the thing is, I know it's not ideal, but we gotta keep pushing, so, and we have to make sure we are in our sweet spot, which is 15k, so the thing is, see, right now, if it's, oh, Charlie looks like increased a little bit, right? Yeah, so maybe if we keep increasing, so we hit somewhere very soon. you. Thank $15,000, $16,000, then we can hold throughout the August, right? Let it optimize, let it do all kinds of stuff, but at least we are ramping up. Yeah, we're not ramping up the last second, we're being proactive with it, and then by the time we get to August, it will optimize around that. Yeah, exactly. And throughout August, we can hold that, and not throughout August, three weeks of August. Last week, again, we have to be scaling to our August, September. September, we are looking for like 23 spending. So, yeah, so.

23:39 - Nativ Yanko

Yeah, we'll need to increase creative volume then, because like how many creatives do you make a week or straight a month in-house? We are giving Charlie almost one every day.

23:50 - Rakesh Guduru (PETL)
could be either static, or it could be a UGC, a video. Like one, yeah, probably 25, 20, 25. But he has a hard time deploying them. I don't know. He thinks we will shock the system as well. But if we have a group in going on, and if we are putting everything in the groups, and the groups cannot be increased, right? If we have like eight or nine groups, make sure each of this ad goes into, fits in one of this group, then I think it's okay if we kind of, but the creative needs to be, it cannot be the same thing. Then it's, yeah, Antrimeta rewards diversity. And also that's the only way we find the low-hanging, only way we test, right? It's all about testing, testing, testing. So somehow, I don't know how you guys are, I don't think anybody is aggressively pushing like that, but you have more experience in that. I don't know.

25:00 - Nativ Yanko
Yeah, because we have one other, we have a few other clients aggressively. We have clients that are spending, again, like 2.5 million. So we see what they're doing. We also have clients that are like scaling somewhat as quick as you. We have one that last month, they're probably spending 9k a day. Now they're spending like 17, 18k a day. They're called Mariah Clinical. Yeah, they had a similar situation. Like one of our struts just made a killer, killer, killer creative and it's just boosted up the account. So it really is just finding that those killer creatives a month that just keep the account up. It's almost like we need to be finding those every month.

25:41 - Rakesh Guduru (PETL)
That's, I think that's, that's, that's, our golden cues. We need to find that killer angles, which will just pipeline the account, feed our spending. Then, then we can scale. There's no problem. And I have inventory. You saw the inventory right now. Which can support up to September. have inventory to support our September as well. Right now, buying for our October. I think we just have to find those angles. Grace has a lot of thinking to do. I don't know if she can sleep at night. Yeah, we'll figure out.

26:21 - Nativ Yanko
No, we've got it covered. Cool. Sounds good. But yeah, we'll keep a close eye. I'll be keeping a very close eye on the account. We'll be incrementally increasing spend where we see fit. I'm going to be looking at the blended numbers. And then, yeah, we will have more ads. I'm excited to see how this Claire ad performs. We need to get a launch in the account. Yeah.

26:43 - Rakesh Guduru (PETL)
Grace, don't forget last time we discussed about iPhone launching their product. And it's going to be expensive. Don't switch your phone. Just buy Petal, you know? Probably. Yeah. think I'm going to go around, though, actually. Nice.

26:58 - Nativ Yanko
Yeah, it's called New iPhone Drops.

27:00 - grace oguntuase (NSY Digital)
And your battery dies. So it's around that angle anyway. Okay. Yeah.

27:06 - Rakesh Guduru (PETL)

I think those kind of diverse angles might help us. Then hopefully Toby can fix our email stuff or somebody, whoever, Toby or Eli or then I think then we can capture from all angles. Yeah, he'll be firing on all fronts and we should see the blended on like Shopify go up.

27:28 - Nativ Yanko
And like the discrepancy between Meta, Rev and Shopify, Rev get bigger and bigger. So like 1.9 on Meta. However, like 2.5 on Shopify, 3 on Shopify.

27:41 - Rakesh Guduru (PETL)
Because we're getting those repeat purchases.

27:44 - Nativ Yanko
And then we become like less and less reliant on Meta, which is like... There was one this morning I saw.

27:52 - Rakesh Guduru (PETL)
Oh my God. This guy bought so far four times. And the last order he placed, the latest order he placed to... Today was for six pedals, and that was his fifth order, or fourth order. Do you know what he does? Have you messaged him?

28:12 - Nativ Yanko
No, I haven't messaged him. I would email him.

28:16 - Rakesh Guduru (PETL)
He's probably buying first. Yeah, it was this one. See, John Feinberg. So if you see fourth order, like he's me, he just bought one. Then May 24th, I think he bought five. Then he bought four. Then he now bought six. What's his email? Maybe he works for a company. Yeah, okay. His email is, you want to send it?

28:45 - Nativ Yanko
No, no, you can. Let me find him on LinkedIn. John Feinberg. Yeah. Let me chat. Let me text over.

28:55 - Rakesh Guduru (PETL)
I would say email him. Hey, thanks.

28:58 - Nativ Yanko
Okay, okay. Interesting. There was a few John Feinbergs. This is going to be very, let me share my screen quickly. Yeah, this guy is in Boca, which is Florida.

29:09 - Rakesh Guduru (PETL)
Yeah. Boca is an affluent neighborhood. Oh, okay. There's a guy at Samsung.

29:15 - Nativ Yanko
There's a guy at Palo Alto. Yeah, but that's UK.

29:18 - Rakesh Guduru (PETL)
That's a UK guy. It's not in Florida.

29:21 - Nativ Yanko
Let's say. Show off. Press show off. Yeah.

29:25 - Rakesh Guduru (PETL)
Oh, I don't have a. Yeah. Well, I would email them and say, hey, thanks.

29:30 - Nativ Yanko
Like, what made you buy so many? Just, like, get some customer feedback, maybe. Yeah. Yeah, like, really. I got to be doing more of that.

29:40 - Rakesh Guduru (PETL)
mean, yeah, I need to understand who the hell is this customer, right? And there are insights here.

29:47 - Nativ Yanko
There's insights that we haven't. Oh, it looks like he's a doctor, dude.

29:52 - Rakesh Guduru (PETL)
Why do doctors like your product so much?

29:54 - Nativ Yanko
Yeah, he's a doctor, Boca.

29:58 - Rakesh Guduru (PETL)
Yeah. Yes, his doctor. Yeah, what's it with his doctors? I have no freaking eye look. You're seeing, right? Yeah, John Freyberg.

30:12 - Nativ Yanko
That's a spoken guy. Yeah, this guy is a doctor.

30:16 - Rakesh Guduru (PETL)
Who is age? 65 plus. Yeah, all of this. That's it. How do we tap into this? How is Meta feeding these customers? I don't understand. So, like, is this the guys who are buying a product? And if these guys are buying, how can we reduce their pain, right? So all the 65 plus people or 60 plus people, what is their pain? That's what I'm saying. In my opinion, you should email this guy.

30:43 - Nativ Yanko
Hey, John, really appreciate you buying this many. Would love to just ask, like, what's the main reason you're buying it? Like, you're a very good customer. He's like, oh, like, I work in a...

30:55 - Rakesh Guduru (PETL)
He'll tell you why he's buying it. I'm going to take... There's guy...

30:59 - Nativ Yanko
There's a guy... I don't know if you're on Instagram much. There's a guy called Greg. Do you know a brand called Bloom Energy? No. I think I know Bloom.

31:11 - Rakesh Guduru (PETL)
It's a drink brand.

31:13 - Nativ Yanko
basically, on Instagram, there's the founder of Bloom, and we've made a video around, like, just do the unscalable, especially if you're under, like, a million a month, 1.5. Just email and speak to your customers like a madman. I understand why exactly they're buying. This can feed directly back into what Grace and I is doing. What I would recommend is, like, email all these customers and then get Claude to put this into, like, a bank or something. And we just get customer feedback because that's one

big thing we're missing right now. We're not getting too much customer feedback, which could, one, feed the ads, number two, feed what your product development is as well.

31:52 - Rakesh Guduru (PETL)
Let me see if he wrote any review on our website. Yeah. That's so we can see what is he thinking about.

32:07 - Nativ Yanko
We could get an ad from him maybe. I doubt it.

32:18 - Rakesh Guduru (PETL)
Yes, I think. And you guys, no, he didn't write any review at least. I don't see that. But go through that reviews as, are you going through some of these reviews, Grace? Yeah. I feel like either. Nice design, cool from overheating, yeah. Cool from overheating. Wow. Yeah, pedal too, we improve so much, it doesn't overheat at all, so.

32:52 - Nativ Yanko
Yeah, because that was the problem that I saw. Not problem, but I just noticed it got hot. Yeah, it gets, it's just that.

33:00 - Rakesh Guduru (PETL)
It's a normal battery. It's just battery physics, right? So what we did with Petal Plus was we are throttling using a software because people are not complaining about the power, how slow or not, but they don't want to feel it hot. So we are intelligently doing through the software, actually, because Petal Plus is more powerful, right? It's 15 watts. So Petal was 10 watts, it's 15. So it's already very high power charging. So whenever it's kind of going too hard, we kind of, with software, control the power. Okay, that's really cool.

33:37 - Nativ Yanko
Okay, cool. I think I'm noted that, I think, Grace, don't know if you have any other questions. No, I think I'm good at everything.

33:47 - grace oguntuase (NSY Digital)
Nice.

33:48 - Nativ Yanko
Any questions for us, Rakesh?

33:52 - Rakesh Guduru (PETL)
I think if we were, like, I think if you... Focus this gifting, and I think could be bigger going into the holidays. I don't know. We got to have to find those killer deals. don't know. Like, the situational was working very good, too, at the airport. I don't know if you remember. Yeah. We have to find more situational.

34:19 - grace oguntuase (NSY Digital)
Yeah, I definitely have a think about it. I think there's lots of different situations that could apply.

34:24 - Rakesh Guduru (PETL)
Let me show you this account. Do you guys have one minute? Yeah. Okay, let me show you this product I saw recently called Pebble. It's, and it's, it's been, yeah, yeah, I think, is that the, the phone cable thing, right? Yes.

34:44 - Nativ Yanko

Is it? No, it's the recorder on the phone, right?

34:46 - Rakesh Guduru (PETL)
It's like a, no, this was a phone cable thing. So, so you can bind the cables. And damn, dude, it's been doing so well. Yeah. Well, Yeah. People and their creatives are kind of silly. I think we're talking about this.

35:05 - Nativ Yanko
There's one, what is it called?

35:08 - Rakesh Guduru (PETL)
Oh, this is it. Automatic magnetic cable. Let's go to Instagram. There are 40,000 followers, and it says actually sold out. But the reviews are only like less. I don't know. This could be gimmicky, but I kind of like their page and the angles. Like if you see how they're, I think I need, I can log in, hold on. So I think this page has a very good content for, I think it's very, I might be totally wrong. He could have, he could have, this might be an old account. He switched it. I don't know what, but UK made whatever, right? And launching it says this, but somehow they have this. But the angles are really good. And look at the video creators. Hmm. yeah it's good bureau yeah so it's like a beetle the product is but i don't know somehow they have this following uh came into my feed the ads are good yeah we need something crazy like i i know he has a good product i guess i think that product's not good it looks better the visuals are great i think the visuals are are great look look at he's doing like this can you send that yeah yeah i can send you the uh his uh later to share to uh copy link below here yeah just look at them yeah that that guy was good and uh and i sent you one more i don't know if you sent saw in the slack Let me see. This one was also a very good creative I found. It was insane. Oh, Jesus. I'm kind of going over time, but just two more minutes, if you can bear with me. Oh, yeah, this. I know I messaged you guys. Oh, this one. Yeah, have you seen this ad? This is a killer ad, man. half a million likes. Oh, wow.

37:41 - grace oguntuase (NSY Digital)
Oh, I think I've seen that spatula thing. Yeah.

37:45 - Rakesh Guduru (PETL)
Yes, it's a spatula thing. Yeah. But I'm sending you this too. There's another really good ad. That's a creative V1. This will take our account to $4 million. All right. you. Look at the lights.

38:02 - Nativ Yanko
Yeah, let me show you one other ad from Alex Cooper. think you know him, Grace. Yeah. There's a brand called Carpe. If we have an offer, we can do something creative like this. Okay, let me see.

38:29 - Rakesh Guduru (PETL)
It's like this guy's explaining why this ad is so good.

38:33 - Nativ Yanko
Yeah, I think that it's just visually really cool. It's like Mr. Beast style almost.

38:53 - grace oguntuase (NSY Digital)
Yeah, so the angle would be like the creators reacting to content then? No, no. So if you watch that video, it's like...

39:00 - Nativ Yanko

And basically, it's like a famous BMX guy. And it's like a challenge. Every single spin of his, I don't know, I don't even know what to call it. The handlebars is a percentage off. And he spins it like 56% off. And then, oh, okay, I'm going to give 56% off on Carpe. And it's like very, very, very, very engaging. It's their top performing ad. That's crazy. Just something, yeah, it's something very creative around that, like out of the box thinking.

39:28 - Rakesh Guduru (PETL)
But check out the second Instagram link, Nativ. That guy is explaining the product like it's a freaking statue. Sales, man. Yeah, yeah.

39:43 - Nativ Yanko
It's like, you know those TV ads? Yeah.

39:52 - Rakesh Guduru (PETL)
It's actually on TV stuff, right?

39:56 - grace oguntuase (NSY Digital)
They, it's like literally like it's, they've got their phone number at the bottom and it's just like.

40:00 - Nativ Yanko
Yeah, yeah, yeah, absolutely.

40:02 - Rakesh Guduru (PETL)
They have to call in, yeah, yeah. It's like QVC. QVC type stuff. That's all. By the way, QVC is on my , but I'm not selling to them. They want us to sell a pedal to QVC, but I don't want to go through QVC. Because the payment terms, they pay after freaking 60 days. We don't need that. We can scale through Meta a lot. Yeah, exactly. That's old school. That's old school.

40:34 - Nativ Yanko
We're the new age.

40:37 - Rakesh Guduru (PETL)
Cool. Sounds good.

40:39 - Nativ Yanko
Excited about this. All right, guys.

40:43 - Rakesh Guduru (PETL)
Let's keep going. Yeah. Letty, Grace, if you want, you can jump off. Letty, I know there are a bunch of AI recorders over here. Do you want to, let me call you on WhatsApp, okay? Okay, cool. Just minutes, all right? Thank you. you. Bye.

NSY <> PETL - Bi Weekly Strategy Call - April 22
VIEW RECORDING - 48 mins (No highlights):

0:01 - Rakesh Guduru
Then I will send, like I'm doing, Charley has already got it on top. Maybe we can explain the flow to Camila as well later, or I can walk her through. So then Charley can push those bottom, like bottom of the funnel, Charley, people already visited our

site, they kind of know our products. So only these offers we are showing them, like 30% off, 20% off, if they buy two more, that kind of stuff, right? So you're saying we only send this to the bottom of funnel, you're saying?

0:36 - Nativ Yanko (NSY Digital)
Yeah, exactly.

0:39 - Rakesh Guduru
Why not also top of funnel? Only creatives offer top of funnel, yeah, offer, offer, like 30% off creative, right? In the creative saying 30% off. Yeah, it's been working, yeah, for example, there is one, like creative, this one works. Oh, okay.

1:00 - Nativ Yanko (NSY Digital)
I'm pulling it. Let me see if I can pull it.

1:03 - Rakesh Guduru
Yesterday, I sent it to Alberta. Hold on. For example, this, I'm pulling it right now. This creative works great. And it has, I mean, Charley can confirm as well. This one works fantastic at the bottom of the funnel. It has, like, sometimes even, like, a 7 or even 10 ROAS. So this, so Camila did some variations. Alberta did some variations. So now we are doing, like, focusing on 30% as well. So building all these creatives. So these offers, we are not showing them at the top of the funnel because they have no idea what is Petal at this point, right? So that's why. Yeah, definitely.

1:51 - Nativ Yanko (NSY Digital)
Yeah. That is the right way to go. That's what we do for other brands as well. And then a lot of Grace's content will be that top of funnel. Yeah. And new people into the funnel. Cool. Sounds good. Any other points on the meta side, Charley, in terms of ad buying?

2:09 - Charley McDonnell
The only other thing was, let me just show my screen again, just to show you. It's a little bit easier. So we obviously want to really focus on going after net new people, getting net new customers through the door. You'll see that's going to be how you're going to grow. There's no point of spending money on people that have already bought. So in these new ad sets in this campaign, in the old ABO testing, and also in our new campaign as well, you can see you've got this feature up here, which is the customer lifetime cycle strategy. So essentially what you can do is you can explicitly tell Neta now that you either want to go after just getting more conversions, so whether that's people that have already bought from you or whether that's new people, or you want to explicitly go after net new people and new customers. So we've switched this on to acquire new customers, and then that should help drive the... The net new customers through the door. obviously that's going to be how we're going to grow rather than spending more budget than we need to on people that have already bought. Yeah, that makes sense.

3:10 - Rakesh Guduru
But in those campaigns, if you see any of our, like click one of the testing UGC campaign. Yes, go to the campaign level. Let's see the campaign settings, right? Yeah, go to edit. So here, if you keep scrolling, I have an exclusion.

3:31 - Charley McDonnell
This will be, yeah, it will be on the ad sets. Oh, okay. Down here somewhere. tend to hide it, so it should be down here. Yeah. So essentially, it's very similar. So

basically, the only difference is, basically, it's excluding it already, but it's also going to tell Meta explicitly that you want to go after new people. So it's a little bit more of a cleaner way to do it. So similar. I think, but yeah, it's good to see that that was in place anyway. Yeah, I think that's it from my end. Obviously not too much to really discuss, just, yeah, just got to let's turn the flow through. Yeah, yeah, interesting to see how things will start to perform.

4:19 - Nativ Yanko (NSY Digital)
We've also got the creative side, so Grace, I'll let you walk through the deck we have, and then we can go into this, like, brainstorming session as Okay, let me just share my screen.

4:34 - grace oguntuase
I prepared a short report to go, like, in detail about the performance so far and then what we can do for future performance as well. Can you guys see my screen? Yeah, can you make it full screen?

4:50 - Nativ Yanko (NSY Digital)
Full screen? This little tab, see in the top left of it, you just have the expand.

4:57 - grace oguntuase
Okay. On the top. Yeah, I know.

5:00 - Rakesh Guduru
On the actual, like, Notion page.

5:03 - Nativ Yanko (NSY Digital)
Oh, okay.

5:04 - grace oguntuase
Yeah, yeah, there. Can you guys see this? Yeah, it's a little bit blurry.

5:11 - Nativ Yanko (NSY Digital)
Maybe, can you, like, unshare and then share the specific tab, the window? Let me try that.

5:18 - grace oguntuase
Hold on. Sorry, my laptop's, like, really laggy for some reason. No worries. Maybe let me try to get it up as well in the meantime.

5:38 - Nativ Yanko (NSY Digital)
Can you guys see it? Oh, yeah. Perfect, yes. Cool. Perfect. Perfect.

5:43 - grace oguntuase
So this is just a little report that we prepared. So Charley already went in-depth about, like, the ad account analysis. I'll just, like, quickly run through where we are today. So the account today, a 2.16 ROAS on average, almost 300K spent, 9,000. Purchases average CPA of $30. Our single biggest revenue ad is the ad one, which is Claire All Charger ad. This one has spent over $52,000, almost $120,000 in revenue. Our most durable creative franchise or our most durable angle is the competitor comparison, the us versus them. We have 17 live iterations in the account for this one, and it's holding really strong ROAS of above two. The highest ROAS angle that is quite underscaled, and you'll see in the rest of the report, we'll go into detail about what we can do here. The situational angles, this one has quite a high ROAS as well, but we don't have as much iterations of this one. So it's quite a big

opportunity to scale there. Then, in terms of what's not working in the account currently, so just did a quick review of the account. and saw that the Mother's Day creatives, the ROAS there is not quite strong, so they're under-delivering, the low battery anxiety ads as well, and the ASMR formats, they don't really resonate with this demographic, which actually does make quite a lot of sense, since the demographic does kind of skew much older. Um, cables concepts, so concepts are just focusing on the, like, cables, um, how PETL replaces messy cables, those don't really perform that well as well. Um, then in terms of insights driving around three, um, as I just mentioned, our highest converting demographic is between 45 to 65. Um, Meta does skew female when female creators are in the head.

7:45 - Rakesh Guduru
Uh, Grace, uh, in this Instagram reels, my, my motivation over there is not at ROAS, I'm growing followers over there. Okay. So we were able to grow, like, at 10,000 followers, so that, we should never... That is not that we should eliminate from our sales calculations, right? So that is a totally different goal for us. It's only to grow our following. That's actually a good point. It's more like for branding. It's nothing. It's not for sales. It's a good point, though.

8:19 - Nativ Yanko (NSY Digital)
The way we need to review the ad account is we don't just look at the bottom row house because we've got, as mentioned, Rakesh, like spend going towards ads that are not optimized for purchases, but growing the Instagram following so that in the long term, it drops our CAC. It's more trust. Yes, exactly.

8:40 - Rakesh Guduru
And also, in two years, we want to exit. We cannot exit. We cannot find a buyer with like a thousand followers. We need to, if it's a hundred thousand followers, we might sell. And this is one.

8:54 - Nativ Yanko (NSY Digital)
Yeah, carry on. And also trust, right? People increase the trust. If you have more.

9:00 - Rakesh Guduru
Follow us. The trust is insane. So it's more for like a long-term brand strategy than sales.

9:07 - Nativ Yanko (NSY Digital)
Yeah. And this is what we spoke about when we first started Rite Request. It was like, we want PETL to be like the name of the industry. So, oh, let me go and get an Uber. Let me, let me even Hoover. When you use a Hoover, it's actually called a Hoover. The brand was called Hoover. So we want this to be a petal. Like, oh, where's my petal? So I think building that Instagram following, that's how we become synonymous with the product. Petal is the product. Same way Bic is the pen. Hoover is the, is the Hoover, et cetera. So, yeah, I like that. And I actually think in our advertising, this is more Camila on your end, I believe with like the statics, we can, we can really lean into that. Like, I don't know what I would do without my petal. And really like just petal is the name of the actual product, not just. Name of the brand. Yeah, I'll leave you to it. I agree, yeah. Yeah, I definitely do agree as well.

10:07 - grace oguntuase
Roaz is definitely the least important thing when it comes to building your brand, building Instagram following. So where was that? I think I was talking about the delivery. No, I think we're not on the highest converting demo. Yeah, actually. I think you already spoke about this. Oh, maybe I'm wrong, yeah. No, it's fine. I can

just repeat it. So as I said before, the highest converting demographic is the older demographic. So it does skew towards males and females. So that's why it's good that we are working with both male and female creators as well, so that we're hitting both of those demographics. But just going into round three, I think it'll be a very good idea if we focus more on older creators. In round one, and I think round two as well, the creators that we picked were on the younger side. So... Going into round three, we're just focusing more on this older demographic in terms of creators. Then my next point was Apple ecosystem buyers. So people that have iPhones, Apple Watches, AirPods, they're definitely the sweet spot with targeting for Peshul. And top survey hopes, so convenience or ease is 30%, travel 17%, portability 14%, and multi-device 13%, and reliability 12%. So this is just like what people are hoping to get out of the product. And top objections, which is actually very important, price being a big one, 47%, followed by skepticism, people saying that it's not on Amazon, 10%. So especially with price, it's just like really important for the ads going forward that they really do kind of just help to solve those objections. And those fears that people have. So that actually does go into what we're testing. So we're focusing on scaling proven winners with male creators. So the All Charger ad that Claire filmed, we'll be doing that this round, but with a male creator. So hopefully you'll be able to unlock a male SKU delivery. And then also the $8 Amazon versus $49 PETL ad that's working right now. So that one also goes into the price objection one. So this one with a male creator, hopefully this will perform really well. And then we're also going be focusing on scaling the highest ROAS angle, which is the situational pass angle. We're going to be focusing on more relatable everyday situations. So the one that did really well was talking about traveling. So when you're at the gate and you're about to pull up your boarding pass, which isn't really everyday. Relatable. So we're focusing. Focusing on scenarios like when you're at a coffee shop, your phone dies from a transaction, when you're at the grocery checkout store, or even at the pharmacy, your phone is dead at Apple Pay. Focusing more on males for the coffee shop one and females for the groceries, pharmacy one, as it is kind of a known fact that women do most of the shopping most of the time. Yeah, so then the next one is the new competitor comparison angle. So this Apple discontinued theirs angle. This one will position Pell as a successor to Apple's discontinued MagSafe battery pack at half the price, two times the capacity, three devices versus one. So this is a good opportunity for us to really just compare our product to Apple's and kind of just to let people know like why they should be purchasing Pell instead of Apple's. products or Apple's battery packs. Then the trust angle. So making some ads that are focused on trust. So this one, I don't trust Facebook ads, is a skepticism killer. This one, we're hoping that a female creator will be able to film this one, as mostly you'll find that women are more skeptical when it comes to purchasing Pell. And then as we're nearing closer to Father's Day, Father's Day gifting angle would be a good idea as well. In terms of statics, this one, bigger isn't better. This one addresses capacity objections. So we know that PETL has 3,000 milliamps. Meanwhile, competitor products could have like 10,000 or 20,000. So this will just really help to address the objection around why would I buy PETL when I could just buy your competitors that have way more So obviously, like PETL is less, it's easier to carry around. It's more like for certain situations rather than just carrying around a big bulky charger. The MagSafe battery Apple should have made, so this one's like a premium positioning statics. Then we did a lot of research, actually, and we found that a known fact is that airlines are going paperless. So this would be actually really good to push to the older demographic, since airlines are phasing out paper boarding passes. So it's kind of just like having your ticket on your phone is kind of just like it's something that you need to have. You need to have your phone charged at all times instead of having the paperback boarding passes. So we can kind of position PETL as a necessity. Just one, just if I can jump in quickly, I think one other...

16:00 - Nativ Yanko (NSY Digital)
The static potentially, if we go back to the bigger, isn't better. Rakesh, I know you mentioned that you're releasing the PETL Plus. Yeah. we brief that a little? That would be a big app.

16:14 - Rakesh Guduru
This is our new product, Grace, which we are launching in June, right? Let me see if I can find the product. I don't know where I can. It's actually almost the same size as PETL. So this, it comes in a new, this packaging, almost the same size of PETL, but it's 5,000, almost 40% more capacity than PETL. And also an unboxing experience, we're to kind of want to give like an apple, but you tear these lines off, you open it. So once you open it, there's a, there's a manual, right? So I don't know. Okay. I don't have like 20 everybody stole from my office, I don't know where they are, but now I don't, I have like two left, so I'm not opening the box, but it's like an actual kind of unboxing experience with manuals, cables this time, you're including a cable inside the box, I know with Oshina Pellet, we didn't, so we are phasing out this. You're phasing this one out.

17:26 - Nativ Yanko (NSY Digital)
both. I think it's packaging. Oh, packaging.

17:29 - grace oguntuase
I need to listen.

17:30 - Rakesh Guduru
So we are bringing the premium Petal Plus packaging to Petal as well. So the price here is always different, right? So Petal is a $54 product, Petal Plus is going to be $89 product. So the price ladder, I'm hoping not going to cannibalize Petal sales because there's a price ladder. And in September, we are launching like a $7. As well, it's the same circular form factor. So after that, after 7,000, we cannot do circular form factor anymore, like portable. We have to totally go into a different concept if you have to build more than 7,000. Till 7,000, everything can be slick like this. 7,000 will be this size, you say?

18:21 - Nativ Yanko (NSY Digital)
wouldn't be any bigger. Almost, almost same. Yeah, almost same.

18:25 - Rakesh Guduru
Because our pedal plus is almost same. That, Grace, that would be like a big one.

18:31 - Nativ Yanko (NSY Digital)
Like, you know what we did for Galbraids? You asked, we delivered. Like, you wanted more milliamps? We gave you that, basically. Or even with the colors, we can do the same thing with the colors. Because they released colors like two months ago. We can have like a bit of a late ad where it's all.

18:48 - Rakesh Guduru
So, for example, this is a pedal plus, right? You see? Almost the same.

18:54 - Nativ Yanko (NSY Digital)
Yeah, that's nice. It's good.

18:57 - grace oguntuase
Almost the same. And do you know?

19:00 - Nativ Yanko (NSY Digital)
This is 5,000, this is 3,000. Do you know like how long, because I think one thing that would be very compelling for me if I was buying this would be like, how many hours does it last? Can we say anything like that? Yes, we can say.

19:17 - Rakesh Guduru
We are actually working on the PDP. We will be launching, for example, let me see if I can pull up this block for you. So on the PDP, we are actually putting some specs so they can see right where our pricing is. So let me show like an article which we have, which kind of talks about the percentage, how many times you can charge each device type of stuff, right? So let me just quickly show you, block, okay. Okay, I'm going to find that, guys. I don't want to waste your time, so you can go ahead. Yeah, keep going. Grace. I'm pretty sure I looked at your website before.

20:22 - grace oguntuase
I'm pretty sure the 3,000 one lost about 10 hours. Is that correct? 10 hours of video playback, yes.

20:29 - Rakesh Guduru
Okay, yeah. Okay, that makes sense.

20:32 - grace oguntuase
In terms of other ideas, obviously a Father's Day gifting static would be a great idea since we're nearing Father's Day. more pocket angles, so like designed for your pocket. The scales are 2.46 ROAS with the Ultra Comp.

20:49 - Rakesh Guduru
And also, in design for pocket, actually, I see, rather than showing like the pocket, if you show like a coin pocket, where the coin Those are performing actually a lot better because they know the coin pocket is so tiny, it's not a regular pocket. So if they're seeing that it's actually be able to fit in the coin pocket, those were actually think like size comparisons can be a big one.

21:19 - Nativ Yanko (NSY Digital)
Yes. Like comparing it so people can really visualize how actually how small it is. That's quite a good idea. And also maybe we can also show like stack of credit cards, right?

21:33 - Rakesh Guduru
Like five credit cards. Yeah, like the thickness of it.

21:37 - Nativ Yanko (NSY Digital)
Yeah. How sleek it is. Yeah, I like that. Yeah, these are really good ideas. Grace, have you ever looked in the, have you looked much in the Ridge wallet at the camp? No, I haven't. Oh, we have Camila, by the way, she can give us some insights on Ridge.

21:57 - Rakesh Guduru
Yeah, so like Ridge is a very good.

22:00 - Nativ Yanko (NSY Digital)
When it comes to like how thin something is or how convenient, Ridge Wallet have an amazing ad account and it's somewhat of like, it's not a similar product, but it's like, it's like that, your whole utility angle. So yeah, definitely check I'll definitely look into that for some ideas.

22:19 - grace oguntuase
Then some other ideas for statics, the three chargers to one. This is like the competitor comparison visual. We've done a couple of these before, but just like thinking of ways we can like iterate on them, just like come up with other new ways of like doing it. And then the skepticism angle, I almost didn't buy this. This is similar to the, I don't trust Facebook ads video one that I told you about. So this is like a review testimonial addressing trust. So it could be like, I almost didn't buy this, but then, you know, I saw the reviews or something. And it made me purchase it. And And I'm. So just overall, we're scaling what already works with the Clare All Charger video competitor comparisons into new demographic male lanes with male creators, scaling underutilized winners, such as the situational past angle, scaling low-performing angles, Mother's Day, low battery anxiety, and replacing them with more specific triggers, making sure that every video is gender-targeted by demo skews, so like male creators for male coded scenarios, female for female coded, and then on Father's Day creatives. So that is just all the ideas I have in this report, any other ideas that anyone has. So just, if you have any ideas, just feel free to shoot them out. Camila might give us some ideas from Ridge.

23:58 - Rakesh Guduru
Yeah.

23:59 - Nativ Yanko (NSY Digital)
Yeah. Do you have any ideas?

24:01 - Camila López Darce
There are a lot of angles that maybe PETL can start doing. The angle that we were talking about, the thickness, the sleekness of the battery, that can be a really strong one. And same as the size, the size comparison, even the shape comparison can be a, it's like the main factor, I think that it's a little bit more between competitors, because we know that this is the first secular power bank. So if we can lean into that, maybe we can start doing some different concepts, trying to visualize that. I was like, one of the... The angles that I saw on the page that said three chargers equals one, I have always had this concern of like how are we portraying this angle because I think that three chargers, I mean like normally people have three chargers to charge their earbuds. Apple Watch and Nativ Yanko, right? So you're saying that you just need one pedal to charge them all. So I think that sometimes it can be a little ambiguous because I see that, I don't know, I try to think of the person that's what can be at and say like, oh yeah, I can charge all of my devices with just one pedal, don't know, I don't It's not typing simultaneously, or it's not like, you just can't charge all of them at once. And that's one of the angles that other power bands use, like that you can charge a lot of devices at once. So maybe trying to, I'm just saying that maybe we could try to lean into why it's just, why do you need just one charger to charge them all? And how is that, how is that important? And I'm not sure if I'm explaining myself. Yeah, I think I totally understand your question.

26:48 - Rakesh Guduru
So I can quickly jump in here. So what's happening is right now, like, people have all three devices, right? Like, usually, like, typically. The user has a watch, AirPods, and their phone. So say quickly they're going out, they have all these three devices, and if their watch runs out of the battery, they don't need like a watch charger, they can just put it on pedal, right? Which is like, of course, we cannot charge all at once, but quick convenience, you can use like a single charger to use power cords and all that type of stuff. So that's what actually, if you see our like

reviews, that's what people are excited about. Now, hey, I have one charger for all my devices quick on the go. So that's, that's resilient with the customer a lot.

27:48 - Nativ Yanko (NSY Digital)
 You can charge. One thing I think would be, like, I think one thing that almost has unlimited angles is the situational power. When we say pass, it's problem agitate solution. So, and it doesn't have to only be phone related. For example, the reason I actually have AirPods or wired earphones is because I just couldn't be, like, the pain of when my AirPods run out and I just hit the music, it would really annoy me. So that all basically solves that problem. So it's like Grace and Camila say, how creative can we cut? What creative ideas can we come up with? Because, like, Grace and Charley, you've probably seen this as quite like a, I don't know how to say it, but there's like that meme around the music in the gym. I don't know if anyone has seen it. Have you seen that before? The music in the gym is just the worst music ever. So we can basically lean into the memes. Like, you'll never have to be very creative. The situational angle. And in my opinion, that comes a lot from just swiping on TikTok. Go on TikTok, go on Instagram. If you see any cool ideas that we can potentially relate back to PETL, I think that's where we're going to see a lot of success. This is where we're seeing success, how we turn them into ads. Yeah, another idea on that as well.

29:26 - Charley McDonnell
 It's just coming to me, Simon, what you said about the meme. I don't know if you've seen, like, raw dogging flights, no more raw dogging, like, transport, that sort of thing. such a good idea.

29:38 - Nativ Yanko (NSY Digital)
 That could literally be a static ad. No more raw dogging flights. What is that, no more? Basically, do you want to explain the meme, Charlie? Yeah, it's like, raw dogging is like, people need constant, like, stimulus.

29:56 - Charley McDonnell
 So, whether that's on their phone, scrolling. So it's not this trend or meme going around with people who basically challenge themselves to get on a flight and just not do anything. it's just like leaning into the memes.

30:11 - Nativ Yanko (NSY Digital)
 It's like TikTok. I think it resonates with the younger audiences. That'll be interesting.

30:20 - Rakesh Guduru
 And also, if you see that Valentine's Day creative grace, it's actually three devices we are showing which can charge with PETL. That creative actually is like that angle worked a lot for us. Some of we kind of didn't take a full advantage of the situation, but whenever we show like three devices in one hand. Yeah, three devices in one hand.

30:49 - Nativ Yanko (NSY Digital)
 Maybe like a hims and hers angle where we've got the blue and the other colour. Have we leaned much into like the gifting birthday angle? Uh...

31:01 - Rakesh Guduru
 Gifting, we are building gifting angle, but I don't think we developed specific to, I think it's, Grace might be in the works with that.

31:12 - Nativ Yanko (NSY Digital)

If not, like if someone bought me this for my birthday, I'd actually be happy for it. It's like a gift I actually use. It's not like a stupid socks or a tie where you just put it in the cupboard. You actually use this product. So that's another angle, in my opinion, similar to what we did, Grace, with Almighty Tools, if you remember.

31:31 - grace oguntuase
Yeah, we're working on some, as I mentioned before, the Father's Day ones, since Father's Day is coming up. We also have some around birthdays, around even like other holidays are coming up later on, even like summertime as well. Yeah, I agree.

31:48 - Nativ Yanko (NSY Digital)
I think for this brand, we need to be very proactive with these gifting seasons. I think this is a huge, huge, huge Black Friday and Christmas present. So we need to... Basically, not wait to the last minute. We need to proactively look ahead in the calendar and say, let's plan for it. This is on the static side, on the UGC side. We really need to take advantage of those seasons. That's why we're going to get the majority of our sales, I think.

32:16 - grace oguntuase
Yeah, I agree.

32:19 - Rakesh Guduru
I'm trying to pull the huge, the static we did for Valentine's Day was working insane. It worked rather insane in the past. Yeah, let me take a look as well.

32:35 - Nativ Yanko (NSY Digital)
Any new colors releasing?

32:38 - Rakesh Guduru
Yes, two new colors we are launching in June, which is because our demographic is skewing towards more like a little bit in the middle age, right? So they love gold. So this is like our Sahara gold. Nice.

33:00 - Nativ Yanko (NSY Digital)
And this is like a blush gold.

33:02 - Rakesh Guduru
So these two colors we are launching in June, they all, they won't be in a cardstock anymore. So once this is launched in June, they'll all be in their own boxes.

33:13 - Nativ Yanko (NSY Digital)
That does make it look much more elevated, to be honest. Yeah, this is like a Sahara gold.

33:19 - Rakesh Guduru
So people, I know our demographics, the little bit older demographics love gold. Yeah, my mom loves that.

33:27 - Nativ Yanko (NSY Digital)
Yeah, exactly.

33:28 - Rakesh Guduru
And my wife is like, she's, she's super fan of this gold color. It's insane. And it's very like, we haven't overdue it. We kind of did very subtle. So it's just actually

kind of very soft. That's why we are calling it a Sahara gold. So two colors in June. In June.

33:48 - Nativ Yanko (NSY Digital)
Yeah, it's already in production.

33:49 - Rakesh Guduru
By the time it hits, the store is going to be in June. So are you really going like down the ridge route where you're going to have the full customization?

33:59 - Nativ Yanko (NSY Digital)
are you looking forward No, for example, like this. Let me just show you. Just so that the NSY team have context as well. Charley, do you know Ridge? Yeah, I used to.

34:16 - Charley McDonnell
I think I used to have one. I don't know where it's gone though. Yeah, I've got one. We've got one right here.

34:21 - Nativ Yanko (NSY Digital)
But basically what I'm trying to get out here is I'm asking Rakesh, are you looking to just really build out the colours like this? Because I think this could be quite cool. And then down the line, you may have opportunities like when you really want to scale with like partnerships. There's a company in the Netherlands called His and they partner with like Pasha and Yves Saint Laurent. I think your product, I'm not saying you'd have to do that, but your product is prime for these like collaborations down the line. Nice. Yeah, maybe something in the future where that's more of like a macro strategy. Yeah. Yeah. Yeah. I think we should definitely do that.

35:02 - Rakesh Guduru
I'll quickly show this Valentine's Day creative. So this is the one which worked very well in the panel. You guys can see it on them? Yeah, we can see it.

35:14 - grace oguntuase
Yeah, that's the creative.

35:16 - Rakesh Guduru
And this kind of angle of three devices worked like, if you see all the statics, it worked amazing. Because people get the idea right now for the Apple Watch especially, it's a big pain in the neck to charge. And if they have one charger always sitting in the back, now they don't have to worry about how do they want to charge, right? They just, yeah. Of course, there's a limitation. All can be charged at one. I think that's given. So people understand that. And in the reviews, that's also resonating. If you see, ahead and see the reviews, that's all they talk about. Hey, I can use my one pedal to charge all my devices. Yeah, it's a great idea.

36:02 - Nativ Yanko (NSY Digital)
think we have a lot of ideas for this next batch.

36:07 - grace oguntuase
Yeah, one thing I'd like to add as well, I was taking a look at some of your Facebook comments, and I saw a lot of comments around overheating. does the PETL overheat, as well as how to charge the PETL as well. So I think that potentially would be a good idea for in the content, maybe just in some of the scripts, or even just making separate angles around these objections would be a good idea as well. How would we overcome that? Because I did feel that it did overheat.

36:36 - Rakesh Guduru
Yeah, but with the batteries, it's very, very common. It's not just us, it's just the battery technology itself is like that. Your phone overheats, for example, if you put your phone for charging when it's down and you want to put like a power through it, it also overheats, right? It's very given, but kind of people expect us to be like, but... That's, for example, the bigger the batteries, the heating is less, because what happens is when you are trying to pull out too much power from a smaller battery, it's trying to overheat, but we kind of put two thermal sensors inside for protection, so it actually never exceeds the optimal temperature for safety. It cuts off. There are two redundant thermal sensors, which kind of give safety. Safety-wise, there's no, absolutely no problem, but people might experience, hey, it's a little hot. That situation won't be there with Pedal Plus, because Pedal Plus is a 5,000 mAh battery, so the heating, people will be more comfortable using Pedal Plus, and likewise the Pedal Max, when we release, Pedal Max is the 7,000. For now, I think it's, people Okay, we're expecting, this is very normal, this problem exists with Anchor, any, any, if you go to read Anchor's comments on their website, it's kind of the same thing.

38:10 - grace oguntuase
Yeah, okay. Batteries in general overheat, yeah, it's very common, yeah. Yeah, I just think it really comes down to reassuring the audience that even though it is heating up, that it's not like anything dangerous. Yeah, exactly.

38:26 - Rakesh Guduru
We might say, like, our angle should be two thermal sensors or something, two redundant thermal sensors for safety or something like that, right? We can go into specs. When we go into specs, we have to focus on that. And also another, Nativ, another angle we never touch is the app. So a lot of people love the app. I don't know if you have used the app.

38:53 - Nativ Yanko (NSY Digital)
What, you have a pedal app? You have a pedal app. Did you know that, Grace? I didn't know that. No. It's my first time hearing it.

39:01 - grace oguntuase
Yeah, I'm so sorry. I kind of screwed it up.

39:03 - Rakesh Guduru
So this is a Petal app, right? You go into App Store and download Petal app. That's huge. Yeah, you kind of, whenever you connect, you see, it says 45 minutes to fully charge. And as it builds, it kind of shows you all the graphs here. And the beauty is when you minimize, now see, it comes in a dynamic island over here, 45 minutes. And if you close your screen, for example, when you, let me close my screen, you see, it shows here, Petal app.

39:41 - Nativ Yanko (NSY Digital)
Yeah, you should have told us this before, like, because this is a unique mechanism that, like, again, if we're going, one of our best ads is going against competitors. This is a unique mechanism that differentiates us.

39:54 - Rakesh Guduru
Yeah, nobody has an app. So we build, so this one, you see, it kind of. We have a page, actually. There's a whole web page. And in our creative, somehow I thought it's my bad. I thought I told you, but I might be. For example, we built it. We are

showing here the app, right? Meet GoPedal app. And we actually have a dedicated page, GoPedal app. So you see the stats.

40:28 - Nativ Yanko (NSY Digital)
Do you walk them through it on email? So let's say like, do you have some sort of onboarding process where when they buy the PETL? Yeah, we just started an automation campaign.

40:40 - Rakesh Guduru
So right after PETL is delivered, an email campaign when it goes out, we just set up like last week, hey, download the PETL app, you know? Like, this is very powerful.

40:52 - Nativ Yanko (NSY Digital)
You can even treat this as like a marketing channel if you have this notification. Push notification. That's like very smart. That's something that not a lot of brands are able to compete with you on. Yeah. And also we can put it here.

41:06 - Rakesh Guduru
If you see, you see in our free, it's in our PDP as well. So what we are doing at this point is we are building like two additional features into the app. are adding a store directly in the app where they can click and purchase and complete everything in the app. And also, for example, promos, right? All the promos, notifications, like, for example, if you're running a flash sale or something, we want to send that to our audience as well.

41:39 - Nativ Yanko (NSY Digital)
How about like a loyalty plan or something? Like, well, if you buy a certain amount, you get like a free PETL if you buy it for the family. And that will incentivize the higher LTV. Yeah, definitely.

41:54 - Rakesh Guduru
We have to set up a point system so they can see in their account. How many points they have, right, for the store they can build into purchasing the store. Yeah, yeah. I think that's a good idea if we can implement that.

42:09 - Nativ Yanko (NSY Digital)
Yeah, so this one is very cool.

42:12 - Rakesh Guduru
So you click it. Of course, I have to authenticate it, right? So here you can see all the stats, the power, how it's charging and everything. Nice. Yeah, you should have told us this before.

42:26 - grace oguntuase
Cool.

42:26 - Nativ Yanko (NSY Digital)
Now we're going to, we can probably make some ads around it, showing the app itself. Again, that just leads into the unique mechanism. Cool.

42:36 - grace oguntuase
I think this is very, very productive.

42:38 - Nativ Yanko (NSY Digital)

I know, Grace, you probably have a lot of ideas. Same thing with you, Camila. Does anyone have any questions at all?

42:46 - Rakesh Guduru
I mean, which static is working so far the best, Grace? I know we touched the UGC, but you didn't touch the static. Sorry, which statics are performing the best? Yeah, I know you touched like UGC, all chargers is working the best, but I think we also have to track static, which static is performing the best and lasts for a long time, right?

43:13 - grace oguntuase
Yeah, I think the, I saw some, I think it was the us versus them static, and then also the world's first circular charger. I think those are doing pretty well.

43:25 - Nativ Yanko (NSY Digital)
Yeah, I think, Rakesh, we spoke about this on our call as well, remember? I think it was one that we made, and then I think you guys maybe iterated on it, and it was a winner. Oh, I think it's on the very top.

43:40 - Rakesh Guduru
Grace, keep scrolling up. Yeah, this fourth one.

43:45 - grace oguntuase
Yeah, this is the one.

43:47 - Nativ Yanko (NSY Digital)
This is the top one that we made. Was this number four in the account? Nice. I think we made the brief for that one, and then the graphic designer made this.

43:57 - grace oguntuase
Yeah, and Camilla made the recent...

44:00 - Rakesh Guduru
Currently, Camila made another one. Keep scrolling down. This one, the bulk angle, this one is actually working good, too. CDL, whenever you see CDL, that's made by Camila. This is the mini pocket, right?

44:19 - Nativ Yanko (NSY Digital)
Yes, this is the mini pocket one.

44:21 - Rakesh Guduru
This is also working well. And if you keep scrolling, the CDL, this is another one which is working very well. The AirPods angle, working very well. Yeah, think the visual, the visual just looks really good on this.

44:34 - Nativ Yanko (NSY Digital)
I I think we can iterate with different colors, et cetera. Different messaging. But that visual is really cool.

44:42 - Rakesh Guduru
Yes, and this world for circular was working very well. What is this one? Yeah, this is the bundle one, right? So that's the BOL. Yeah, yeah.

44:55 - Nativ Yanko (NSY Digital)

I think with that, like, we test statics, we move it into video. We test new angles and video, move on to statics. We need a lot of close communication between Camila, who's helping with the statics, and us with the statics to see what's working. Basically, what we want to find is we want to find net new angles that work on statics, and then Grace will make the more top of funnel version of that angle. I think that's what we should focus on. Cool. Any last points from you, Charley, on the media buying side of things? No, not really.

45:34 - Charley McDonnell
I'll obviously drop you any updates in Slack, but I'll just carry on optimizing and obviously getting things live. Nativ, I want to give you guys access to the Shopify.

45:47 - Rakesh Guduru
How do I do that?

45:49 - Nativ Yanko (NSY Digital)
Yeah, so if you can please send over your Shopify URL and collaborator code, if you know where to find that. I will request, and then I'll add all the team members in there as well. Yeah, because Charlie can see because Facebook doesn't immediately show the real number, right?

46:08 - Rakesh Guduru
For example, today our sales are already 4,400. I don't know if Facebook won't show you that. So Charlie would be able to see actually how that account is doing. And also I just see this five bundle just went live and I see somebody just bought it. Nice.

46:29 - Charley McDonnell
Yeah, that's high AOV I can imagine.

46:32 - Nativ Yanko (NSY Digital)
What's that like? $250. Yeah, this is like a $200 order.

46:36 - Rakesh Guduru
$300 order, nice. That's, yeah, good margin on that.

46:40 - Charley McDonnell
Yeah, five.

46:41 - Rakesh Guduru
Insane. And that's the beauty of this older demographic. They care about the value. They care about the value, right? They always want to buy everything cheap, right? They care. That's why instead of buying one, they love to buy like five because it's expensive. It's getting much cheaper. So that's a good thing as well. Yeah, 100% agree.

47:06 - Nativ Yanko (NSY Digital)
But yeah, really looking forward to it. I'm very glad of the growth. It's like crazy growth, actually. But yeah, we'll keep pushing and we'll keep you posted with everything in Slack. Yes. And Charley is on top.

47:19 - Rakesh Guduru
So this is good. As I get creatives, Charley, I'll do the same thing. I'll go and update the sheet. So once you test stuff in the individual creative testing, as soon as you like it, move it. Usually the way I was doing it, I move it to the ABO scaling.

From there, I move it to CBO scaling, right? So you see how your funnel of scaling looks like. But that's the strategy.

47:46 - Charley McDonnell
All right? Yeah. Cool. Good stuff. Good stuff.

47:50 - Nativ Yanko (NSY Digital)
I'll talk to you soon. See you guys.

Biweekly sync 3TEXT · 26.1kB · May 25

Impromptu Google Meet Meeting - May 20
VIEW RECORDING - 31 mins (No highlights):

0:00 - Nativ Yanko (NSY Digital)
Okay, let me see. Yeah, bi-weekly at 10 works, which is like 3 p.m. UK. just, let me, okay, I just changed it on the calendar. Okay.

0:17 - +1 305-***-**19
Is Grace on the call too? Yeah, I'm here. I know. Okay, great. Okay, sweet. So, Grace, why don't you give me a briefing about the creative, so before I come on the computer. Yeah.

0:34 - Nativ Yanko (NSY Digital)
Let me get my ad account up as, the ad account up as well.

0:39 - grace oguntuase
Yeah, so we're seeing that, um, the top spender for this week was the PEL25, um, Hook3. Uh, so this is like, um, like an, uh, it's a concept about how, like, Apple discounted their, um, MagSafe battery pack. think they discounted it in 20- So it's kind of just like that kind of competitor comparison between the Apple product and then Petal. I think the hook that did well was, I think it said most people don't realize Apple discounted their MagSafe battery pack, and that the third-party replacement is actually better. So I think that like instant kind of comparison really does well, because most people don't realize that they discounted it, and then immediately introducing that there is a replacement that's better than it, but also like not revealing it immediately. So it kind of like, it kind of acts as, like kind of like that surprise element. So people are kind of, they continue watching because they're, they're considering they're like, oh, like, what is this product that is better than the product that Apple discontinued? Yeah, so definitely. KPI is a really great concept, I'm happy to see it doing really well in the ad account, I think it's on the screen, purchases are almost at 30k, which is really good, ROAS is really high as well, 2.66k, it has a really high hook rate, I think because of what I explained.

2:22 - Nativ Yanko (NSY Digital)
Yeah, is, is that the highest in the, oh no, it's the second highest, yeah, but it's still very high, 50% of hook rate is crazy.

2:33 - grace oguntuase
Yeah, and I feel like one of the biggest reasons for that is also because of how good the creator is, so Jared is a creator that, you he's just a phenomenal creator that we've been working with for a while, so I definitely think that he really executed this angle really well. Um, he was like, able to film kind of like in different

locations, kind of moving the camera around, I feel like that kind of just It's kept up the engaging element throughout the video. What are you thinking?

3:08 - Nativ Yanko (NSY Digital)
I think why this is, I'm so happy about this, because this opens up a whole new door for iterations. Like what sort of iterations are you thinking of?

3:19 - grace oguntuase
So I think definitely we could iterate on this with doing it with a female creator. I was looking at some of the analytics earlier for like who was purchasing. And I think that the people that were purchasing the most were like older males. So like 45, 55 plus, but also 65 plus females do purchase a lot as well. So I definitely think that getting an older female to film literally same script, just different creator would be good. Getting them to film in this kind of like different locations as Jared is doing here. Yeah, I think that definitely has potential to perform well as well. I think also we could definitely iterate on this and create a static concept. I was thinking that probably like an us versus them format could work. So on the left, it could be like showing the Apple MagSafe battery pack they discontinued. And then we could on the right show Petal as like the perfect replacement. Yeah, so I think that those do have potential to work well. Try to think of other iterations. I'll have more of a think about it later, but I think it's like the ones I can get off the top of my head. I think those are the key ones for sure.

4:37 - Nativ Yanko (NSY Digital)
going with a female. Rakesh, can you still hear us, by the way? Yes, yes, I'm hearing everything. Yeah, so I think female and maybe you haven't seen Grace, but Jonathan iterated one of the ads that basically like Jared had a winning ad, but then we iterated a female. I saw those. Yesterday, yesterday,

5:00 - +1 305-***-**19
Yeah, think we turned them on yesterday. Yeah. Which one?

5:06 - Nativ Yanko (NSY Digital)
I think it's P24, Grace?

5:10 - +1 305-***-**19
S24?

5:12 - Charley McDonnell
Yeah, they were live yesterday. I didn't see those ones.

5:16 - Nativ Yanko (NSY Digital)
Yeah, but what I'm saying, Rakesh, is we have a different client that basically with this exact creator, we have found a winning ad like we have for you. And then we iterated in it with a female, specific female creator, and that's also doing quite well. So I'm thinking of even just bringing that exact same creator for Petal with the exact same script, like an easy iteration. So, yeah, like, I think there's this whole angle around like, let me just play the hook because I think this is like a very, very, like, this is an ad that comes from research, basically. Most people don't realize Apple discontinued their MagSafe battery pack. So like that hook right there, or the idea of the discontinued battery pack where we're like, we're like the third party new gen one, like Apple don't even have this anymore, the discontinued version, I think that opens up so many different ads, like so many different ads in the hook, because we haven't really, Grace, have we tested like that messaging before? Maybe I'm wrong, I don't know.

6:27 - grace oguntuase
No, no, this is definitely our first time.

6:31 - Nativ Yanko (NSY Digital)
Okay, so this opens up a lot of doors in my opinion to scale even further. But yeah, I think, Carly, anything on your end you want to walk through? Not necessarily, I think the account's obviously in a very good spot.

6:49 - Charley McDonnell
We're getting record day after record day, which is really, really good.

6:54 - Rakesh Guduru
And yeah, we're at 95k.

6:57 - Nativ Yanko (NSY Digital)
You can hear us? Yes. at 95k, You

7:00 - Rakesh Guduru
Charley, I think we need to start again, because maybe Rakesh didn't know.

7:03 - Nativ Yanko (NSY Digital)
fine.

7:04 - Charley McDonnell
Yeah, so I think the account's in a very good spot, obviously getting record day after record day, really, really good weekend. Last seven days, we've been sitting at 95k in revenue, and that works out about a 2.29x for us, which is really, really solid, so we can scale. So I've increased spend this morning to 7k from 6.5. Didn't want to jump too much, because obviously I know it can be a little bit rocky in midweek, so I think by the end of the week, we should be aiming to be around like 8k. Yeah, let me share my screen. Yeah, just get the account up. Yeah, cool. Yeah, so really, really good results, really happy with it. I think the main thing I want to focus on now is obviously just looking at what granular things we can improve, so the main thing I'm really looking at this next week or so is this cost per click here, which I know we spoke about briefly on the weekend, Rakesh. $2.90 is a little bit higher. I do think we can get it lower. Some brands naturally have a higher CPC and still scale, but if we can bring that down even to like $2, that's still going to be a lot of people coming onto the site. And with the way that the conversion rate is at the moment, I mean, sitting around like 8% or 9%, we're going to be in a very, very good spot. So it's a very simple thing that we can do, very small thing that we can do with like big, big gains. The other metric I'm kind of want to look at as well is, and I'll keep banging on the CPM and the CPMR. So CPMR is a little bit high. Again, looking at some of the newer ads that we've launched using that new feature, where we're excluding, we can actually see the CPMR is looking a little bit better. So I'm glad to see that that's improving. And then we are starting to see some ads come through, like this one here, the internal free, which is the gifting angle, has got a very, very good CPMR. So naturally, some ads are going to be more top of funnel than others. So it's good to see we've got that ecosystem in place there. And yeah, the main way that we are What to improve that cost per click, think, is again, just tweaking the copy, making sure the copy is absolutely solid. I know you've been supplying the copy, which is really good. would be interested to get your thoughts on can tweak it, Charley.

9:13 - Rakesh Guduru

can always tweak I can tweak it. Yeah. That's fine. Okay. Perfect. Yeah.

9:17 - Charley McDonnell
I think what I'll probably do then is I won't touch anything now about any future ads. I'll go through and maybe make some small changes. Again, it's just more structural changes to see what we can do there. It's mainly the copy and the creative that we are going to be able to move that cost per click with. But other than that, I think things are looking really good. I'm hoping that you're happy with the results as well. And yeah, we're just going to continue to scale it from here, really. Yeah.

9:42 - Rakesh Guduru
I mean, it kind of changed my perspective totally over the weekend. I thought, like, did we hit a ceiling limit? I mean, I spoke to Nativ. You introduced me to Sambao. Sambao. Sambao. He said our TAM is so massive. It's like, don't even worry about it. Keep scaling on Meta until you reach like two to three million because everybody has a phone and they all need a battery. And, you know, today more people on the phone than ever, right? And also all the chips are getting more powerful. Like all the latest chips consume so much power. So the battery technology is not improving. So that's why everybody, uh, by the midday, they see that their phone is dying. Interesting. is that a thing then?

10:36 - Nativ Yanko (NSY Digital)
Like, yeah, it's very interesting. So you're saying, so you're saying the chips are getting stronger. So phone battery speed, like is going to get rinsed quicker, which means that the demand for what we're selling is increasing.

10:49 - Rakesh Guduru
Yes, that's why. Maybe Grace, you should think about an angle. Your phones are draining your battery. Because they are more powerful. It's than ever as the AI is taken over. So you need today power more than ever, right? So that's why I think we have a perfect solution, which is pedal, right? And that angle. And also we launched some creative. Let's see how it's testing. I'm kind of focusing on the very top of the funnel, like design, you know? Hey, we made, we just didn't make your power bank circular. We made it better or something like that. So we have some spin on at the top of the funnel. So it just, Nativ, it just opened like, if you have like a very good creative, it can just change all the metrics like insane. Yeah, exactly.

11:48 - Nativ Yanko (NSY Digital)
I mean, I look at the last seven. I remember we were around like a 1.7, 1.8 rounds. Yeah, we were dying.

11:55 - Rakesh Guduru
Yeah, we were dying. I kind of, I was nervous because... The Claire was the one which was picking up, which gave us almost $125,000 or $130,000 in conversions, and as that video, I don't know, it's coming back. Charlie, I know you turned it on. I see it's coming back. It's coming back. It has a very good CPC, and I'm excited to see that. So that's why, and I know, like, the grace, the pedal 25 is the iteration on the Claire all chargers. Let's see how that performs. You see that's coming back. I think it's another one. Pedal 24.

12:44 - grace oguntuase
Yeah, we did iterate on this one. It's live, actually.

12:48 - Rakesh Guduru

That's gone. Yeah. We just went live yesterday. Yeah, I wasn't spent too much yet, but... No, yeah, yeah, that's the one. That's the one, yes. you. Yesterday, no sale on that? I thought that was a sale yesterday. Yeah, it's exactly on the Claire Spin. So I'm interested to see how it performs. But anyways, this creator is very engaging. I don't know what. It just worked. It just changed all the metrics overnight. So that shows Nativ, like, creatives, we gotta, I don't know, like, yeah, it's like insane how powerful the creatives can be, you know? Yeah, that's literally what our bread and butter is.

13:35 - Nativ Yanko (NSY Digital)
So I think, you know, I definitely think we just need to keep scaling the creative. And I think something about this format is good. Like, speaking to the camera is working very well for Petit. Like, for some brands, obviously speaking to the camera works, but, like, AI, VoiceOver plus B-roll works very well. But for this brand specifically, it's very, like... Creator-led. That's what I figured out. So maybe we need to lean into more creators. need to find very, like, tap into our database of amazing creators and really focus on the delivery of everything and, like, the quality of the video. Yes. I we've got a lot of that, right, Grace?

14:18 - Rakesh Guduru
We've got a lot of great creators. So Nativ, one style we are thinking, it could be expensive, but we have to figure it out. So in the street style, this is what I was saying. I want them to, hey, guess. If you guess this, you're going to get like a, I mean, just like a, hey, we're going to give you a £10 or $10 if you guess what it is, and they guess it, and he kind of gives them hands over the cash. Guess what is this, right? They can all ask, hey, can you guess... Like, what is this right here? Yeah, yeah, what is this? Can you guys guess? Something like that. How do you charge your phone? How about I give you this? don't know, you guys figure out a hook, but I think... can do many things.

15:06 - Nativ Yanko (NSY Digital)
We can go down the us versus them angle. Yes. What would you rather charge your phone with, this or this?

15:13 - Rakesh Guduru
Yes. A crappy, big, bulky one. Yeah. I think it's gonna... I think because street style by nature itself is very engaging. That's when our CPM and click-through rate is gonna go down. Yeah. And we'll see some crazy ROAS, I guess. Some things to experiment, but I know those kind of videos, it's very high budget because the production is another level. So you figure out a way to do it. I know I recently found one guy in Singapore is doing a really good job. Singapore So I was thinking maybe... Singapore... He's street interviews in Singapore.

16:02 - Nativ Yanko (NSY Digital)
Yeah, there's this guy.

16:04 - Rakesh Guduru
No one speaks to this. Let me show, I found him on, because I'm a Fiverr pro member, I asked my pro advisor, hey, is there any street interview guys? And they sent me like a few, but out of it, one guy I liked quite a bit. Let me see if I can pull him over here. So I think, or if you have somebody else, maybe we should work with them on a side project and do that. I'm thinking, let me, I want to Fiverr. We can't see your screen. Yeah, I'm trying to pull my Fiverr account hold, just give me like a second. Okay, Josh Campbell. Okay, Josh Campbell. So. So. This is the guy, Josh. He lives in Singapore. I mean, it says here, Singapore. You see this? But he has an

American accent. Let me see the street interview. This is a street interview style. Can you guys hear? No.

17:33 - grace oguntuase
Okay.

17:37 - Rakesh Guduru
But anyways, you can see the style. Do you want us to write a brief for that then?

17:43 - Nativ Yanko (NSY Digital)
I don't know.

17:44 - Rakesh Guduru
If you guys have something, but this kind of process is expensive, right? This is not a cheap production. This is not 500 bucks. This is all, this is all, all not real numbers, but I think this might cost us a lot of people. If we go in this round, like probably $3,000 or something for a million.

18:06 - Nativ Yanko (NSY Digital)
Are you sure? $3,000? I think we can get less than that. We've done one.

18:13 - grace oguntuase
I think Aliana is sourcing street news right now, so I think she can definitely get some for less than that.

18:20 - Nativ Yanko (NSY Digital)
I think Fiverr is not a bad place to look for specific things. You can actually search up street interview UGC, you'll find it. I see. But I don't want to like jinx myself, but I'm pretty sure it won't be $3,000. We'll be able to get less than that.

18:38 - Rakesh Guduru
Yeah, I mean not for one. think testing like a whole bunch of concepts. Many projects, right? It's not one project. But I just want you guys to walk in this direction. If the budget is a little bit expensive, just let me know. I will approve it. But I think we've got to. We've We've to test it. We've got to test the street interviews, yeah. Okay, cool.

19:05 - Nativ Yanko (NSY Digital)
Let's align with Aliana on that, and then we can discuss if the budget is acceptable, and then we can run it by you. Yes, exactly.

19:15 - Rakesh Guduru
Because we just realized how powerful this creative can be, especially kind of a campaign structure we have. It can just blow up the top of the funnel, and it just lifts all of the ads. Whatever follows up behind it also kind of happens. That's why we like the CBO structure.

19:38 - Nativ Yanko (NSY Digital)
It works very well in the CBO structure, because it feeds all the other ads, as you mentioned.

19:44 - Rakesh Guduru
Yeah, I Not everything's like in silo.

19:46 - Nativ Yanko (NSY Digital)

I love it.

19:48 - Rakesh Guduru
So you guys think about that. Another question, Charley, I have for you is, so when we launch, say, a different line of product. one..4بر. top correct. Thank you. Say, like, docking station, right? I showed you guys. So, is that going on a different campaign? I would say so. different product, right?

20:11 - Charley McDonnell
Yeah, I would say so, just to keep it clean. Because there won't be interference on the audience too.

20:18 - Rakesh Guduru
There won't be audience interference because the docking station is not a power bank. What do you think, Nativ? Does that make sense? Yeah, I agree with Charley.

20:27 - Nativ Yanko (NSY Digital)
Like, completely. Like, it should be a different campaign. We almost need to, yeah, like, it's like a completely different SKU. We don't want to mix the two, essentially.

20:35 - Rakesh Guduru
Yes. Yeah. It's a completely different SKU. So I want you guys to think about it.

20:41 - Nativ Yanko (NSY Digital)
And still need to validate if it even works with Meta. Because the numbers are different, the AOV is different, the market may not perceive it as high-quality, like, high-value as this. Right. Like, this is almost, like, this is the thing of itself, the docking station. We'll be like, oh, you know what, like this I want to buy, the docking station will just go to Amazon. So we just need to, I'm not saying that that's what it will be, I'm just saying that's what we need to gauge to see how the audience reacts to it. I think it could, it could, you could be absolutely right.

21:14 - Rakesh Guduru
So that's why it won't be consuming a lot of our budget. I think the campaign should run at, I'm assuming like 5% or 10% at the max of our current, our main campaign budget. And it's all these, so it's a, it's actually the docking station is ecosystem, right? So if people, for example, I have a lot of panels in my house, it's a nightmare to charge them all with cables. So whoever is buying a lot, like if you see there are several people who are buying a lot, they all have same problem, right? I'm sure in the cart upsell, it will sell by itself, but just to show people who already purchased, maybe, hey. This is what, something's going on, or they work with some, I don't expect something, a huge game-changing thing, but it's an ecosystem-driven product. So even in people, when they want to buy a different power bank in the future, there's like, hey, it's not, it's not as ecosystem-driven as Pedal, because I'm also working on a charge, charge, car charger, right? So it's a car mount, so Pedal goes on the mount, and they can put the phone on the car, and one for the table, so when, right now, I want to hold my phone like this, right, on a stand, so there are phone stands, MagSafe phone stands available, but I'm kind of building that with Pedal, so 3-4 ecosystem-driven, so Pedal becomes more powerful, So it kind of puts all power banks behind, because it's so ecosystem-driven. And then we can scale on it, you know? I think that's really cool.

23:04 - Nativ Yanko (NSY Digital)

I think you are very product-driven, which is cool. It's like that's how we're gonna win in this space, I think. It's just by having a superior product than everyone else. So yeah, and what's the date on the docking station?

23:19 - Rakesh Guduru
That is more like a September project. Before Black Friday will have it. Before holiday season, definitely. Definitely will have before the holiday season. So we'll see how it goes. Okay, so there's time for that. Yeah, there's time for that. But I already want you guys to think about it. Start thinking. Yeah. And VR, Charley, Sam, can you pull up the... Okay, let me pull up the ad account real quick. So I want to show a couple of stuff. We've been testing student Nativa and Grace, so they are aware. scared. I'm scared. So it's been actually not very high volume, but the CAC looks really, the cost per acquisition looks really good. So hold on. So it's internal, right? Yeah, internal. So this is all internal. So for example, let's look at yesterday. So some of the stuff we've been testing, Grace is, so I don't know if it's internal too, right? So let's see.

24:31 - Charley McDonnell
Yeah, internal two is like the circular one, I think. So like past the circular angle, internal three is the gifting.

24:41 - Rakesh Guduru
Yeah. So for example, this one, yeah, this one kind of we took the, took the same video from this girl and kind of changed the hook. So let's see the hook on this. Let's see the hook rate. Well, thank you so much. Thank So usually this is how I see it, so this has hook rate 48 and hold rate, you guys know this a lot better, but I think this is, this has such a low CAC, it's like $9, you know, and we have like four purchases on this yesterday, so take a look at that, so you see we have like, see this one, four purchases at $11. That's, that's really good, it's, yeah, so it's spending more as well, yeah, it's spending more as well, hopefully, so this is all, it's all like a very top of the funnel kind of stuff, how would you define a top of funnel, top of the funnel, how do we define, Oh, I know. We don't have the metrics yet, but at least that was the intention behind me is, for example, this is more like a, not this one. Oh, hold on. This is more like a branded product. It's not, for example, if you go to preview, see, it's kind of talking not about the use case of the product. It's kind of talking, what is this product about, right? So that's how I define it. I would say that's part of it.

26:34 - Nativ Yanko (NSY Digital)
would say the key thing is just like, is just educating people around the product. That's what Top of Funnel is. Like, you're not assuming they already know what it is. So it can still be salesy, like in terms of direct response, but it just, you can't just go straight into the product. need to like educate around a problem or speak to a problem first of all. Right. Right. Yeah. For example, this is.

27:00 - Rakesh Guduru
what it is doing right it's not just circular it's better by design so we are kind of educating that's top of funnel yeah yeah so it's kind of educating exactly these are all kind of you see not just circular but if I decide it's very educational type of uh uh content it's it's just been live yesterday so it's brand new so I'm making a lot of videos like like uh content like that this is this is pending too so it's kind of see this is all built for hapless it's very high top of the funnel educational videos uh and who uh we'll see how they perform over time I don't know you see it's kind of very very uh top of the funnel we'll see we'll see uh but I think this one and also this one is also uh performing well uh Which is not excellent but kind of giving some

promises. I think we have another one like that, think which is internal three, I think we just, this is the gifting angle, yeah, this is not spending that much, the gift, this is all catalog, this is all carousels, yes, yeah, so that's all carousels and we have another one, which is this, this is how the funnel as well, so in this one, this gave kind of good purchases, this angle, so yeah, but it's start spending after some time, I don't know if it's still spending or not, I think just more content has come in recently that's taking more spend. isn't necessarily a bad thing but yeah that's okay yeah just keep a lookout for like that that type of stuff but i think panel 25 is clearly like the winner for us it's just change it's just change all the metrics overnight which is ridiculous yeah this is really curious yeah this one this this one okay let's see how the rest of the day looks like yeah we'll look at it charlie and i just have a call now but i think we're fully fully aligned we will get to work on sourcing these creators that are you know the street interviews i think we have like uh we have an internal creative strategy call literally in like an hour so we'll discuss ideas there as well and yeah really excited about keep scaling this i think there's not as sam have said there's just

30:00 - Nativ Yanko (NSY Digital)
Everyone has a phone. So yeah, we'll jump to the next call, but we'll you and we'll talk very, very soon. Yeah, good job, Grace, on that video.

30:11 - Rakesh Guduru
Yeah, good stuff.

30:13 - Nativ Yanko (NSY Digital)
Cool. See you.

30:14 - Rakesh Guduru
Thank you.

claude/Round 8 Concept Plan TEXT · 2kB · Sep 29

PETL Round 8 Concept Plan (revised 29 Sept 2026)
All entries are in the Notion Ideas Library, prefixed "R8 ·" (parked ones "PARKED ·").

Ground rules this round
- Proven formats first: Top 3 Chargers for Grandparents (PETL65), Top 5 Power Banks Ranked (PETL48/57), competitor comparison.
- No Black Friday creative yet; BF starts next month. No Christmas creative yet.
- Every creator also shoots gifting B-roll with family (mum → husband; younger creators → parents/grandparents; older men → family).
- iPhone Duo fit confirmed (tested).
- Corporate page and destination are the media buyer's job. We supply 2 corporate angles.
- Static references are described inside each static; Grace adds the images herself.

Video: 5 creators x 2 briefs
- A, busy mum 40–48 (real UGC): Always on 5%, husband gifted it · My Husband Thinks I Got Scammed (Hume Pod)
- B, male 25–35: iPhone Duo "the one that fits" · Competitor price stack ("none of them charge all three")
- C, female 22–30: Top 3 Chargers I Bought My Grandparents (PETL65 iteration) · Yapper: every power bank is a brick (new format test)
- D, male 35–45: Team-lead corporate gifting · Client gifting (corporate angle #2)
- E, male 50–60 (new face): Top 5 Power Banks Ranked (PETL48 iteration) · My Daughter Got Me This

Video: 4 miscellaneous

Linda Gallagher
Received mine today and so far I’m very impressed. I ordered two and great to be wireless. I have a few different power banks but these are still corded so I’m enjoying PETL. Would be nice if they came out with a storage case when not in use.

Gemini analysis of top performers **TEXT · 8.2kB · Jan 14**

Excellent. This is a superb example of creative diversification within a winning formula. You've presented two ads that, while visually and tonally distinct, are built on the same core chassis of exceptional product design and problem-solving. They are succeeding because they target two different, but equally valuable, customer avatars.

Let's place these two winners on the operating table and dissect exactly what makes them the top performers in the account.

1. Overall Performance Summary

Verdict: Dual WINNERS. These are not just ads; they are case studies in perfect Product-Market-Format fit. Ad 1 is the "Aesthetic Tech Demo" and Ad 2 is the "Lifestyle Problem-Solver." They prove the product has broad appeal that can be unlocked with avatar-specific creative.

What Works: The overwhelming success factor is Visual Satisfaction. Both ads are a masterclass in the "Show, Don't Tell" principle. They deliver a constant stream of dopamine through slick visuals, satisfying magnetic clicks, and a clear demonstration of a problem being elegantly solved. They don't sell a battery; they sell order, convenience, and an elevated aesthetic.

What Could Hold Them Back From Even Higher Performance: While exceptional, both ads are primarily feature and benefit-driven. They lack a strong, emotionally resonant Problem-Agitation sequence. They showcase the solution to a low-grade annoyance (cable clutter) but don't yet tap into the high-stakes pain of a dead battery at a critical moment.

2. Scaling Drivers / Success Points

Why They Scaled:

Resonance (Universal Problem): Both ads target two universally understood frustrations: 1) the anxiety of a dying phone battery, and 2) the chaos of cable clutter.

Format Synergy (Demo-First): For a product with a "magic" quality like MagSafe, a Demo-First format is the most powerful structure. They show the satisfying "snap" and wireless charging immediately, creating an instant "I want that" moment before the logical brain kicks in.

Avatar Match (Dual Targeting):

Ad 1 (Male Creator): Perfectly targets the design-conscious, tech-savvy male. The tattoos, rings, minimalist desk setup, and focus on premium materials ("milled from CNC aluminum") speak directly to an audience that views tech as a part of their identity and aesthetic.

Ad 2 (Female Creator): Perfectly targets the organized, aesthetic-driven, on-the-go female. The use cases (desk, travel, airport, home) and the softer, lifestyle-oriented visuals position the product as an essential, elegant accessory for a busy, curated life.

Novelty: The product's sleek, circular, metallic form factor is fundamentally different from the bulky, plastic rectangles that dominate the power bank market. The ads leverage this visual novelty to its fullest extent.

3. Hook Effectiveness

Ad 1 (Aesthetic-Driven Hook):

Words: "Let me introduce you to PETL."

Visual: Extremely rapid, high-quality B-roll of a modern desk setup. The hook isn't the words; it's the visual velocity and aesthetic quality that stops the scroll.

Scroll-Stopper Used: Visual Curiosity & Novelty. The viewer is intrigued by the premium look and feel before they even know what the product is.

Ad 2 (Benefit-Driven Hook):

Words: "Charge your iPhone, your AirPods, your Apple Watch, all wirelessly."

Visual: A clean, satisfying shot of the product charging multiple Apple devices in sequence.

Scroll-Stopper Used: Problem/Solution & Desire. It immediately states the ultimate benefit and solves the multi-device charging problem in the first 3 seconds.

4. Narrative Structure Breakdown

Core Structure: Both ads use a Demo → Feature/Benefit Stack → Problem Resolution → Lifestyle Integration structure.

Momentum: The momentum in both ads is driven by the rapid, visually satisfying cuts. Each new shot demonstrates another capability (charges the watch, acts as a stand), keeping the viewer engaged and constantly discovering new value.

Emotional Arc: The arc is a smooth progression from "Oh, that's cool" (novelty) to "Oh, I need that" (utility). The core emotional journey is from a state of implied chaos (the messy drawer shot in Ad 1) to a state of satisfying order and control.

How to Achieve Higher Performance: The Iteration Game Plan

The current ads have mastered the "What" (what the product is) and the "How" (how it works). To reach the next level of performance, we must build campaigns that master the "Why"—the deeper, emotional reason why this product is indispensable. This means adding stakes.

5 Iteration Ideas to Evolve the Winning Formula:

The "High-Stakes Moment" Angle (Problem-Agitate-Solve)

Concept: Shift from showing a general annoyance to showing a specific, high-stakes disaster being averted.

Hook: A POV shot of a phone screen at 1% battery. Text: "The worst time for your phone to die..."

Execution: Show a scenario where a dead phone is a catastrophe: trying to pull up a boarding pass at the gate, needing Google Maps when lost at night, trying to capture a once-in-a-lifetime moment (a baby's first steps, a proposal). Just as the screen goes black, a hand enters the frame and SNAP—the PETL attaches, the charging icon appears, and the day is saved.

Why it Unlocks Higher Performance: It adds urgency and emotional weight. It transforms the product from a cool gadget into an essential piece of emergency gear.

The "Competitor Takedown" Angle (Create An Enemy)

Concept: Directly contrast PETL's elegance and functionality with the ugliness and inconvenience of old solutions.

Hook: "If you're still using one of these, you're living in the past."

Execution: A split screen. On the left, show the "old way": a bulky, ugly power bank, a tangled mess of cables, a flimsy phone stand that keeps falling over. On the right, show the PETL seamlessly doing all three jobs in one sleek package. Frame it as the intelligent, minimalist choice.

Why it Unlocks Higher Performance: It creates a clear "enemy" and positions PETL as the obviously superior choice, justifying a premium price and creating a strong desire to upgrade.

The "One Bag Traveler" Angle (Extreme Use-Case)

Concept: Focus on a hyper-specific avatar: the minimalist traveler.

Hook: "How I pack all my tech chargers for a 3-day trip in one hand."

Execution: Show a creator laying out all the chargers they used to pack: an iPhone brick, an Apple Watch puck, an AirPods cable. Then, they sweep them all away and replace them with a single PETL. The rest of the ad is a fast-paced montage of them using it in the Uber, airport lounge, hotel, and cafe.

Why it Unlocks Higher Performance: It showcases the product's ultimate benefit: consolidation and freedom. It's a powerful narrative for anyone who values efficiency and minimalism.

The "Desk Setup Glow-Up" Angle (Aesthetic Transformation)

Concept: A satisfying "before and after" ad focused on transforming a workspace.

Hook: "Your desk setup is almost perfect. It's just missing one thing."

Execution: Start with a shot of a messy but stylish desk, with cables snaking everywhere. Use a satisfying swipe transition to show the same desk, now immaculate, with the phone, watch, and AirPods all charging elegantly on the PETL. Frame it as the final piece of the puzzle for a perfect workspace.

Why it Unlocks Higher Performance: It taps into the massive "desk setup" and "wfh aesthetic" trends. It sells the product as a piece of interior design, not just a utility.

The "ASMR Unboxing" Angle (Premium Materials Focus)

Concept: A purely sensory ad focused on the premium feel of the product. No voiceover, just crisp audio and high-definition visuals.

Hook: A close-up shot of the premium packaging being opened. Text: "The most satisfying charger you'll ever own."

Execution: Focus on the sounds: the box opening, the creator's fingers tracing the milled aluminum, the solid thud as it's placed on a table, and the incredibly satisfying SNAP as it attaches to the iPhone.

Why it Unlocks Higher Performance: It builds perceived value and justifies the price point through sensory experience. It creates a deep desire for the tactile experience of owning the product, which is a powerful driver for design-led brands.

Instagram Ad,"A nice, portable charger that is slim and fast! I like the self standing
feature, that was a plus for me! ","The design, you don’t need a cord, it’s mag safe
for all my Apple products! I like the look and the simplicity of the look. ",Wasn’t
sure if this was going to be a legit product.

reklismindz@gmail.com,Anthony Venturini,02/07/2026 09:20:00,Facebook / Instagram Ad,I’m hoping for a quality charger that is also not big and bulky. It’s difficult to find a good contact charger that charges my phone at a decent rate,The size and shape of the charger ,Been lookin at these damn chargers for a while but always hesitated at the price. If it’s a decent charger then the price isn’t bad but if it’s basic and doesn’t do its job very well then it’s too expensive. Looking forward to finding out. If I like it then I will be buying several more for my kids and family

Onboarding form TEXT · 4.3kB · Jan 14

"PETL" pronounced as PETAL Current Offers PETL15 for 15 % off. We are currently working to setup offers on this mockup. May be in 2-3 days this will be live.
https://www.canva.com/design/DAG95UBK_mI/hC7IlzJlEkeJsFaNMrdIsg/edit?utm_content=DAG95UBK_mI&utm_campaign=designshare&utm_medium=link2&utm_source=sharebutton
https://gopetl.com/products/petl-magsafe-battery-pack-black 1. Ultra-Compact, Pocket-Friendly Design
PETL's circular form factor eliminates bulk, making it comfortable to carry every day without feeling like a traditional power bank.

2. One Charger for Multiple Devices

Wirelessly powers iPhone, Apple Watch, and AirPods, removing the need to carry multiple chargers or accessories.

3. Cable-Free, Clutter-Free Charging

Wireless charging reduces cable mess at desks, in bags, and while traveling — creating a cleaner, calmer charging experience.

4. Designed to Feel Natural, Not Technical

Unlike boxy power banks, PETL's circular design feels intentional and balanced, blending seamlessly into everyday life.

5. Always-There Power, Without the Hassle

PETL delivers reliable on-the-go power without changing how users carry, charge, or organize their essentials. $49 Most power banks are bulky, boxy, and inconvenient to carry — forcing users to choose between battery life and comfort. PETL eliminates this tradeoff with an ultra-compact circular design that fits naturally into pockets, small bags, and everyday carry without feeling like a gadget.

PETL also removes the frustration of managing multiple chargers and cables. Instead of carrying separate accessories for iPhone, Apple Watch, and AirPods, PETL enables wireless charging across essential devices in a single, minimal form factor.

By offering cable-free charging, PETL reduces desk clutter, tangled cords, and on-the-go chaos, creating a cleaner, calmer charging experience at home, at work, and while traveling.

In short, PETL solves the problem of power that disrupts your life — replacing it with power that seamlessly fits into it. Target Audience is US. the rest we let META handle. Anker, Belkin Claims, Words, or Topics to Avoid in Marketing
❌ Apple Affiliation or Endorsement Claims
Do not imply or state:

- "Apple-approved"
- "Apple-certified"
- "Made for Apple" (unless officially licensed)
- "Official Apple accessory"

You may say "compatible with iPhone, Apple Watch, and AirPods" only in a factual compatibility context.

After using PETL, customers feel less friction and more ease in their daily routine. Charging no longer feels like something they have to plan around or think about — it becomes seamless and intuitive.

They experience the confidence of always having power without carrying bulk, knowing their phone and essential devices stay charged without extra cables, adapters, or clutter.

PETL helps users feel more organized and intentional, whether at home, at work, or on the go. Bags feel lighter, desks feel cleaner, and everyday carry feels simpler.

Because PETL blends naturally into their lifestyle, users stop noticing it as a "tech accessory" and instead see it as a natural extension of their phone and daily essentials.

Ultimately, customers feel:

- Prepared, not anxious about battery life
- Comfortable, not burdened by bulky power banks
- Calm, not surrounded by charging chaos

PETL delivers power that supports their day instead of interrupting it. https://drive.google.com/drive/folders/1YbFkLZRUUuqjRwLlFwaocAmPIWtxy1RW?usp=share_link I want to keep the standard in ads, so it feels branded. I want to keep the brand clean and elegant. https://gopetl.com, https://gopetl.com/products/petl-magsafe-battery-pack-black No we dont have one. Suggest us one, we will set it up. Scroll down on the product page. "https://gopetl.com/products/petl-magsafe-battery-pack-black" https://fb.me/adspreview/facebook/273C6fSO7WBHjfU, https://fb.me/adspreview/facebook/2t9OK09B3x9YpSG PETL customers are design-conscious, convenience-driven consumers who value simplicity, minimalism, and thoughtful functionality. They dislike clutter, bulky accessories, and unnecessary complexity, and seek products that integrate seamlessly into everyday life. They gravitate toward premium, understated brands that prioritize comfort, aesthetics, and ease of use over flashy features.

01/13/2026
The charger is great. But for me I would like it to be thinner and less weight like my other wireless power bank.

Nancy Verified by Shop
01/13/2026
Perfect size. Not heavy like other power banks. Provided enough charge to get from 10-90%..while in use!

Santos Verified by Shop
01/13/2026
had it for a week and I love it because charge your phone and your watch and they have a button where the charger can be turned off and turned on when you need it.

Excellent MagSafe Battery Pack – Worth the Price

I’ve been using the goPETL MagSafe Compatible Battery Pack for a while now, and I’m genuinely impressed. The magnetic attachment is strong and aligns perfectly with my iPhone, so it stays securely in place even while moving around. Charging is stable and efficient, and it doesn’t overheat during use.

The design is slim, lightweight, and premium-looking, making it easy to carry in a pocket or bag. It also works well with MagSafe cases without any connection issues. Battery life is reliable for daily use, especially when you need an emergency top-up while traveling or working.

For the price, this is a great alternative to more expensive MagSafe battery packs. Overall, solid performance, good build quality, and excellent value for money. Highly recommended 👍

01/10/2026
Like the portability like the fact that it becomes a stand very strong sturdy looking piece

Anonymous
01/08/2026
Pretty great product

Wes007
01/08/2026
This is absolutely the most innovative piece of tech I’ve ever seen!! The puck sized powerhouse of a charger is great! I hope PETL wins some type of an award for this charger. Yes.. it may only be 3000 ml amps, but the size and the design makesup for that. And at a relatively good price. I’m sure you PETL will have it on sale periodically to reach as many people as possible!

Orin Verified by Shop
01/08/2026
Small size. I can carry it with only one cord to recharge uniti. Can use with Apple phone, buds & watch

Anonymous
01/08/2026
I love it! I have a been looking for a fast portable MagSafe charger that doesn’t get extremely hot when charging and I must say that I found one in this charger. Very happy.

PETL
design
promise

Revolutionary innovation
PETL’s patented circular design maximizes internal space while enhancing ergonomics—feeling right at home within your iPhone setup. Its minimalist form complements Apple’s aesthetic while delivering smart, efficient charging for your iPhone, AirPods, and select Qi-enabled smartwatches.

Premium materials
Crafted from premium materials that prove luxury and environmental responsibility can coexist beautifully. Zero plastic construction with sustainably-sourced aluminum and tempered glass panels. Built with materials that enhance both aesthetics and sustainability.

Intelligent functionality One revolutionary device charges your iPhone, Apple Watch, and AirPods with intelligent power management and magnetic auto-alignment. PETL’s circular design unlocks functionality traditional chargers can’t match—delivering a seamless multi-device experience in a compact form.

Customer care
PETL's revolutionary design deserves exceptional support. Our dedicated customer care team ensures your experience is outstanding from the moment you order through years of daily use. Premium products deserve premium service.

Why
PETL

Designed to Go. Built to Belong
Minimalism in motion, crafted to complement your lifestyle.

Replace 3 chargers with 1 PETL.
Your complete Apple charging solution. PETL powers your iPhone, AirPods, and Apple Watch—anywhere you go.

10+ Extra hours right in your pocket.
Never get caught at 1% again. PETL delivers 10+ hours of extra talk time—instantly. Always on. Always ready.

Transforms your Nightstand experience.
Not just a charger—a true bedside companion.PETL holds your iPhone in landscape, perfect for StandBy display mode, while both devices recharge together—quietly and beautifully.

Form meets function. Elegantly.
Engineered to match your Apple aesthetic—without compromise.

Snaps. Stays. Charges Perfectly.
Precision magnetism you can feel. PETL locks in with MagSafe using high-grade neodymium magnets—perfect alignment every time.

Works instantly with iOS.
No apps. No setup. No learning curve. PETL integrates with iOS's native battery widget—you're always informed about power levels.

Certified safe & reliable.
Tested. Trusted. Guaranteed. PETL meets global safety standards including CE, FCC, RoHS, UL, and WEEE certifications.

PETL Magsafe Battery Pack

PETL is a compact, ultra-portable MagSafe compatible battery pack built for modern Apple users on the move. Precision-machined from a single block of aluminum and topped with tempered glass, PETL offers 3000mAh of intelligent Qi wireless charging in a sleek, 70mm circular body. Strong neodymium magnets ensure a secure snap to your iPhone, while native iOS integration, adaptive fast charging, and thermal sensors deliver reliable power with zero effort.

For complete PETL specs visit here.

Quick Specs
Charging Output
Certified for next-gen Qi wireless performance.
Delivers reliable, fast charging to MagSafe-compatible devices.
Perfect snap-on alignment every time—no repositioning needed.
Smart Charging
Automatically adjusts power based on connected device.
Built-in thermal sensors prevent overheating or battery stress.
Ensures safe, efficient charging for all Apple devices.
Capacity

Device Charges with PETL
AirPods Pro (2nd Gen) Up to 3.4x (Wireless)
Up to 5.7x (USB-C)
Apple Watch Series 9 Up to 5.8x (Wireless)
Up to 9.7x (USB-C)
iPhone 16 (Est.) Up to 55% (Wireless)
Up to 92% (USB-C)
Magnets
Engineered for a strong, secure MagSafe lock.
Maintains tight hold during movement or use.
Snap-and-go experience—always precisely aligned.
iOS Integration
Connect PETL and see charge status instantly on iPhone.
No apps, no setup—just seamless native support.
Pairs visually with Apple’s smart battery widget.
Design – Circular & Patent-Pending
70mm wide and 14mm thin—built to disappear in your pocket.
Sleek circular silhouette is unlike any other power bank.
Patent-pending form balances usability and minimalism.
Build
Machined from a single aluminum block for structural strength.
Tempered glass top panel adds a refined, premium finish.
Zero plastic—designed for durability and sustainability.

Product description
Overview
PETL MagSafe® Compatible Battery Pack for Apple Devices.
PETL Natural is a premium 3,000mAh MagSafe compatible battery pack engineered for seamless iPhone charging. Crafted from silver anodized aluminum with a tempered glass top, it magnetically snaps to the back of your iPhone for fast, wireless power on the go. At just 70mm wide and 14mm thin, it’s one of the most compact and stylish power packs available—supporting Qi wireless and USB-C passthrough charging.

Enjoy up to 10 extra hours of talk time, automatic battery status in iOS, and effortless charging for your iPhone, AirPods, and Qi-compatible smartwatches—no cables, no apps, no setup required.

Key Features:
MagSafe-compatible battery pack with strong N52 neodymium magnets
3,000mAh high-density lithium polymer cell
CNC-machined silver aluminum + tempered glass design
Qi wireless + USB-C passthrough charging
Appears in iOS battery widget—no app required
Slim, portable, pocket-friendly form factor

Frequently Asked Questions

Can PETL charge my iPhone and other devices at the same time?
Yes. PETL supports simultaneous charging and discharging—charging your iPhone while recharging PETL itself.

Is PETL compatible with all iPhone models?
PETL is designed for iPhone 12 and newer models with MagSafe. It can also charge other Qi-enabled devices wirelessly.

Can PETL charge AirPods and Apple Watch?
Yes. PETL supports wireless charging for AirPods (with wireless charging case) and Apple Watch (Qi-compatible models).

Do I need a special cable or adapter to charge PETL?
No. PETL uses a standard USB-C input. Use any 5V/2A or 9V/2A certified USB-C adapter.

How long does it take to fully charge PETL?
Approximately 1.5–2 hours with a 9V/2A charger.

How do I check PETL’s battery level?
PETL displays its battery level directly on your iPhone through the battery widget. You can also press the side button to see the LED indicators.

Can I leave PETL attached to my iPhone overnight?
Yes. PETL is optimized for safe overnight charging and even supports iPhone’s Nightstand Mode when in landscape position.

Does PETL come with a charging cable?
No. To reduce waste, PETL does not include a USB-C cable. Most users already own one.

Is PETL airline-safe?
Yes. PETL’s 3000mAh battery complies with TSA and FAA guidelines for carry-on electronics.

Is PETL waterproof or dustproof?
PETL is splash-resistant but not waterproof. Avoid submersion or use in extreme conditions.

What warranty does PETL include?
PETL comes with a 12-month limited warranty covering manufacturing defects and normal wear and tear.

Why carry an iPhone, Apple Watch AND AirPods charger when you can carry just one thing that does it all?
So this is what most people pack when they travel or even just head to work.
An iPhone charger. An Apple Watch charging puck. An AirPods cable.
Three separate accessories. Cables tangling in your bag. Taking up space. And if you forget even ONE of them? You're screwed.

But what if I told you that this little guy right here replaces all of that?
This is PETL. It's a 3-in-1 MagSafe battery pack that charges your iPhone, your Apple Watch, AND your AirPods.
It's 70 millimeters wide, just slightly bigger than. a golf ball. It fits in your pocket, any small bag or clutch, and even your wallet. You can literally forget it's there until you need it.
Here’s how it works: To charge your iPhone, Just snap it on the back. And no, you don’t need to take off the case for it to work.
It has a Strong magnetic hol,d so it’s not going to fall off in your pocket or bag.
To charge your Apple Watch, just place it on top & it Wirelessly charges. And your AirPods? Same thing. Place your case on PETL, and it charges automatically.
One device. All your essentials covered.

Here's the thing: PETL gives you 10+ hours of extra battery life.
That's a full workday. A long flight. An entire day out without hunting for outlets.
Plus, it's the world's first CIRCULAR MagSafe battery.
This is 10x better than rectangular batteries, which always shift awkwardly & disconnect
Oh and it doubles as a stand. Perfect for StandBy mode on your nightstand or desk.
And check out the build quality. CNC-machined aluminum. Tempered glass top. Zero plastic.
Whether you're traveling, commuting, or just living your life, PETL keeps all your devices powered needing multiple cables. I'm telling you, once you use PETL, you'll never travel again without it.

1. Charge your iPhone, your AirPods, your Apple Watch, all wirelessly. Once you switch to Pedal, you'll never go back to your old charger again. Still using one of these corded MagSafe chargers? It's time to upgrade. Meet Pedal, a MagSafe-compatible charger with a built-in battery. Snap it on and charge anywhere. It's your desk charger and your travel battery in one. By midday when your battery dips, just snap Pedal back on. Boom. Instant boost. It's not just compact, it's designed to feel great in your hand. Circular, solid, and made to stand on its own. Charge your iPhone, your AirPods, your Apple Watch, all wirelessly. Once you switch to Pedal, you'll never go back to your old charger again. Replace this bulky thing with Pedal at GoPetl.com.

2. Let me introduce you to Petal. It's this tiny, super sleek, 3000mAh circular battery. And get this, it's MagSafe compatible so it just clicks on, no cables involved. It can charge my phone, my Apple Watch, even my AirPods. So no more rummaging through drawers looking for the right cable or having to pack a spare bag just for chargers. Petal can give you 10 extra hours of talk time and offers fast charging so you can keep scrolling while you charge. You can pick it up in two colours and both look stunning. Milled from CNC aluminium and finished with tempered glass so it pairs beautifully with my new iPhone 17 as well. Plus, one of my favourite features is that it doubles up as a stand so I can pop my phone into standby mode next to my bed or watch some TV while I'm working. One clean little circle, total game changer. If you're an Apple user, you need to pick one of these up.

3. I bought the #1 bestselling power bank on Amazon and compared it to my PETL. The difference is honestly shocking
Ok so this is the #1 bestselling power bank on Amazon. It's $8.
And this is PETL. It's $49.
I wanted to see if this tiny circular powerbank is actually worth the price difference, so I tested them side by side

First, let's talk about size. The Amazon one is this bulky plastic brick. It's heavy. It's awkward. It barely fits in my bag, and it definitely doesn't fit in a clutch or small purse. PETL? It's 70 millimeters, almost as small as a golf ball. It has this circular design so it easily fits in my pocket, purse, or wallet and I don’t have to worry about the cable disconnecting
But the real difference is in how they feel.
The Amazon power bank is cheap plastic. You can feel it the second you pick it up. It feels like a $10 gadget. One small drop and it could easily break.
PETL is machined from aluminum with a tempered glass top. Zero plastic. It feels premium. Like something you'd actually want to carry every day.
Also, you can forget about charging your Apple Watch or AirPods with an Amazon power bank. Most of them only charge your iphone. But PETL charges your iPhone wirelessly, your Apple Watch, and your AirPods. One device for all three. Just snap it to the back of your device and it works immediately
And here's something the Amazon one definitely can't do.
PETL doubles as a stand. So I can prop my phone up in StandBy mode on my nightstand or my desk. Perfect for when i’m on the go to watch my favorite movies.
And the battery life? PETL gives me 10+ hours of extra power. Enough to get through a full day, a long flight, or a night out without stressing.
Look I get it. $8 vs. $49 seems like a big difference.
But here's what I realized: I use my power bank almost every day. It lives in my bag. It keeps my phone alive when I need it most.
Do I really want to rely on some cheap, heavy plastic with annoying cables that only charge one device?
Or do I want a compact, wireless, powerbank that actually makes my life easier?
For me, PETL is a no-brainer.
You can save $40 and deal with bulky, rectangular powerbanks. Or you can invest in PETL and never stress over charging your apple devices again.
Link in bio. Trust me on this one.

4. Tried to pull up my boarding pass at the gate and my phone was dead. I never want to go through that panic again. So I got PETL. It's a circular MagSafe battery pack that I literally forget is in my bag until I need it because it’s so small.
And when I do need it? Oh It's a lifesaver.
Phone's at 5%? Just pull PETL out, snap it on magnetically, and you're charging. No cables. No hunting for outlets. No asking strangers if you can borrow their charger.
It's wireless MagSafe charging, so it literally just clicks onto the back of your iPhone and stays there.
It gives you 10+ hours of extra battery. That's a full day of work. A long flight. An entire night out.
Plus, it's tiny. 70 millimeters, almost the size of a golf ball. Fits in your pocket, your purse, anywhere. It also charges your Apple Watch and AirPods, so it's not just for your phone.
What I love about it is how it doubles as a stand. So at night, I prop my phone up in StandBy mode, and it charges while I sleep.

I've had way too many moments where my phone died at the worst time. Missed Ubers. Couldn't get into concerts because my ticket was on my phone. Standing at the airport gate panicking.
With PETL? That doesn't happen anymore. It's just always there. Always charged. Always ready.
So I never have to be that person frantically looking for an outlet again.
Don't wait till your phone dies on you. Try PETL and get 15% off plus free shipping
